International Politics

【授業の概要と目的（何を学ぶか）】

In our era of globalization, what happens on the other side of the world affects our lives. The COVID-19 outbreak in a Chinese city in 2019 evolved into a worldwide pandemic that still lingers. Russia's months-long war in Ukraine has accelerated a global energy and cost-of-living crisis and caused an economic slowdown in many countries. Understanding the problems that seem far away from home has become ever more important in this global era as we cannot afford to ignore them. But how can we interpret and tackle the key issues and challenges facing our world today? This introductory course in international politics and global affairs is designed to provide students with the analytical skills to explore and explain solutions to real-world issues.

The course consists of three segments. To start, we will look at the historical background of today's international system, focusing on the evolution from the end of the bipolarity of the Cold War to the emerging global order increasingly led by rising powers. The second segment will cover the main concepts and major strands of theory in the discipline of international relations (IR). These conceptual tools help us analyze global problems and are necessary knowledge for students who wish to continue their studies of international politics after the conclusion of this course. In the final segment, we will investigate contemporary issues that are likely to affect our world for years to come.

Students of all disciplines who are interested in international relations or political science are welcome to enroll. No prerequisites or previous knowledge of international relations is required, but it would be an advantage.

【到達目標】

At the end of this course, students should be able to:

- Describe the historical development of the international system from the end of the Cold War to the present
- Demonstrate a foundational understanding of the major IR theories and concepts and apply them to historical cases and current events
- Analyze and consider solutions to global challenges in the contemporary world
- Develop research, communication, and writing skills useful for future career paths in the field

【授業の進め方と方法】

The course will meet once a week. The structure of the course will be a mix of lectures, student presentations, and group discussions. Lectures, which give background information on each week's topic, will be followed by students' presentations on the weekly required reading of selected seminal texts, case studies, or other materials designed to expand the student's knowledge of the theme. Students will have a chance to interact with each other in small groups to review what has been introduced in class and respond to discussion questions before participating in a whole-class discussion. During the last few sessions of the class, students will share a proposal of their intended research with the class.

【授業時間外の学習（準備学習・復習・宿題等）】

Outside of formal classes, students are expected to:

- Read the weekly required materials and submit relevant questions to clarify and confirm their understanding or questions they wish to discuss in class
- Summarize and critically assess one or two required readings and prepare their analysis to share with the class
- Conduct an individual research project on a current event or issue of interest in global affairs and produce results via presentations and writing

Students are encouraged to do the following to contribute meaningfully to the class discussion:

- Explore recommended readings or materials provided on the list
- Keep abreast of current events by reading major news stories relating to international politics

【テキスト（教科書）】

All required course materials will be made available via hyperlinks in the syllabus or through the Learning Management System (LMS). No purchases are necessary.

【参考書】

The optional reference readings below are on reserve in the library. They provide helpful background information, particularly for the IR theoretical foundations.

【授業の概要と目的（何を学ぶか）】

This course is a general introduction for students who wish to expand their comprehension of global issues with reference to Africa as informed participants. It is also for students who are interested in studying Africa's society, culture, and politics. Students will learn to identify, analyze, interpret, and evaluate African issues and relate them to global issues.

【到達目標】

This course aims to expose students to how Africa has been subjected to profound stereotypes and misconceptions that have largely informed the continent's global perspectives. The course will seek to humanise our understanding of Africa by emphasising forms and means of daily life experiences and understandings such as family life, love and joy, the life cycle, faith and belief, livelihoods, aspirations, hopes for the future, development aims and achievements, and a sense of global belonging. The overall goal is that students will gain experience researching, discussing, and presenting Africa in the discussion of global issues using a good command of the English language with both clarity and confidence.

【授業の概要と目的（何を学ぶか）】

This course examines culture and society of the United States in comparison with other countries of immigrants such as Canada and Mexico, focusing on its transborderness and mobility. Often conceived of as a cross-border experience across regions and nations, the experience of traveling has been one of the central concerns in the history of literary and visual narratives particularly in the US. Through the analysis of American road movie and travel literature in comparison with those of other countries, this course introduces students to ways of thinking about US culture in a comparative and historical perspective.

【到達目標】

Through this course, students are expected to be able to do the following:
 1. Examine the ways in which travel is represented in literary and visual narratives
 2. Develop their skills to discuss culture through literary and visual texts
 3. Give presentations in which the concepts and topics covered in the course are applied

【授業の概要と目的（何を学ぶか）】

The course will focus on developing and improving students' public speaking skills in English by introducing basic techniques of public speaking and also by assigning tasks of giving English speeches in the class. Students will deepen their understanding of the linguistic behaviours of public speaking in English by giving speeches themselves and observing their classmates' speeches.

【到達目標】

The goal of this course is to acquire enough linguistic knowledge and skills to make speech in English themselves in the class, and also critical attitude to evaluate other people's speeches.

【Outline and objectives】

Why do some firms succeed and others fail? Competitive strategies of firms explain a substantial part of their success and survival in markets. This course introduces students to the key concepts and frameworks of strategic management. At the end of this course, students will be able to understand how firms gain competitive advantages and compete with rivals. The content of this course will form a basis for studying other courses on strategic management.

【Goal】

Objectives of this course are:

1. To learn how to analyze firms' external environments and internal resources.
2. To understand business-level strategy.
3. To build skills in analyzing firms' success and failure.

【Which item of the diploma policy will be obtained by taking this class?】

This course is strongly related to the "DP1-1" diploma policies and fairly related to the "DP2-2", "DP3" and "DP5" policies.

【Method(s)】

This course is primarily conducted in a classroom (face to face classes). Sessions consist of lectures and in-class exercises. Lectures introduce the students to basic concepts and frameworks. In-class exercises with regard to the concepts and frameworks include discussions and quizzes. Additionally, students work on a team project during the semester. The team consists of 3-4 students. The number of team members may vary depending on the number of registered students. Teams are required to conduct a team project. Each team member writes up a term paper based on the team project. At the end of the semester, teams will deliver a presentation of the project. Details regarding the team project will be announced in class.

Assignments are submitted using Hoppii. Feedback will be given either in-class or on Hoppii.

Term：秋学期授業/Fall | Credit(s)：2 | Day/Period：水 3/Wed.3 | Campus：市ヶ谷 / Ichigaya | Grade：1～4
Notes：

その他属性：〈ゲ〉

【Outline and objectives】

This course is designed to provide a basic understanding of accounting, including introductory accounting concepts, principles, and procedures. Specific attention will be devoted to the four financial statements and frameworks for understanding them, as well as ways in which to prepare financial data. Students will be expected to apply these skills to the analysis of real companies, and to interpret their respective financial statements accordingly. These cases will enable students to grasp the importance of accounting knowledge in the business world, to understand current events in terms of accounting measurements, and to communicate effectively with other professions.

【Goal】

Upon successful completion of the course, students should be able to:

- Analyze a company's financial statements
- Describe conclusions about profitability, efficiency, liquidity, and solvency
- Record basic debt-credit journal entries and prepare a set of financial statements

【Which item of the diploma policy will be obtained by taking this class?】

This course is strongly related to the "DP1-2" and "DP2-1" diploma policies and fairly related to the "DP1-1" and "DP2-2" policies.

【Method(s)】

- In case it is difficult to hold classes in the classroom due to COVID-19 or natural disasters, we will keep holding the classes using Zoom. The recorded lessons will be available until the end of the class.
- After the review, new topics are explained by the instructor, followed by group discussions and/or case analysis. Active participation is strongly recommended especially during discussions and analysis.
- Japanese company financial statements are used in case analysis.
- Questions and comments are welcomed at any time on the Zoom and Google Classroom.
- Feedback on questions from students is provided verbally during class.

Notes :

その他属性 : 〈グ〉〈実〉

[Outline and objectives]

This course introduces the concepts, principles, problems, and practices of operations management. Emphasis is on managerial processes for effective operations in both goods-producing and service-rendering organizations. Topics include operations strategy, process design, capacity planning, facilities location and design, forecasting, production scheduling, inventory control, quality assurance, and project management. The topics integrate using a systems model of the operations of an organization.

[Goal]

This course aims to improve students' understanding of operations management's concepts, principles, problems, and practices. After completing this course, students should be able to:

- Develop an understanding of and an appreciation for the production and operations management function in any organization.
- To understand the importance of productivity and competitiveness to both organizations and nations.
- To understand the importance of an effective production and operations strategy to an organization.

[Which item of the diploma policy will be obtained by taking this class?]

Term : 春学期授業/Spring | Credit(s) : 2 | Day/Period : 水 3/Wed.3 | Campus : 市ヶ谷 / Ichigaya | Grade : 1~4
Notes :

その他属性 : 〈グ〉〈実〉

[Outline and objectives]

This course provides an introduction to (1) the Japan's macroeconomic characteristics, (2) the Japan's current economic issues, and (3) the basic economic principles and methods.

After learning a brief history of the Japanese economy and the basic analytical tools of economics, we focus on Japan's labor markets, financial markets, corporate finance and capital investments, international transactions, and economic policies from the 1980s onward. Comparison with the other economies is frequently done.

By the end of the semester, you are expected to be able to utilize the theoretical and empirical tools practiced in this class to generate practical policy recommendations for Japan's major economic problems.

[Goal]

This course is designed to provide students with opportunities to gain a basic understanding of the Japanese economy. The particular goals can be summarized as follows:

1. To learn the history of the Japanese economy after WWII
2. To learn the basic features of Japanese households, firms, and the government and to apply conventional economic theory to understand their behaviors
3. To strengthen analytical skills by discussing the strengths and limitations of Japan's corporate system, labor markets, economic policy, and so forth

[Which item of the diploma policy will be obtained by taking this class?]

This course is strongly related to the "DP1-3", "DP2-1", "DP2-2", "DP3" and "DP4" diploma policies and fairly related to the "DP1-1", "DP1-2", "DP1-4" and "DP5" policies.

[Method(s)]

This course mainly comprises lectures, slideshows, in-class activities, and discussions. All class materials are distributed through the LMS. Note that the order of the lectures might be changed from the below suggested schedule but what we will cover would not change very much. Regarding lecture style (in-person and/or online), I am flexible so that the suggested in-person and/or online style is just tentative and is subject to change.

I will give feedback on class assignments during the lecture and/or through Hoppii (i.e., LMS).

[Grading criteria]

Final exam: 100%. (1) Solving and submitting non-mandatory problem sets and (2) class participation (including non-mandatory problem sets) will give you extra points.

Final exam will be offered in-person. In some special cases, online exam will be prepared and you should have good access to the Internet. You need PC (no smartphone or tablet) to take the exam properly.

The fail rate was less than 5% for the last 5 years.

[Changes following student comments]

I tried to design this course to motivate students to be interested in learning economic ideas and to understand why those ideas are powerful.

[Equipment student needs to prepare]

You need a computer/tablet. Most of the materials would be distributed electrically by using PDF.

[Others]

This course has no prerequisites. I strongly encourage students to take Principles of Macroeconomics, Principles of Microeconomics, Business Management in Japan, Japanese Innovation Management, Human Resource Management I / II, and Corporate Finance AFTER taking this course.

Please note that if the number of students attending the first class significantly exceeds expectations, in order for the instructor to effectively manage the class, the number of students who are allowed to register for the course may be limited.

[Prerequisites]

None

[Upon threat level change]

Please note that the teaching approach may vary according to which threat level we are at: at level 1, this course will be held on campus, though at level 2, it will be held online.

Term : 春学期授業/Spring | Credit(s) : 2 | Day/Period : 水 2/Wed.2 | Campus : 市ヶ谷 / Ichigaya | Grade : 1~4
Notes :

その他属性 : 〈グ〉

[Outline and objectives]

This course introduces elementary statistics, covering basic knowledge of descriptive statistics, probability and inferential statistics.

[Goal]

After successfully completing this course, students can do the following among others: understand and explain basic concepts; and summarize and examine data using software such as Excel.

[Which item of the diploma policy will be obtained by taking this class?]

This course is strongly related to the "DP1-4" and "DP2-1" diploma policies and fairly related to the "DP2-2", "DP4" and "DP5" policies.

[Method(s)]

The class is a combination of lectures and (computer) exercises. In each class, we quickly review a topic by watching a video and then learn the details with discussion and exercises. Homework will be given almost every week, and will be reviewed at the beginning of the next class.

Global Business Strategy II

Naoki ANDO

Term：春学期授業/Spring | Credit(s)：2 | Day/Period：月 4/Mon.4 | Campus：市ヶ谷 / Ichigaya | Grade：2～4
Notes：

その他属性：〈ゲ〉

[Outline and objectives]

This course introduces students to key concepts and theoretical frameworks of international business. Accordingly, the course is more theoretical than practical.

The course focuses on key topics in international business such as global and multidomestic strategies, international strategic alliance, and foreign subsidiary staffing.

At the end of this course, students will be able to understand how firms enter foreign countries, manage foreign subsidiaries, compete with rivals, and gain competitive advantage overseas. They will also acquire an ability to analyze firms' success and failure overseas.

[Goal]

Objectives of this course are:

1. To understand traditional topics in international business such as MNEs' strategies, international strategic alliance, and foreign subsidiary staffing.
2. To understand new topics in international business such as regional geographic diversification and language barriers.
3. To develop skills in analyzing firms' success and failure in foreign markets using the theories of international business.

[Which item of the diploma policy will be obtained by taking this class?]

This course is strongly related to the "DP1-1" and "DP4" diploma policies and fairly related to the "DP2-2" policy.

[Method(s)]

This course is conducted in a classroom (face to face classes). However, in cases where students cannot enter Japan, the course will take the HyFlex form, which is in-person lectures in parallel with online real-time. Students who cannot enter Japan attend lectures online.

Sessions consist of lecture, in-class exercise, and discussion. Lecture introduces students to basic concepts and frameworks of the session's topic. Discussion and in-class exercises are conducted to gain a better understanding of the concepts and frameworks.

Students also work on a team project during the semester. A team consists of 3-4 students. Each team is required to conduct a team project. Each team member writes up a term paper based on the team project. In Week 14, teams make a presentation of the project. Details regarding the team project will be announced in class.

Assignments are submitted using Hoppii. Feedback will be given either in-class or on Hoppii.

Financial Statement Analysis

Hiroshi FUKUDA

Term：春学期授業/Spring | Credit(s)：2 | Day/Period：水 3/Wed.3 | Campus：市ヶ谷 / Ichigaya | Grade：2～4
Notes：

その他属性：〈ゲ〉

【Outline and objectives】

Stakeholders such as investors, suppliers, customers, employees and regulators, etc. need to be able to analyze and interpret financial statements. Precise analysis of these documents can help both internal and external decision makers evaluate an organization's past performance and then predict its future performance. In class we focus our attention on some basic and important ratios and other analytical tools.

【Goal】

After studying Financial Statement Analysis, you should be able to:

1. Recognize and define the main elements(stock data) and ratios on the balance sheet of a corporation.
2. Recognize and define the principal elements(flow data) and ratios on the income statement of a corporation.
3. Recognize and define the principal elements(flow data) and ratios on the cash flow statement of a corporation.
4. Compute and interpret basic and important financial ratios that would be useful to each stakeholder.
5. Make use of knowledge gained in a business setting in the near future.

【Which item of the diploma policy will be obtained by taking this class?】
This course is fairly related to the "DP1-2", "DP1-4", "DP2-1", "DP2-2", "DP3", "DP4" and "DP5" diploma policies.

【Method(s)】

This course is comprised partly of lectures, practices, and presentations by students. In each class, the instructor will first explain the topic of the day and students will do exercises. Participants are also required to make a presentation about corporate financial strength 3(three) times per semester. Feedback will be given to every student after each presentation in verbal and/or written form

[Outline and objectives]

A derivative, or derivative security is an agreement between two counterparties whose payoff depends on the value of an underlying asset. Forwards, futures, options, and swaps are representative derivatives. Derivatives are actively traded throughout the world and their market is exceedingly large. This course aims to help students understand the basic structures of derivative securities and how to value them. Comprehension of derivatives will come in very useful in case you work in the financial industry in the future. Due to time constraints, swaps will be briefly discussed only if we get ahead of schedule.

[Goal]

Upon completing this course, students will be able to

- 1) understand the characteristics of various types of derivatives.
- 2) understand how to value forwards and futures.
- 3) understand how to value call and put options.
- 4) intuitively understand what the famous Black-Scholes model says
- 5) solidify an understanding of business and economic news about financial markets.

This course is strongly related to the "DP1-1", and "DP4" diploma policies and fairly related to the "DP1-3", "DP1-4", "DP2-1", and "DP2-2" policies.

[Method(s)]

This course is basically lecture-based, but wide open to active participation in class. The lecturer encourages students to ask and answer questions in an interactive manner. By reviewing assignments, feedback will be provided.

[Outline and objectives]

This course aims at deepening our understanding of the retail and distribution system in Japan. At the end of this course, you'll have acquired hands-on knowledge on (1) the social roles of the distribution system, (2) idiosyncrasies and historical development of the Japanese retailing and distribution system and (3) some of the critical and contemporary issues surrounding retailing and distribution trades in Japan, including the advance of varied forms of e-tailing and digital platforms.

[Goal]

Through participating in this course, students are expected to acquire fundamental knowledge on various types of distribution channels as well as the social roles that the distribution system plays in a given socio-cultural and economic setting. Students are also given opportunities to compare the distribution system in one's own country with its Japanese counterpart, making use of relevant statistics and other secondary sources, together with some fieldwork and case-based coursework. Course assignments are designed in a way that students can develop their understanding of the theoretical/conceptual knowledge they pick up through each lecture by relating them to their everyday life and consuming practices.

[Which item of the diploma policy will be obtained by taking this class?]

This course is fairly related to the "DP1-1", "DP2-1", "DP2-2", "DP3", "DP4" and "DP5" diploma policies.

[Method(s)]

For the academic year 2023, this course is likely to take a hybrid form of combining several different modes of teaching, including (1) on-demand, (2) face-to-face classroom, and (3) site visits (field work). The choice of the mode will depend on the nature of the contents of the lecture each week. A detailed course schedule will be notified in the first week of the semester. Course materials for each lecture are to be provided through Google Classroom. A slack workspace to be set up for the students will help you reach the lecturer easily and flexibly whenever you have any queries. Feedback on students' coursework is to be provided primarily via Google Classroom.

Principles of Macroeconomics

Mitsuru Katagiri

Term：春学期授業/Spring | Credit(s)：2 | Day/Period：月 2/Mon.2 | Campus：市ヶ谷 / Ichigaya | Grade：2～4

Notes：

その他属性：〈グ〉〈実〉

【Outline and objectives】

This course gives students an overview of macroeconomic issues: economic growth, unemployment, inflation, interest rates, and exchange rates. Topics include policy issues such as government expenditures, taxation, and monetary policy.

【Goal】

Macroeconomics is a necessary and helpful tool for understanding economic issues and policies. The goal of this course is to acquire basic knowledge of macroeconomics and to understand how to use the knowledge of macroeconomics to resolve challenges in business.

【Which item of the diploma policy will be obtained by taking this class?】

This course is strongly related to the "DP1-3", "DP2-1" and "DP2-2" diploma policies and fairly related to the "DP3", "DP4" and "DP5" policies.

【Method(s)】

The lectures are based on slides and "MyLab," an e-learning platform by Pearson. Also, in the class, recent economic issues in newspapers, magazines, etc., are introduced to learn how to use macroeconomics to deal with real economic and business problems. Feedback on class assignments will be given in the class.

No.	Theme	Contents
Class 1	Introduction	This lecture provides several key points for using economics to resolve real economic issues and explains the purpose of studying macroeconomics.
Class 2	A Brief Introduction to Microeconomics	This lecture covers the knowledge of microeconomics for studying macroeconomics, particularly the price mechanism to balance supply and demand.
Class 3	The Wealth of Nations	This lecture provides the concept of GDP and inflation and explains why it is an important measure to assess economic activity.
Class 4	Aggregate Incomes	This lecture focuses on very large differences across countries in income and explains that technology and the efficiency of production are key to accounting for the cross-country differences.
Class 5	Economic growth	This lecture explains why economic growth is important for everyone's economic activity and what encourages long-term economic growth (education, population growth, etc.).
Class 6	Why Isn't the Whole World Developed?	This lecture asks: What has prevented poor countries from catching up to the level of prosperity of developed countries? We examine various factors for economic development.
Class 7	Employment and Unemployment	This lecture covers labor market issues including unemployment rates and wages and explains the effects of government labor market policies.
Class 8	Credit Markets	This lecture explains the role of financial markets and banks in encouraging long-term investment for economic growth.
Class 9	The Monetary System	This lecture explains the role of central banks (i.e., the Bank of Japan in Japan and FRB in the U.S.) such as issuing currencies and conducting monetary policy.

Class 10 Short-Run Fluctuations

This lecture explains what we observe in economic booms and recessions, including the global financial crisis in 2008-2009, and what causes those short-term fluctuations.

Class 11 Countercyclical Macroeconomic Policy

This lecture covers fiscal and monetary policies by the government and the central bank and describes their effects on economic activity and inflation.

Class 12 Macroeconomics and International Trade

This lecture covers recent trends in international trade across countries and explains what a key driving force for the trade pattern under globalization is.

Class 13 Open Economy Macroeconomics

This lecture covers exchange rates and their determinants and explains their relationship with trade and international capital flows.

Class 14 Final Exam

We have an in-class examination.

【Work to be done outside of class (preparation, etc.)】

Students are expected to briefly read the corresponding chapter of the textbook before each class. Also, after the class, students are expected to review what they learned in the class and read articles in newspapers and magazines assigned in the class. Preparatory study and review time for this class are 2 hours each.

【Textbooks】

Macroeconomics (Global Edition, 3rd edition), by Daron Acemoglu, David Laibson, and John List. You can access the textbook via MyLab, provided by Pearson.

【References】

Other teaching materials, including articles in newspapers and magazines, will be provided in the class.

【Grading criteria】

The grades are based on (1) the final exam (70%) and (2) the assignments (30%). The students can discuss with other classmates and refer to textbooks when working on the homework, but all students should individually write the answers in their own words.

【Changes following student comments】

I will try to have more transactions with students by asking questions etc.

【Equipment student needs to prepare】

All students must purchase MyLab, a computer-based e-learning platform by Pearson, to access the assignments and the textbook. However, students who bought MyLab for "Principles of Microeconomics" do not need to buy it again.

[Outline and objectives]

Now that the need for DX (digital transformation) has been pointed out, society as a whole is undergoing a major transformation. Since the end of the 20th century to today in the 21st century, new service and software IT companies such as GAFAs have rapidly emerged in the United States, leading to the formation of a huge group of companies. It has been a long time since the Japanese economy stagnated after lost 20 years, but recently digitalization has progressed in various fields, and existing business transformations and new digital services are rapidly emerging.

The purpose of this class is to understand the current situation of DX, especially the efforts and issues of Japanese companies. We will also discuss the transformation of the digital society and the direction of innovation as the background for DX to attract attention. In class, case studies and presentations will be conducted by group work, and the method of discussion throughout the class will be used.

[Goal]

- Understand the transformation of the society surrounding DX and the background in which DX is required.
- Understand the outline of DX and understand its purpose
- Acquire knowledge about DX promotion issues and success measures through research on company cases that promote DX

[Outline and objectives]

The course is built around basic Global Business Expansion Strategies and is designed to enable students to familiarize themselves with all the critical variables which business leaders must consider in making global business management decisions. The emphasis is on practical approaches so that after entering the corporate world, students will be ready to be global business specialists in corporate enterprises or consulting firms.

[Goal]

Students will be prepared to create business case proposals centered on entering new geographical markets, with compelling reasons for a firm to expand its businesses.

1. Understanding critical variables to be considered for a firm to go global
2. Acquiring knowledge of entry strategies and methodologies for location choice
3. Learning tasks and challenges which modern global companies are facing

[Which item of the diploma policy will be obtained by taking this class?]

This course is strongly related to the "DP1-1" and "DP2-2" diploma policies and fairly related to the "DP3" and "DP4" policies.

[Method(s)]

For the first half of the semester, 50% lectures and 50% active learning. Active learning requires the students to take the lead in the learning process with the instructor acting as a facilitator. This will particularly be the case in the second half of the semester. Some examples of active learning are group work, case studies with discussions and debates, team presentations, etc. This course provides students with a series of live presentations including Q&A sessions on specific topics related to global business expansion from experienced, globally active business leaders. The presentations by guest speakers are online. Before each presentation, the instructor will give necessary frameworks to facilitate understanding of the subject. Students are expected to prepare questions in advance so that the Q & A sessions will be fruitful for the students. After the presentation, any remaining time will be devoted to discussions among students and the instructor.

The plan is to conduct this course in a classroom. However, depending on the pandemic situation, the course may be held remotely via Zoom or equivalent software.

Instructor will give students his oral and written feedback on their assignments in class.

[Outline and objectives]

This course will provide an introduction to the culture and society of contemporary Britain. Students will acquire knowledge about Britain: its geography, climate, history, traditional culture, religion, political system, society, Britishness, and so on. The course will survey British society following globalization after Thatcher's government. Britain in the 70's was a nightmare, economically crippled, politically in a quagmire, and yet culturally vibrant. Thatcher, as prime minister (1979-1990), changed Britain drastically in the 80's. She insisted on free enterprise and deregulation, employed monetarist policies, privatized nationalized industries, passed legislations to weaken trade unions' political power, and was tenaciously skeptical about the deepening of European integration. However, socially, she was conservative and put an emphasis on the importance of traditional family, a self-help work ethic and community. Whether her policies worked well or not is still in discussion, but she is commonly thought to have prepared the way for globalisation, economic success, and the rise of so-called Cool Britannia. Political issues are often related to nation, religion, immigration, ethnicity, class, globalisation, gender, youth culture, and so on.

With UK as a case theme, we also understand the diversity of cultures around the world and the significance of enhancing communication with people from other cultural backgrounds.

[Goal]

Students will (1) acquire the general knowledge of the society and people in contemporary Britain, (2) learn how one of the most globalized nations has gone through the changes, and (3) think about the new realities and the implications of the changes. By comparing the situations in Britain and Japan, students will gain clearer perspectives on complex issues common in the most advanced and affluent countries.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 3", and "DP 4".

[Method(s)]

Students will attend lectures, read related materials, write short essays, watch videos and films, and have two written examinations.

Feedback will be given through Hoppii.

【Method(s)】

The course focuses on the teaching and learning of English. Students will learn theories of first and second language acquisition and a range of opportunities to explore research studies and pedagogy on EFL/ESL education. The course will be highlighted by the students' individual performance: they are to choose one of the course topics and then make a presentation on it. They are required to practice their ICT pedagogical skills through the presentation as well as learning its content. Students are also required to take a final exam and submit a written assignment on a related issue.

Submission of the final requirements and feedback will be on the learning management systems.

【Outline and objectives】

What is world literature? Why do some books become global bestsellers while others are deemed untranslatable? How does literature relate to other forms of art such as movies or music? This course will introduce the fundamental issues of modern comparative literary studies, including national canons, world literature, translation, and adaptation. We will discuss how comparing works with other texts across genres, languages, time periods, or forms of media can give us a fuller understanding of not only the text itself, but also how systems of literature combine to influence our impression of the text.

【Goal】

Students will practice critical reading and writing while learning the basic approaches used in comparative literary studies. Students will examine the historical development of comparative literature as a field while utilizing comparative methodology to read and respond to selected texts.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

Classes will be divided roughly evenly between lectures and guided discussions. Short quizzes will occasionally be given to assess comprehension of weekly readings. Students will also be evaluated through a midterm examination and final paper. In-class feedback will be given for daily reaction papers and written assignments.

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 月 2/Mon.2

その他属性 : 〈グ〉〈優〉

【Prerequisite】
None.

【Outline and objectives】

This course examines the social, political, and cultural forces that shape the canon of Japanese literature available in English translation. In particular, we will focus on translations published in the United States in the postwar period. How did publishers determine which authors to introduce to an American audience, and how did those choices influence our images of Japanese literature in Japan, the US, and globally?

【Goal】

Students will think critically about the discourses of translation, publication, and world literature. Students will also develop critical reading and writing skills through class assignments.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

Classes will consist of lectures followed by group discussions. Quizzes will be used to check reading comprehension, and students will complete two papers for midterm and final evaluations. In-class feedback will be given for daily reaction papers, and students will receive personal feedback on written assignments.

Race, Class and Gender I: Concepts & Issues

Daiki Hiramori

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 1/Tue.1

その他属性 : 〈グ〉〈S〉〈未〉

【Outline and objectives】

This class sees our society through the lens of race, class and gender to understand how privilege and inequality are produced, maintained, naturalized and challenged. The course will look at how various inequalities are connected to one another through examining global, national and local issues. Students will learn to analyze how race, class, gender, and sexuality are connected to each other as intersecting inequalities in a society and the world, and on that basis, consider the possibility of an equal but diverse world.

【Goal】

Through lectures, discussion and written assignments, students will learn concepts and theories to analyze how race, class, gender and sexuality affect individuals and society. They will learn to apply these analytical tools and knowledge to form critical opinions on current issues related to various bases of inequalities. Students will acquire skills in critical thinking, analysis and writing that can be applied in other academic fields as well as future careers.

【Which item of the diploma policy will be obtained by taking this class?】
Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

This course will be based on a combination of short lectures by the instructor and student-led class discussions. Verbal and written feedback on assignments is given during class discussions and through using other tools as appropriate. Students are encouraged to visit the instructor during office hours for more personalized feedback.

【Changes following student comments】

Students have generally evaluated the class positively. The instructor will be attentive to student feedback and adjust workload and class material, when necessary.

【Equipment student needs to prepare】

None. Students are encouraged to use computers/tablets for class-related purposes in class.

【Others】

Students are strongly encouraged to take Race, Class and Gender II after completing Race, Class, Gender I. Students who have passed Race, Class and Gender I will be given admission priority to the seminar “Intersectionality: Multiple Inequalities.”

【Prerequisite】

Students who intend to enroll in this course are expected to have passed “Introduction to Sociology.”

Social Psychology I

Yu Niiya

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 木 1/Thu.1

その他属性 : 〈グ〉

[Outline and objectives]

This is an introductory course in social psychology, the scientific study of how we view and influence one another. Students are introduced to the theories, research methods, and seminal findings of social psychology. Social Psychology I will primarily focus on how we think about the social world, how we come to understand others, and how we exert influence on others' thoughts, feelings, and behaviors. Topics include perceptions of others and the self, attitudes, conformity, obedience, and persuasion. Social Psychology II will focus on social relations and intergroup dynamics, covering topics such as helping and aggression, group influence, self, emotion, and prejudice. These two courses will complement each other to provide an overview of the main content areas of social psychology.

[Goal]

This course will introduce students to the perspectives, research methods, and empirical findings in the field of social psychology and cultivate skills in analyzing the social situations and events that we encounter in our everyday lives. By the end of the course, students will be able to (1) identify and understand major theories, principles, and research findings in the field of social psychology, (2) apply social psychological theories and principles to real life experiences, and (3) critically evaluate social psychological theories and research. In Social Psychology I, students will be able to answer the following questions: How are we influenced by our environment and by other people? How do we explain others' behavior? What are attitudes and how do they affect us? What leads to conformity and obedience? When are people persuaded by differing opinions and when are they not?

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 2", and "DP 4".

[Method(s)]

Methods of instruction include lectures, films, individual and small group activities, and discussions. Students will engage in various hands-on activities and experiments to experience the concepts they learn in class. Students will be asked to reflect on their daily experiences and share examples that illustrate these concepts. Feedback for the quizzes and midterm exams will be given in class. Students are also encouraged to take advantage of the office hours should they wish to get more personalized feedback on how to improve their performance.

[Grading criteria]

Students are evaluated based on midterm and final exams (35% each), in-class activities and quizzes (20%), and class participation (10%).

[Changes following student comments]

Students usually find this course interesting and eye-opening. I hope to continue engaging students with materials through various hands-on activities and discussions.

[Others]

Social Psychology I and II can be taken in reverse order (II and then I). Students who have taken and passed Statistics and introductory courses in psychology (e.g., Introduction to Psychology I/II, Developmental Psychology) may be given priority in the selection. Quantitative Research Methods

Yu Niiya

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 木 2/Thu.2

その他属性 : 〈グ〉〈優〉

[Outline and objectives]

The goal of this course is to introduce the students to various quantitative research methods used in the social sciences. When making important decisions, be it choosing a strategy to increase the sales of a product, implementing an intervention program to boost people's well-being, or selecting a school program to increase students' learning, people can rely on their intuition and experience, or they can base their decisions on facts: data. In this course, students will develop skills to obtain valid and reliable data through experimental and survey methods. The course will also cover topics related to research ethics, some basic statistics, and APA-style writing.

[Goal]

This course provides an overview of the 'how's and 'why's of quantitative research in social sciences, and it covers such topics as design, ethics, and APA-style writing and such strategies as field experiments and surveys. Students will develop the ability to design, conduct, evaluate, and report empirical studies. By developing hypotheses and critically assessing information, students will improve on their critical thinking skills.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 2", and "DP 4".

[Method(s)]

The course consists of lectures, in which general ideas and methods of research will be presented, and hands-on applications of the methods, in which student's research projects will be planned and presented. Although some of the class time will be set aside for planning students' research, the majority of it will be done as assignments to be completed outside class. Feedback for research will be given during class time. Comments for papers will be given via the Learning Management System.

[Work to be done outside of class (preparation, etc.)]

Students will have to complete the assigned homework on time to successfully complete the class. They will be asked to do the readings, create research materials, collect data, etc. outside the class. Please bear in mind that the course will require that students spend a considerable amount of time outside class (at least 2 hours every week, sometimes more). Most work will be done in small groups, suggesting that students need to be flexible in finding time to meet other students during the week. Preparatory study and review time for this class are 2 hours each.

The reference books will be available in the library and the GIS Reference Room for those who wish to learn about each topic in more detail. Handouts and reading materials are on the course website.

[Grading criteria]

Final grades are based on two research papers (20% and 30%), a poster presentation (20%), and the quality and timeliness of group work done outside class (30%).

[Changes following student comments]

Students in previous years found this course very demanding but rewarding. Some students aimed to accomplish at a higher level while others were somewhat struggling to meet the requirements. I will provide office hours and other consulting time outside the class to meet the need of individual students.

[Equipment student needs to prepare]

For some weeks, students will be asked to bring laptop computers. Students must get the login information for PyscINFO database from the library.

[Others]

Students who have successfully completed Statistics will be given priority during enrollment.

Students must take and pass this course if they wish to enroll in the Self and Culture seminar. Students who plan to enroll in other seminars in social sciences are also strongly encouraged to take this course.

Sociolinguistics

Yutai Watanabe

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 2/Tue.2

その他属性 : 〈グ〉

【Outline and objectives】

This course provides students with a basic knowledge of sociolinguistics, the study of language in relation to society. The first part of the course is concerned with how individual language use is correlated with a variety of social variables, such as gender, age, class and ethnicity, by outlining a number of previous studies conducted in the English-speaking world. Particular reference is made to the classic research of William Labov, one of the founding figures of quantitative sociolinguistics.

Later lectures focus on how and where a language or dialect is socially placed and ranked within a community, including multi-lingual/dialectal countries such as Singapore. Students who are or are becoming bilingual will find the discussion on bilingualism especially interesting when they learn that its implications not merely vary from one society to another, but have been significantly changing recently. Another major topic is language attitudes. They are not based on purely linguistic considerations, but connected with how people perceive and evaluate different dialects or accents.

【Goal】

By the end of the course, students will:

- (1) understand key terminology, concepts and theories in sociolinguistics,
- (2) have an awareness of ongoing language changes in society, and
- (3) become familiar with interpreting quantitative/qualitative data for sociolinguistic analysis.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

This course is a combination of lectures and class discussions. Based on a flipped learning model, students have to read chapter handouts and address questions asked there prior to attending each lecture. Submitted assignments and tests are reviewed in detail and commented on in the following week’s lecture.

English as a Lingua Franca

Yutai Watanabe

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 3/Tue.3

その他属性 : 〈ゲ〉

[Outline and objectives]

The ratio of L1 to L2 users of English in the world is roughly estimated to be 1 to 3. However, it was only towards the turn of the century that sociolinguists/applied linguists took a keen interest in the expanding use of English as a lingua franca (ELF), which is due to the globalisation in all aspects of society, including mass media and pop culture. Arguably, some Expanding Circle countries, where English does not have an official language status, have recently overshadowed the Outer Circle ones in proficiency and frequency of use.

The former part of the course observes how extensively English is used in international contexts, mainly among non-native speakers, while analysing samples of L2-accented speech. It also refers to the limitations in the traditional models of World Englishes put forward by B. Kachru and other scholars. The latter half discusses native-speakerness, bilingualism and native-speakerism, all of which exert a significant influence on pedagogical practices, and suggests how these notions could/should be modified from the perspective of ELF. The course is concluded with an analysis of status and function of English in present-day Japan.

[Goal]

By the end of the course, students will:

- (1) understand key terminology and concepts in ELF and World Englishes,
- (2) have an awareness of the wider use of English in non-native speaking contexts, and
- (3) become familiar with interpreting quantitative/qualitative data for linguistic research.

[Which item of the diploma policy will be obtained by taking this class?]
Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

This course is a combination of lectures and class discussions. Based on a flipped learning model, students have to read chapter handouts and answer assigned questions prior to attending each lecture. Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 木 2/Thu.2

その他属性 : 〈グ〉

[Outline and objectives]

The course is mainly provided for students intending to teach English. Its purpose is to give an insight into the basic issues in teaching methodology for L2 education. It will also encourage students to develop their own teaching performance with a consideration to make consistency in language education from the primary to secondary levels.

[Goal]

Upon completion of this course, students should be able to do the following:

1. Understand different types of L2 teaching methods and approaches.
2. Learn how to apply some findings of linguistic studies to L2 English teaching.
3. Consider L2 education in relation to crucial issues of semantics and pragmatics.
4. Grasp the knowledge and skills for teaching languages as well as L2 pedagogy through ICT to qualify as an English teacher.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 2" and "DP 4".

[Method(s)]

The course will focus on theoretical and practical aspects of the methodology of teaching EFL/ESL. It will also provide opportunities to explore a wide range of EFL/ESL teaching scenes in different countries with reflections on those in Japan; for example EFL/ESL classrooms for learners who vary in age, gender, nationality and occupation can be examined. The students will relive EFL/ESL teaching scenes by following principles and techniques discussed and suggested in a range of teaching methods and approaches: they follow the model English lessons and demonstrate them in the form of micro-teaching. They are also required to create the related teaching materials including ICT along with the lessons. The final exam and a written assignment are required for the completion of this course and, in a written assignment, they demonstrate their study of the model lessons.

Submission of the final requirements and feedback will be on the learning management systems.

The course is for students intending to teach English. Its purpose is to give an insight into syllabus design and lesson planning for L2 education. It encourages students to examine, discuss and create L2 resources with a consideration to make consistency in language education from the primary to secondary levels.

【Goal】

Upon completion of this course, students should be able to demonstrate the following:

1. Identify the components of a language course.
2. Design course materials that match educational objectives.
3. Employ a principled approach to the design, creation, and implementation of EFL/ESL course syllabi and teaching materials.
4. Grasp the knowledge and skills for teaching languages as well as L2 pedagogy through ICT to qualify as an English teacher.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain “DP 1”, “DP 2”, and “DP 4”.

【Method(s)】

The course focuses on issues in planning and conducting EFL/ESL lessons: it encourages student teachers to take into consideration the importance of lesson planning when designing an EFL/ESL course. It also provides opportunities for the exploration of a wide range of ideas and examples in the syllabus design from different countries, with reflections on those in Japan. Students are expected to acquire a basic understanding of how to create a lesson plan with materials including ICT needed for managing the language classroom. Students are also required to create their own English lessons and teaching materials, with the opportunity to put them into practice. Students will complete a writing assignment and a final examination that reflects their work on teaching plans, performance and lesson materials. Submission of the final requirements and feedback will be on the learning management systems.

[Outline and objectives]

This course is for students intending to teach English to young learners as primary pupils. It provides an overview of second language learning (SLL) for such young learners, with reference to primary modern foreign languages (PMFL), in particular, English as a foreign language (EFL) within the global context. Its purpose is to give an insight into a range of SLL theories to primary pupils from psychological, educational and linguistic perspectives. It also explores modern second language (L2) pedagogy for them with consideration to make consistency in L2 education from the primary to secondary levels. It looks at practical issues of their SLL, such as the global movement towards primary L2 education, differences in teaching and assessing primary pupils and other L2 learners at higher levels of education, etc. Students will be encouraged to develop their own perspectives on the teaching of English in primary school.

[Goal]

Upon completion of this course, students should be able to do the following:

1. Understand the core issues of SLL theories of young learners.
2. Explain different perspectives of the core issues of L2 education in primary school.
3. Examine the connection between the core issues of young learners' SLL and L2 pedagogy in primary school.
4. Utilise the theoretical knowledge of L2 education for young learners to give an insight into cultivating L2 pedagogy in primary school.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

[Method(s)]

A presentation, final exam and writing assignment are required for the completion of this course; students are required to choose one of the course topics, make a presentation and submit a writing assignment on it. Submission of the final requirements and feedback will be on the learning management systems (HOPPII, etc.).

World Politics

Takeshi Yuzawa

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 3/Tue.3

その他属性 : 〈ゲ〉

【Outline and objectives】

This course examines enduring questions of world politics, including rivalry and competition among great powers, rising ethnic and religious conflicts, the role of international law and organizations, growing economic interdependence and the effects of globalization, the rise of non-state actors and their challenges to state sovereignty, and the prospects of world order.

【Goal】

The course objectives are: (1) To enable students to utilize the concepts and theories of IR to analyze major events, actors and structures in world politics, e.g., the state, war, rising ethnic and religious conflicts, the role of international law and organizations, globalization, the rise of non-state actors and the prospects of world order; (2) To enable students to acquire the ability to form their own answers to enduring questions in world politics.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

【Method(s)】

This course consists of three major sections. In the first section, students will learn various analytical tools indispensable for deeply understanding enduring questions of world politics. Students then will utilize those analytical tools to examine the origin and process of major wars during the twenty century, namely World Wars I and II, and the Cold War. In this task, students will be required to give a group presentation. In the final section, students will examine contemporary issues, including rising intrastate conflicts in the post-Cold War era, the roles of international law and organizations, the rise of non-state actors, and the prospects of world order.

Comments for assignments are given during class and office hours.

"Introduction to International Relations" and "World Politics" are best seen as an inseparable pair of courses that will provide students with an overview of the field of IR. For this reason, it is recommended that students wishing to enroll in this course first pass "Introduction to International Relations".

International Security

Takeshi Yuzawa

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 木 3/Thu.3

その他属性 : 〈グ〉〈未〉

[Outline and objectives]

This course covers the approaches to security studies, a sub-discipline of International Relations (IR). Security studies mainly examines the causes of war; the conditions for peace; strategies for avoiding conflict, managing and resolving disputes; and the impact of new technologies, weapons, actors and ideas on states' calculations on whether to use force.

[Goal]

The course objectives are: (1) to enable students to develop a broader understanding of the key theories and concepts in security studies; (2) to examine major security challenges in the international arena through the lens of theories and concepts; (3) to acquire the ability to form their own answers to enduring and contemporary questions inherent in international security studies.

[Which item of the diploma policy will be obtained by taking this class?]
Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

[Method(s)]

This course has two segments: First, presenting major theories and concepts in security studies, necessary for understanding contemporary security policies and issues.

Second, examining contemporary security challenges related to armed conflicts, arms trade and military competition, nuclear proliferation, genocide and mass killings, and terrorism.

Submission of assignments and feedback will be via the Learning Management System.

Foreign Policy Analysis

Takeshi Yuzawa

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 火 4/Tue.4

その他属性 : 〈グ〉

[Outline and objectives]

This course will provide an overview of Foreign Policy Analysis (FPA), examining the processes and actors involved in foreign policy decision-making.

[Goal]

The course objectives are: (1) to enable students to demonstrate an understanding of the processes involved in foreign policy decision-making; (2) to enable students to demonstrate an understanding of the contexts, pressures and constraints with which policy-makers must deal; (3) to enable students to demonstrate their ability to engage in comparative analysis of the foreign policies of major powers.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

[Method(s)]

This course will first examine the key concepts and theories in foreign policy analysis (FPA), which are essential for understanding the contexts, pressures and constraints with which policy-makers must deal. These include the Rational Actor Model, the cognitive and psychological approaches, the bureaucratic politics approaches, the role of history and identity in foreign policy, and other internal-external factors influencing foreign policy decisions. After examining the major approaches in FPA, students will conduct case studies. For this reason, students will be required to give a group presentation based on readings relating to the foreign policies of the major states.

Advanced Topics in American Literature: US Southern Literature

Gregory Khezrnejat

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 3~4
Day/Period : 月 3/Mon.3

その他属性 : 〈グ〉〈優〉

【Outline and objectives】

Southern literature is perhaps the best-known regional literature of the United States, featuring voices, genres, and motifs specific to its distinct tradition. But it is far from a monolith, and the literature of the south reflects the diverse cultures, peoples, and languages of the region. Southern literature has often given a sharp focus to social, historical, and cultural issues of the United States, serving as a grim counterpoint to more optimistic national mythmaking. This course will focus on southern literature in the twentieth century, exploring how writers respond to questions of war, race, memory, class, and modernization.

【Goal】

Students will examine the historical context and major themes of southern literature. Students will also develop critical reading and writing skills.

Modern Japanese Fiction in Translation

Gregory Kheyrnejat

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 3~4

Day/Period : 月 3/Mon.3

その他属性 : 〈グ〉〈優〉

【Outline and objectives】

How do we process the experience of encountering a new language and culture? How does that process in turn affect our own personal language and identity? In this course, we will read translations of personal essays and fiction written in the Japanese language by contemporary authors undergoing such experiences, including Japanese authors living abroad and non-Japanese authors writing in their adopted language. As we compare their stories and observations, we will also consider how the act of writing provides each author with a space to form and perform new cultural identities and personal idioms.

【Goal】

Students will practice reading and writing critically as they explore dynamics of culture, language, and identity in modern Japanese literature.

Race, Class and Gender II: Global Inequalities

Daiki Hiramori

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 3~4

Day/Period : 木 1/Thu.1

その他属性 : 〈グ〉〈優〉〈S〉〈未〉

[Outline and objectives]

This class builds on what students have learned in Race, Class and Gender I to look at how inequalities are inter-connected through examining various global issues. Students will learn to analyze how race, class, gender, and sexuality are connected to each other as intersecting inequalities in a society and the world, and on that basis, consider the possibility of an equal but diverse world.

[Goal]

A major goal is to develop students' sensitivity towards issues of inequality and skills in social analysis and critical thinking. By exploring social issues in an international and global context, students will learn to see how any global issue is multidimensional, and specifically, how inequalities are complex and constituted by the interconnection of race, class, gender, sexuality, and other bases of inequality.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

[Method(s)]

This course will be based on a combination of short lectures by the instructor and student-led class discussions. Verbal and written feedback on assignments is given during class discussions and through using other tools as appropriate. Students are encouraged to visit the instructor during office hours for more personalized feedback.

Cultural Psychology

Takafumi Sawaumi

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 3~4

Day/Period : 金 3/Fri.3

その他属性 : 〈グ〉〈優〉

【Outline and objectives】

This course introduces the perspectives and major research findings of cultural psychology. The course will introduce general theories and perspectives underlying cultural psychology, explore cultural influences on a wide range of psychological processes, including socialization, self-concept, motivation, emotion, and cognition. The course will also explain the mechanisms underlying cultural differences and examine the process of acculturation and biculturalism in an increasingly diverse world. Throughout this course, students will learn how culture shapes the way we think and behave and how we, at the same time, shape these cultures.

【Goal】

One of the aims of this course is to introduce students to the perspectives, research methods, and findings of cultural psychology. Another equally important aim of this course is cultivating students' abilities to understand and deal with variations in psychological processes across cultural and ethnic groups, as well as to gain an understanding of the cultural groundings of their own experiences and actions. By the end of this course, students will be able to demonstrate understanding of how cultural systems influence individuals' psychological processing, including development, self-concepts, motivation, emotion, and cognition. They will also be able to critically engage and analyze cultural products, such as books, films, and advertisements.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

【Method(s)】

Instructional methods include lectures, films, discussion over assigned readings, and small group activities. At the beginning of class, feedback for the previous class is given using some comments from submitted slips and papers.

TESOL IV: Testing and Evaluation

Machiko Kobori

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 3~4

Day/Period : 火 3/Tue.3

その他属性 : <グ>

[Outline and objectives]

This course is for student teachers of English. It explains how to evaluate learners and teachers in L2 education. It encourages students to examine, discuss and assess practices in L2 education. This course focuses on issues in assessing EFL/ESL learners and teachers: it encourages student teachers to reflect on EFL/ESL learning. The course provides opportunities to explore a wide range of ideas with a consideration to make consistency in language education from the primary to secondary levels.

[Goal]

Upon completion of this course, students should be able to demonstrate the following:

1. Explain the core issues in L2 education testing and its integration with ICT.
2. Identify testing components.
3. Design testing materials that match educational objectives.
4. Employ a principled approach to the design, creation and implementation of materials testing and evaluation.
5. Understand what is required to qualify as an English teacher.

[Which item of the diploma policy will be obtained by taking this class?]

Will be able to gain "DP 1", "DP 2", and "DP 4".

[Method(s)]

Student teachers will learn how to create English tests as well as how to integrate ICT with it, and then make presentations. They must create their own English tests. The course finishes with a writing assignment and final examination.

Submission of the final requirements and feedback will be on the learning management systems.

International Relations of the Asia-Pacific

Takeshi Yuzawa

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 3~4
Day/Period : 木 3/Thu.3

その他属性 : 〈グ〉〈優〉

[Outline and objectives]

This course will explore the nature of international relations in the Asia-Pacific. It will mainly examine and discuss the following: (1) factors for stability and peace in the Asia-Pacific region after the end of the Cold War; (2) roles for the great powers in the region: the United States, China, and Japan; (3) problems and prospects for regional security and economic cooperation; (4) the evolution of regional institutions; (5) the prospects for regional order.

[Goal]

The course objectives are: (1) to develop students' ability to effectively use IR theories to analyze and explain developments in regional affairs; (2) to enable students to analyze the foreign policies of the major powers and selected regional countries; (3) to enable students to assess the developments of regional institutions; (4) to enable students to examine and assess the status and prospects for regional order.

[Which item of the diploma policy will be obtained by taking this class?]
Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

[Method(s)]

This course is composed of twelve lectures. In each class, a background lecture on a pre-selected topic will be provided to students. After a lecture, there will be a discussion. While the lectures will provide an overview of the topics in question, the discussions will give students an opportunity to examine policies in more depth. Comments for assignments are given during class and office hours.

Race, Class and Gender I: Concepts & Issues

Daiki Hiramori

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 1/Tue.1

その他属性 : 〈グ〉〈ダ〉〈未〉

【Outline and objectives】

This class sees our society through the lens of race, class and gender to understand how privilege and inequality are produced, maintained, naturalized and challenged. The course will look at how various inequalities are connected to one another through examining global, national and local issues. Students will learn to analyze how race, class, gender, and sexuality are connected to each other as intersecting inequalities in a society and the world, and on that basis, consider the possibility of an equal but diverse world.

【Goal】

Through lectures, discussion and written assignments, students will learn concepts and theories to analyze how race, class, gender and sexuality affect individuals and society. They will learn to apply these analytical tools and knowledge to form critical opinions on current issues related to various bases of inequalities. Students will acquire skills in critical thinking, analysis and writing that can be applied in other academic fields as well as future careers.

【Which item of the diploma policy will be obtained by taking this class?】
Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

This course will be based on a combination of short lectures by the instructor and student-led class discussions. Verbal and written feedback on assignments is given during class discussions and through using other tools as appropriate. Students are encouraged to visit the instructor during office hours for more personalized feedback.

【Work to be done outside of class (preparation, etc.)】

Students are expected to complete the weekly readings and prepare for class discussion. Please note that the assigned readings for this course tend to be dense. As such, I recommend giving yourself ample time to complete them, even if the number of pages assigned at any given time appears small. Preparatory study and review time for this class are 2 hours each.

【Textbooks】

No textbook will be used. All readings will be provided by the instructor.

【Changes following student comments】

Students have generally evaluated the class positively. The instructor will be attentive to student feedback and adjust workload and class material, when necessary.

【Equipment student needs to prepare】

None. Students are encouraged to use computers/tablets for class-related purposes in class.

【Others】

Students are strongly encouraged to take Race, Class and Gender II after completing Race, Class, Gender I. Students who have passed Race, Class and Gender I will be given admission priority to the seminar “Intersectionality: Multiple Inequalities.”

【Prerequisite】

Students who intend to enroll in this course are expected to have passed “Introduction to Sociology.”

LIN200ZA

Sociolinguistics

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 2~4
Day/Period : 火 2/Tue.2

その他属性 : 〈グ〉

【Outline and objectives】

This course provides students with a basic knowledge of sociolinguistics, the study of language in relation to society. The first part of the course is concerned with how individual language use is correlated with a variety of social variables, such as gender, age, class and ethnicity, by outlining a number of previous studies conducted in the English-speaking world. Particular reference is made to the classic research of William Labov, one of the founding figures of quantitative sociolinguistics.

Later lectures focus on how and where a language or dialect is socially placed and ranked within a community, including multi-lingual/dialectal countries such as Singapore. Students who are or are becoming bilingual will find the discussion on bilingualism especially interesting when they learn that its implications not merely vary from one society to another, but have been significantly changing recently. Another major topic is language attitudes. They are not based on purely linguistic considerations, but connected with how people perceive and evaluate different dialects or accents.

【Goal】

By the end of the course, students will:

- (1) understand key terminology, concepts and theories in sociolinguistics,
- (2) have an awareness of ongoing language changes in society, and
- (3) become familiar with interpreting quantitative/qualitative data for sociolinguistic analysis.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【Method(s)】

This course is a combination of lectures and class discussions. Based on a flipped learning model, students have to read chapter handouts and address questions asked there prior to attending each lecture. Submitted assignments and tests are reviewed in detail and commented on in the following week’s lecture.

Credit(s) : 2 | Semester : 春学期授業/Spring | Year : 2~4

Day/Period : 木 3/Thu.3

その他属性 : 〈グ〉〈未〉

【Outline and objectives】

This course covers the approaches to security studies, a sub-discipline of International Relations (IR). Security studies mainly examines the causes of war; the conditions for peace; strategies for avoiding conflict, managing and resolving disputes; and the impact of new technologies, weapons, actors and ideas on states' calculations on whether to use force.

【Goal】

The course objectives are: (1) to enable students to develop a broader understanding of the key theories and concepts in security studies; (2) to examine major security challenges in the international arena through the lens of theories and concepts; (3) to acquire the ability to form their own answers to enduring and contemporary questions inherent in international security studies.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

【Method(s)】

This course has two segments: First, presenting major theories and concepts in security studies, necessary for understanding contemporary security policies and issues.

Second, examining contemporary security challenges related to armed conflicts, arms trade and military competition, nuclear proliferation, genocide and mass killings, and terrorism.

Submission of assignments and feedback will be via the Learning Management System.

 毎年・隔年： | 科目主催学部：GIS
 備考（履修条件等）：
 その他属性：〈グ〉〈ダ〉

【授業の概要と目的（何を学ぶか）】

This class builds on what students have learned in Race, Class and Gender I to look at how inequalities are inter-connected through examining various global issues. Students will learn to analyze how race, class, gender, and sexuality are connected to each other as intersecting inequalities in a society and the world, and on that basis, consider the possibility of an equal but diverse world.

【到達目標】

A major goal is to develop students' sensitivity towards issues of inequality and skills in social analysis and critical thinking. By exploring social issues in an international and global context, students will learn to see how any global issue is multidimensional, and specifically, how inequalities are complex and constituted by the interconnection of race, class, gender, sexuality, and other bases of inequality.

【授業時間外の学習（準備学習・復習・宿題等）】

Students are expected to complete the weekly readings and prepare for class discussion. Please note that the assigned readings for this course tend to be dense. As such, I recommend giving yourself ample time to complete them, even if the number of pages assigned at any given time appears small. Preparatory study and review time for this class are 2 hours each.

【テキスト（教科書）】

No textbook will be used. All readings will be provided by the instructor.

【参考書】

Further reference may be provided based on students' areas of interest.

【成績評価の方法と基準】

Participation: 10%
 Discussion facilitation: 20%
 Weekly reading responses: 40%
 Final paper: 30%

【学生の意見等からの気づき】

Students have generally evaluated the class positively. The instructor will be attentive to student feedback and adjust workload and class material, when necessary.

【学生が準備すべき機器他】

None. Students are encouraged to use computers/tablets for class-related purposes in class.

【Prerequisite】

To take this class, students are expected to have passed "Race, Class and Gender I."

International Relations of the Asia-Pacific

Takeshi Yuzawa

Credit(s) : 2 | Semester : 秋学期授業/Fall | Year : 3~4
Day/Period : 木 3/Thu.3

その他属性 : 〈ゲ〉

【Outline and objectives】

This course will explore the nature of international relations in the Asia-Pacific. It will mainly examine and discuss the following: (1) factors for stability and peace in the Asia-Pacific region after the end of the Cold War; (2) roles for the great powers in the region: the United States, China, and Japan; (3) problems and prospects for regional security and economic cooperation; (4) the evolution of regional institutions; (5) the prospects for regional order.

【Goal】

The course objectives are: (1) to develop students' ability to effectively use IR theories to analyze and explain developments in regional affairs; (2) to enable students to analyze the foreign policies of the major powers and selected regional countries; (3) to enable students to assess the developments of regional institutions; (4) to enable students to examine and assess the status and prospects for regional order.

【Which item of the diploma policy will be obtained by taking this class?】

Will be able to gain "DP 1", "DP 2", "DP 3", and "DP 4".

【Method(s)】

This course is composed of twelve lectures. In each class, a background lecture on a pre-selected topic will be provided to students. After a lecture, there will be a discussion. While the lectures will provide an overview of the topics in question, the discussions will give students an opportunity to examine policies in more depth.

Comments for assignments are given during class and office hours.

【Work to be done outside of class (preparation, etc.)】

Students are required to have pored over assigned readings before attending the lectures. Preparatory study and review time for this class are 2 hours each.

【Textbooks】

There is no assigned textbook for this course. Students are required to read the journal articles and the book chapters specified in the reading list.

【授業の概要と目的（何を学ぶか）】

The objectives of this first-year course are (1) to prepare students for their study of global economics and social sciences and (2) to help them to adapt to their new life at a Japanese university. Over the course of the semester, they will be able to improve their practical and academic skills by preparing an academic presentation and writing a short report.

【到達目標】

Goals: (1) build their academic and critical thinking skills through assigned readings and discussion and (2) acquire essential knowledge of the global economy and social sciences through discussions with guest lecturers.

Evaluation: Grades will be assigned based on the student's performance in class (active participation) and assignments (presentations and report).

【授業の概要と目的（何を学ぶか）】

This course provides a very broad overview of mathematics that will be useful for any economist or social scientist. Classes will be discussion based, with the opportunity for all students to become involved and express their opinion on mathematical topics. Technical skills will also be taught, and regular assignments will provide an opportunity to practice and gain a solid understanding of subtle issues.

【到達目標】

Empowerment and understanding are key words for this course. You will learn to see how mathematics relates to economics, and be able to confidently contribute to workplace discussions involving mathematics

【授業の概要と目的（何を学ぶか）】

In this semester, students deepen their skills of use of computers through computer programming. This course provides the fundamental concepts of computing through programming practice in Java or Python programming language.

【到達目標】

Taking this course, the students can understand what a given computer program does and can construct programs for various problems. Also, the students can comprehend what is Object-Oriented Programming, and can construct Java or Python programs in object-oriented fashion.

The students are not expected any previous computer programming experiences. Basic understanding of PC is just enough.

The primary approach of this course will be active learning. Students are expected to solve programming exercises at their own pace. Every lecture gives a new programming construct. Therefore, students are expected to attend every class. If you skip a class, you have to self-study for that skipped class. There will be homework assignments. Homework assignments are to be submitted in Hoppii system. General comments regarding the homework submissions will be made in class.

Assignments are given from time to time. Students are expected to submit all of them. Please keep the deadlines.

The instructor and the students will discuss which programming language should be used in the first class through discussion.

The instructor has no office hour. Please ask question during or after classes. You can also ask question by e-mail.

回	テーマ	内容
1	Introduction to programming	The relationship between Java or Python programs and computers Let's learn about hardware and software that constitute a computer, and its relationship with programs. Selection of the programming language must be done in the class. Eclipse installation is included.
2	Compile and execution	We have to translate a program written by people to a program understood by computers. Let's learn how to do through Eclipse programming environment.

3	Variables and assignments	Let's learn the relationship between variables and memory regions, and how to set a value in such a region.
4	Input and output (1)	Let's learn how a program interact with outside.
5	Input and output (2) and exceptions.	Let's learn how a program accepts values from outside. We have to deal with unexpected values.
6	Basic calculations and type conversion	Computers are calculating machine. Let's make them compute!
7	Program structure (1) (how to express conditional branches)	Let's learn how to control the computation sequence in a program.
8	Program structure (2) (more about conditional branches)	Let's learn how to select one execution sequence from many options.
9	Program structure (3) (repetition)	Let's make a program repeat as many as we want.
10	String and repetition	Let's deepen our understanding about the repetition constructs.
11	One-dimensional array and two-dimensional array	We can store many data in arrays. Let's learn how to create and use them. We can construct matrix-like data structures in a program by using two dimensional arrays.
12	Simple statistics	Let's construct an application program for statistics by using what we learn so far.
13	Class and constructors (a little about object-oriented programming)	In Java programs, we create a program by instantiating classes. To do so, we have to use special methods constructors. Let's learn them by storing statistical objects into an array.
14	Summary	Please complete the object-oriented statistic program.

【授業時間外の学習（準備学習・復習・宿題等）】

No preliminary preparation for the class is required. The standard preparation and review time for this class is 2 hours each.

【テキスト（教科書）】

Textbooks will be announced in the class. The instructor tries to let student not buy a textbook.

【参考書】

References will be provided as appropriate.

【成績評価の方法と基準】

Regular assignments (50%) and two major projects (50%).

【学生の意見等からの気づき】

If you have already had programming experience by other programming languages such as C, please report. The instructor is willing to cope with such people.

【学生が準備すべき機器他】

It will be useful if students can bring their own laptop computer to class.

【その他の重要事項】

We use Eclipse programming environment that is free to download and to use. The students are encouraged to install Eclipse and perform their assignments at home.

【授業の概要と目的（何を学ぶか）】

This course is an introduction to econometrics for the IGESS students who major or minor in economics. Econometrics is a set of research tools employed in a wide range of disciplines. Most economists do empirical research for their professional service. We rigorously study three fundamental components of econometrics: they are estimation, hypothesis test, and prediction.

【到達目標】

Students will learn estimation, hypothesis test, and prediction.

【授業の進め方と方法】

All classes for this course will be comprised of lectures and group discussions. There are two homework assignments, that have to be completed in writing on report pads and submitted by the due dates. I will post the answer keys for the homework assignments right after the due dates, and please review them on your own.

【授業の概要と目的（何を学ぶか）】

The purpose of this course is to offer students a practical approach (interactive lectures, fieldwork, problem-solving sessions, etc.) to the study of SDGs. Students will have opportunities to learn from specialists working to achieve SDGs and evaluate the impact of their activities on Japanese business and society.

【到達目標】

- (1) To provide students with a practical, experience-based approach to the study of Japanese business, corporate social responsibility, entrepreneurship, and sustainability.
- (2) To develop their analytical skills through interactive lectures, group discussions, and fieldwork.
- (3) To prepare them to enter the workforce by providing them with opportunities to improve their professional skills.

SCHEDULE: Because the course includes one full-day field trip, it will meet 10 rather than 14 times. The field trip will take place on a Saturday in late November or early December for which participation is mandatory. Transportation by bus to/from the fieldwork venue, and lunch will be fully covered by the university. A course schedule will be provided on the first day of class.

SELECTION: On the first day of class, 20 students will be selected to enroll. The selection process will be based on motivation and enthusiasm, academic interests, and career aspirations. As the course will be conducted in English, students should have an excellent command of English. They should also be able to write a final report in the proper academic style.

【Outline (in English)】

Outline and objectives:

The purpose of this course is to offer students a practical approach (interactive lectures, fieldwork, problem-solving sessions, etc.) to the study of SDGs. Students will have opportunities to learn from specialists working to achieve SDGs and evaluate the impact of their activities on Japanese business and society.

Learning activities outside of classroom: Students should prepare for class (doing reading assignments, preparing presentations, discussing with their group members, etc.) and conduct fieldwork outside of class.

Grading Criteria /Policy:

Participation and assignments: 40%

Final report and presentation: 60%

As the courses is based on active/experiential learning, asking questions and making comments during all the interviews and field work is a requirement!

回	テーマ	内容
Class 1	Place-site-origin part 1	With the help of an analysis tool, students will give a presentation about their hometown and neighborhood. They will share their impressions of a remarkable building or space.
Class 2	Place-site-origin part 2	-
Class 3	Graphic representation part 1	Learn about the different graphic representations used by architects. Following on from Class 1, students will be asked to choose a building from an architect they are interested in and prepare or research graphic representations, including sketches, diagrams, axonometric views, perspectives, site plans, floor plans, sections, and details. One of the representations students need to create should illustrate a key feature of the building, and students will elaborate on their building choice.
Class 4	Graphic representation part 2	-
Class 5	Contemporary architecture part 1	Expanding on the previous class teachings, students will present a project from a selected list of architects. The project could be a building or a space. The students will need to explain why they chose the particular project, discuss the architectural style, and analyze the design features.
Class 6	Contemporary architecture part 2	-
Class 7	City roaming part 1	From a pre-selected route, students will share their impressions and feelings about the spaces they cross, using photographs or other visual aids to illustrate key moments.
Class 8	City roaming part 2	-

Class 9 Micro Architecture part 1

Students will be asked to find a micro-building that has been created in a leftover space within the city. They will need to prepare a PowerPoint presentation that includes photographs, a simple site plan (a hand sketch is acceptable), and an explanation of the building's particular features.

Class 10 Micro Architecture part 2

-

Class 11 Habitat part 1

After discussing the definition of habitat, students will search and investigate examples of housing that challenge the stereotype of the house. They will need to present at least two projects of housing (either single or collective) and explain how and why they reassess the concept of habitat.

Class 12 Habitat part 2

-

Class 13 Architecture and Literature part 1

Students will be given a short text (in English) from a prominent writer and poet. After reading the text at home, it will be discussed in class, and students will identify a clear program to use for the second part of the class. Using the previous class teachings, students will present their architectural translation of the text. Evaluation will be based on the quality of the presentation, the visuals, and the consistency of the approach.

Class 14 Architecture and Literature part 2

【授業の概要と目的（何を学ぶか）】

People often think that "philosophy" is quite an old subject – and very difficult, unfortunately. It is true that so-called "philosophical questions" have been discussed in rather complicated and often confusing manners since many years ago, for example, by Socrates and Aristotle in the ancient Greek period. But many philosophers strongly believe that these questions are closely related to our everyday life issues. We are surrounded by many philosophical issues, though we may not always be aware of their philosophical significance; that is, philosophical issues are basically our everyday issues. But how are they related to our life?

In this course, you will discuss various philosophical topics, their in-depth meanings, and their philosophical significance, trying to find their very relevance to our life. That may help you see your surroundings, your society and the world in quite exciting and interesting ways. Out of many philosophical issues found in our daily life, we will choose 13 topics and discuss them in class.

【到達目標】

This course provides a broad introduction to philosophical ways of thinking. The course is open to students from any disciplines, who hope to:

(1) understand some of the most fundamental philosophical topics (for instance: freedom, truth, and moral rightness / wrongness),

(2) be able to explain the issues in very simple everyday terms, and

(3) apply philosophical ways of thinking (reasoning) on every-day issues.

【授業の進め方と方法】

Basic course requirements:

- * No previous philosophy courses required.
- * Intellectual curiosity: Keen eyes on everyday-life facts and issues.
- * Respectful attitude of others' opinions.

On enrollment:

The student enrollment in this course is limited to 20, and you will be admitted on a first-come and first-served basis. So, if you wish to take this course, you need to take an immediate action and do the following:

(1) You have to send me an e-mail (to the address below) expressing your intention to enroll:

yasushi.ishida.85@hosei.ac.jp

(2) When you are accepted to the class, you will receive a note (e-mail) of confirmation. If the class is already filled, you will be put on the waiting list in the order of application.

(3) Those who have received my note of confirmation can go through a procedure of 本登録.

(4) **[Important] Do not fail to notify me, in case you decide to cancel your enrolment.** 授業を取らないと決めた場合は、必ず連絡をすること。そうしないと、ウェイティング・リストに載っている他の学生が登録できません。

・ Those who are put on the waiting list can register, ONLY IF we have some vacancies in the enrollment AND the registration is still possible (that is, it is still in the registration period).

・ You will be accepted on a first-come and first-served basis. Equally importantly, I urge you to attend the first and/or second meeting. **In case you fail to attend both of them, that will affect your final grade (10%); if you have legitimate or good reason to miss the meetings, do not fail to contact me by e-mail.**

Organization of the class:

▶ Each class will consist of (less than)100-minutes of **lecture and discussion**. The class will be conducted in English.

▶ I appreciate interaction and exchange with you in class. So, please make best efforts to express your ideas, even if you find it very difficult to do so. I would NOT penalize you for making mistakes; you ARE entitled to make mistakes in class!

▶ At this moment, I am planning to hold most of the class meetings **online (by using Zoom; please make sure you have the application ready in your computer along with necessary devices.)**, and we will meet a few times on campus (i.e., face-to-face or in-person meetings). I will make announcement regarding when we will meet on campus.

◎ On the Zoom meetings:

・ I will post the "Zoom Link," "授業参加用ミーティング ID" and "パスコード" on 学習支援システム or e-mail you the information by Wednesdays (the day before the class). You will have to sign in with your own Hosei University e-mail address and password.

・ Your attendance will be recorded automatically, but I may take attendance.

・ **In case someone comes in one of the online classes to do any disturbing acts (which is often called Zoom-Bombing), I will terminate the meeting immediately. And I will report to the University.** I will then post in 学習支援システム what you will have to do.

回	テーマ	内容
1	Guidance	Explaining the course
2	Lying	Is lying always wrong?
3	Morality	What does it mean to be "morally right"?
4	Relativism	Is everything relative?
5	Freedom	Are we completely free?
6	Culture vs. Nature	How different are they?
7	Culture vs. Nature	The idea of enhancement
8	Love	What is it?: Just a perception?
9	Perception	What do we perceive?: Is it so accurate?
10	Knowledge vs. Beliefs	What do we know?: How do we know it is true?
11	Truth, Reality	What is really true?: Truth, Reality, Dream
12	Robots and Humans (Mind)	Is the Mind just the Brain? (Your "essay plan" must be submitted by the 12th meeting)
13	Language	What does it do?: What's its role?
14	Wrap-up: The Meaning of Life	Concluding remarks (Your "essay plan" will be returned)

【授業時間外の学習（準備学習・復習・宿題等）】

・ I recommend that you review what you have learned in each meeting.

・ You are normally expected to spend about two hours for the preparation and review for each class.

· **You will have to submit your paper topic (“essay plan”) by the 12th class meeting.**

【テキスト (教科書)】

· There will be no specific textbooks assigned.
· Occasionally, reading materials may be assigned and handouts will be given in class.

【参考書】

No specific books assigned. But looking into any (**large size**) philosophy dictionaries will be of great help.

【成績評価の方法と基準】

I will assess your grade based on the way you participate in the class discussions and on your final project.

Attitude/ Participation: 50% of course grade

Final Project (a paper): 50% of course grade

*Attitude/ Participation:

I appreciate your participation in class and would like to know your ideas and opinions. I will hence consider your participation as part of your grade.

*Final Project:

At the end of the semester, you are expected to submit a short paper (of 700 to 1000 words) on the topic that you choose, explaining your ideas or insights. Your topic should be related to the issues studied or discussed in class. I will give you a specific Guideline before the end of semester.

▶ **Near the end of the semester, you will have to submit your "essay plan," which should include the title (topic) of your paper and your (tentative) conclusion described in a short paragraph (of about 200 words): Note that it is NOT a draft of your final paper. You will receive my comments on your paper plan, and then your "plan" should be re-organized or revised accordingly.**

▶ In writing your paper, you can expand your ideas by citing or referring to books and other documents, including materials from websites. In that case, **you MUST explicitly show the sources or reference either in the footnotes or endnotes.** (Do NOT cite or refer to **Wikipedia** in your paper. If you do so, you will receive a “D” grade.)

▶ Plagiarism: If you copy sentences from any existing documents (again, including any writings from websites) without showing sources or reference, you will receive a "D" grade. It is important that you present **your own view** or insights, not the same ideas as described or explained in published or preexisting documents or on websites.

▶ You have to submit your paper (essay) on the web system (Class Support System, 授業支援システム). The due date will be announced near the end of the semester.

Based on the grading criteria set by the instructor, students that successfully achieve 60% or more of course goals will be able to earn a passing grade for the course.

【学生の意見等からの気づき】

In previous semesters, I received several comments from students: for instance, "having discussions in class was very hard at the beginning, but it helped me improve my English speaking skills and express myself logically. Eventually, I found it quite exciting and stimulating."

【その他の重要事項】

· << **Please Read; Very Important** >>

Most of us already have a general or intuitive understanding of many basic philosophical issues. The key to understanding these issues is, however, being able to **critically evaluate these issues from a number of different perspectives**, and these are neither obvious nor easy to apply. In studying philosophy, often you have to “get out of” your own perspective. *Philosophy* is different from **a philosophy**. Philosophy is the discipline that comprises logic, metaphysics, ethics, epistemology, and so on; a philosophy is a system of beliefs, concepts, or attitude of an individual or group, or a view about a sphere of activity or thought. Everyone has a philosophy of some sort or other even if s/he has never read a book in philosophy. **An individual's philosophy or a group's philosophy can be a subject for examination and discussion, and can be challenged within the discipline of philosophy. Studying philosophy may affect your own philosophy and thus may make you feel uneasy.**

And since thinking philosophically is an acquired skill, like many other skills it has to be practiced regularly and well. **It is important that you make adequate time each week to prepare for the class and write your "reaction paper" s to the best of your ability.**

· I urge you to attend the first and/or second meeting. **In case you fail to attend both of them, that will affect your final grade (10%); if you have legitimate or good reason to miss the meetings, do not fail to contact me by e-mail.**

· As I appreciate interaction and exchange with you in class, I would like to know what you think and have your feedback. So, I strongly advise that you attend all the classes and participate in the discussions.

【授業の概要と目的 (何を学ぶか)】

Religion is often associated with violent conflicts and wars, but how exactly does religion contribute to conflicts? Does it also play a part in building peace and reconciliation? This course focuses on the aspects of conflicts and peace in religion, exploring general theories as well as examining individual case studies such as Western Europe, African Americans, and the Russo-Ukrainian War. After reviewing such cases, we will also review religion's roles in Japanese society, focusing on its potential to bring conflicts and peace.

【到達目標】

Upon successful completion, students will:

- Understand the roles of religion in conflict and peace
- Acquire knowledge of conflicts with religious aspects around the world
- Broaden their view of religion in general

【授業の概要と目的（何を学ぶか）】

English Application is an integrated 4-language skill communication course with a focus on an English for Academic Purposes (EAP) or English for Specific Purposes (ESP) content area. This course will examine certain cultural phenomena that impact our lives. Emphasis throughout this course will be on the notion of 'possibility' – the exercise of looking beyond mere appearance. The notion of 'possibility' will be used to explore three major themes – art, rebellion, and market advertising. Each theme will be explored through short authentic readings, visual material, and music CDs, all of which will be used to set the groundwork for group discussions and an exchange of viewpoints.

【到達目標】

The goal of English Application is to give Post-SA students a forum to continue to use and enhance their English Communication skills. This course is designed to improve students' critical thinking ability by challenging their belief systems while examining three cultural phenomena – art, rebellion and advertising.

Each theme will be explored through short authentic readings, visual material, and music CDs, all of which will be used to set the groundwork for group discussions and an exchange of viewpoints.

【到達目標】

The goal of English Application is to give Post-SA students a forum to continue to use and enhance their English Communication skills. This course is designed to improve students' critical thinking ability by challenging their belief systems while examining three cultural phenomena – art, rebellion and advertising.

Emphasis throughout this course will be on the notion of 'possibility' – the exercise of looking beyond mere surface appearance. We will use this notion of 'possibility' to explore three major themes – art, rebellion, and market advertising. Each theme will be explored through short authentic readings, visual material, and music CDs, all of which will be used to set the groundwork for group discussions and an exchange of viewpoints. Students will receive feedback and comments on homework assignments and in class activities throughout the term.

【授業の概要と目的（何を学ぶか）】

In this course, we will analyze how gender and sexuality issues manifest throughout culture in Japan. Why do we need to discuss gender and sexuality in relation to Japanese contemporary culture? Who do we talk about when we discuss such issues? We will approach these questions from different perspectives and disciplines, such as history, literature, media, etc. While the main focus of this course is the representation of gender and sexuality in contemporary Japanese society, we will also address these issues in a global context.

【到達目標】

1. To become familiar with historical sources and social and political elements in regard to the construction of gender within contemporary Japanese society.
2. To develop critical thinking strategies and apply them in order to understand how gender and sexuality are represented within contemporary Japanese media.
3. To incorporate a gender perspective while participating in academic discussions, presenting on a selected topic, and writing analytical papers.

【授業の概要と目的（何を学ぶか）】

The Culture, Language, and Thought of the English-Speaking World is the product of many historical interactions between a variety of peoples with different ways of thinking and living in the world. To understand many aspects of the societies in the modern English-Speaking World, one must first recognize the historical forces that shaped them and brought them about.

【到達目標】

The primary goal of this course is to give students the basic knowledge necessary to understand: 1) how societies and cultures change in general and 2) how the cultures of the English-Speaking World developed their unique forms. Using the framework of cultural change, we will examine the formation of “Western” religious and political institutions that developed before 1500 CE in order to better appreciate the roots of “Western” social, political, and economic thought. Building on this foundation, the evolution of modern social systems and political-economic thought that occurred in the English-Speaking World after 1500 CE will be discussed.

【授業の進め方と方法】

When the university's Action Policy (Conduct Guideline) Level is 2, this class will be conducted online in principle. Details will be communicated via the Learning Managing System.

The course will start out by outlining the forces behind cultural change. This will be followed by a series of lectures discussing the development of European political and religious institutions following the Ancient Greco-Roman era. We will then attempt to analyze Britain's rather unique political & economic institutions at the beginning of the modern era as a product of cultural change. Building on this foundation, the cultural changes, i.e., the changes in thought, caused by the Protestant Reformation and Enlightenment Philosophy will be examined and their impact on the development of British and American Political-Economic Systems through the 19th and 20th Centuries will be discussed. Students will receive feedback and comments on homework assignments and in class activities throughout the term.

【授業の概要と目的（何を学ぶか）】

The aim of this course is to consider structural aspects of the English language, which has become the de facto 'global' language. Towards the end of this course, students will be able to attain the following goals indicated below.

【到達目標】

1. To get a general idea about how English sounds and grammatical phenomena are described.
2. To obtain a certain level of knowledge about how various structural aspects of modern English SHOULD be described.
3. To obtain enough knowledge about modern English so as to answer various questions about the alleged 'mysteries' of the English language.
4. To study English in its general sense. (You see, you all finished your SA programmes, so you should keep that level of English until graduation.)

The following is the list of important topics (among others) to be covered in this course:

- a) articulatory organs and phonetic symbols,
- b) the notion of phoneme (introduction to structural linguistics),
- c) modular approach to linguistics,
- d) various units in linguistic description,
- e) syntactic categories (parts of speech),
- f) intermediate constituency, phrase structural analysis

Class sessions are going to be held online. The basic schedule remains the same; however, schedule change, if any, will be notified by using the Learning Management System (LMS). The details of the methods will be provided by using the LMS by several days prior to the first class session.

Actual class sessions are all based on the Powerpoint slides (about 200 slides in all!) all prepared beforehand. So, in order to make the most of them you should:

- download and print out the slides and skim over them;
- attend the class w/the printed-out slides, concentrate on the contents of the lecture, and take as many notes as you can;
- visit the LMS site, and check the comments made by the instructor; and
- read the books/articles mentioned on the LMS site for further comprehension.

Should you have any trouble in taking realtime online class session, you can get access to the recorded educational material. Please check the LMS site for details.

【授業時間外の学習（準備学習・復習・宿題等）】

Students are expected to visit the relevant H'etudes site and get as much information as needed.

Admittedly, this is not an easy course with all those unfamiliar terms and concepts. So, it is strongly recommended to read the relevant materials suggested on the LMS site posted immediately after each class session by the instructor.

Approximately two hours of preparation and reviewing are necessary for this course.

【テキスト（教科書）】

There are no particular textbooks for this course.

【参考書】

Suggested reading materials to enhance students' comprehension will be mentioned through H'etudes in due course. However, the following (all written in Japanese) are recommendable prior to the opening of the course:

- 加島祥造 (1976). 『英語の辞書の話』. 東京：講談社 [のちに講談社学術文庫に収載.]
- 中島文雄 (1991). 『英語学とは何か』. 東京：講談社 [講談社学術文庫].
- 田中菊雄 (1992). 『英語研究者のために』. 東京：講談社 [講談社学術文庫].
- 竹林滋 (1991). 『英語発音に強くなる』. 東京：岩波書店 [岩波ジュニア新書].

【成績評価の方法と基準】

- Please note that attendance is taken for granted. However, if you miss a class, the following rule is applied: 1 demerit for each class missed. 3 demerits = -10% on your grade (roughly one letter grade). 5 demerits = failure for the course.

- The Final exam scheduled on the day of the final class session is very important, literally determining your grade. Please see my message on the LMS site for more information.

Any modification to the above shall be known to you by using LMS. Based on the grading criteria set by the instructor, students that successfully achieve 60% or more of course goals will be able to earn a passing grade for the course.

【学生が準備すべき機器他】

Personal computers, good English dictionaries, etc.

【その他の重要事項】

This is just a half-year (semestral) course about the structural aspects of modern English, which is in many ways similar to 'Intro to English Linguistics' you see in English major's curriculum; only, the speed is much faster! Therefore, the contents covered should be rather selective in nature. Students are highly encouraged to study various matters not treated in class sessions.

Also, as is shown in Goals above, always having a strong interest in English per se is important. So, please study English hard and try to develop a 'feel' for the language.

● Though this course is categorised as 'online', some of the class sessions may be held as 'face-to-face'. So, please make out your class schedule accordingly.

【カリキュラム上の位置づけ】

Open for the third- and fourth-year FIC students (many of them probably being the SA-English students). Also open for non-FIC students. Appropriate for those who have strong interest in the English language and/or language studies in general.

【授業の概要と目的（何を学ぶか）】

This course is designed for students who are interested in learning about the production of historical narratives on different scales: national, global, and in particular, transnational. By exploring various kinds of cross-cultural encounters facilitated by the movement of people, ideas, goods, services, capital, and technology in the Americas and Asia-Pacific regions, students will be introduced to the basic concepts and methods of transnational history. Students will discuss how diverse approaches to transnational history are connected to the issues of colonialism, the development of capitalism, and the formation and spread of the nation-state, thus ultimately to the idea of modernity.

* This syllabus can be updated.

【到達目標】

By the end of this course, students will be able to

- To understand critically and broadly the concepts of and methods to national, global, and transnational histories and modernity.
- To historicize seemingly universal ideas.
- To express their own opinions by analyzing both primary and secondary sources as evidence.
- To acquire knowledge and skills beyond class contents.

【Outline and objectives】

This course is designed to be an overview of contemporary Japanese society, with a focus on the issues surrounding diversity and social sustainability. Throughout the term, we explore how we can understand Japanese society, by using various sociological concepts and making international comparisons. By engaging with critical issues in contemporary Japan, we will explore the ways in which the society can achieve a sustainable system and culture both within the country as well as a member of the international community.

【Goal】

Through this class, you will be expected to critically engage with both scholarly discussions as well as media portraits on Japanese culture and society, and demonstrate your understanding through your assignments, individual project, and participation in class.

【Outline and objectives】

Sociology of Gender and Families

The family is one of the most important social institutions that everyone in society is familiar with. Because of the familiarity, however, we often lack critical perspectives on the issues pertaining to the family. We will challenge typically taken-for-granted notions of the family by considering it from a sociological point of view. We will do so by highlighting the ways in which gender plays a critical role in shaping our experiences, identity, as well as relationship to others.

【Goal】

While focusing on families in contemporary Japan, this course will take a historical and comparative perspective to highlight diversity and transformation of families, both within and outside Japan. By investigating both public policies and private dynamics, we aim to deepen our understanding of, and gain critical perspectives on the family.

Upon successful completion of the course, students will be able to:

1. identify and critically engage with social issues pertaining to the family and gender;
2. understand the connection between individual experiences in family and broader socio-historical contexts; and
3. discuss issues surrounding the family and gender with a comparative perspective.

[Outline and objectives]

This course explores social issues with sociological approaches. It introduces students to some major social theories and concepts in sociology. Topics include a review of sociology as a discipline, culture, socialization, social interaction, education, social stratification, networks, work, economic life, body and health, urbanization, population, environment, and globalization. It is a theory-oriented course. However, it addresses empirical questions such as (1) What is society? (2) How is society organized and structured? (3) Who are individuals and their roles in society? (4) How do individuals and society affect each other? and (5) What does sustainability mean to our contemporary and future human society? The goal of this course is to provide students with conceptual tools for understanding society, thereby some inspirations of how individuals can live a happy and meaning life and contribute to a sustainable world.

[Goal]

By emphasizing reading, discussing, and critical thinking skills, this course helps students build the foundation for a deeper understanding of theory and methods in the social sciences. Upon completion of this course, students will be empowered an eye to consider what happens in daily life with evidence-based reasoning. This course is designed to inspire students to think with their own talents, interests, and passion. Students have plenty of time expressing their own opinions and exchanging ideas with peers and instructor in each class.

[Outline and objectives]

Balancing economic activity and the environment is essential in achieving a sustainable world. Countries around the globe have implemented various types of environmental regulations in order to reduce emission of pollutants. This course will focus on the Japanese experience in reducing various types of pollutants from the environmental economics perspective.

[Goal]

The goal of this course is 1) to understand the economic theory behind the policies implemented, 2) study the economic efficiency of these policies, and 3) conceptualize policies that could have been economically efficient and could be used in developing countries.

By taking this course, students will be able to explain environmental economic theory and the economic efficiency of policies implemented in Japan. In addition, each individual will be able to come up with ideas on how to reduce emissions from developing countries based on the Japanese experience.

【Outline and objectives】

This is a course on "International Development" and "Development Assistance". Development is one of the global issues in the current world as shown in the Sustainable Development Goals (SDGs). International Development Assistance has been perceived not only as an efficient tool for development of many societies and/or economies but also as a way to strengthen world peace. This class focuses on the history and the objectives of international development efforts and relationship between rich countries and poor countries putting special emphasis on Japan's role in the international society.

【Goal】

Completing the course, students are expected;

- 1) to better understand poverty and inequality in the current globalized world,
- 2) to acquire basic knowledge on international development efforts,
- 3) to understand each actor's role and responsibility in development efforts, and 4) to have an idea for more equal world structure.

【Which item of the diploma policy will be obtained by taking this class?】

【Method(s)】

Feedback on assignments submitted by students will be provided in class or through the Learning Management System. Classes consist of lectures and discussion. Students presentation based on assigned reading will be included. As the class will be held in seminar style, active contribution from students are expected.

However, methods will depend on the Covid-19 status. The class may be delivered on-line basis either as live session or on-demand session. Details will be notified in the Hoppii (Learning Support System) at the beginning of the spring semester.

Please note that the teaching approach may vary according to which threat level we are at. The details will be announced through the Learning Management System.

Term : 秋学期授業/Fall | Credit(s) : 2 | Day/Period : 火 4/Tue.4 | Campus : 市ヶ谷 / Ichigaya | Grade : 1~4

Notes :

その他属性 : 〈ゲ〉

[Outline and objectives]

This is an introductory course on Japanese rural society from a cultural anthropology/ human geography point of view. The main objective is to develop an understanding of Japanese rural society and its contact points with sustainability arguments among the students. It is designed in a way to engage the students to read and understand key literature, as well as to provide a roadmap for further exploration on the subject.

[Goal]

In this course, students will develop a good understanding of the rural societies of Japan, including rural landscapes, and their change, and they will be able to analyze them through recent sustainability literature. Students will become aware of various related issues in Asian and global contexts which will give them a broader idea of the sustainability of rural landscapes in general. This will be helpful for their further studies/research in sustainability studies.

Business Communication

Asako NAGAI

Term：春学期授業/Spring | Credit(s)：2 | Day/Period：木 5/Thu.5 | Campus：市ヶ谷 / Ichigaya | Grade：1～4
Notes：

その他属性：〈グ〉

【Outline and objectives】

Effective communication is critical to our successful life and careers. But the question is “How can we become an effective communicator?” In this course, we will be aiming to be effective communicators by understanding the following four topics:

(1) Effective communication with a focus on others

When we want to be a good communicator, learning how to speak and write clearly is not enough; it is important for us to improve our ability to connect with others. The ability to truly connect with others is the key to building good relationships and improving our communication. In this course, we will learn how to communicate effectively by focusing, not on our own perspective, but on the perspective of others and their interests.

(2) Understand cultural differences

Understanding cultural differences of people we communicate with is also very important for effective business communication. In this course, we will learn a model called “The Culture Map” and decode how cultural differences impact international business communication.

(3) Understand unconscious bias

Unconscious bias refers to a bias that we are unaware of, and which happens outside of our control. Unconscious bias happens when we make quick judgments and assess other people and situations. Our biases are influenced by our background, cultural environment and individual experiences. Increasing numbers of global companies are introducing in-company education programs on unconscious bias because it could be a potential obstacle for their business unless they effectively address it. In this course, we have a basic understanding of unconscious bias and learn how to deal with it.

(4) Understand business context

Communicating in a business context may require additional consideration to different environments including team dynamics, power balance and relationship with others. In this course, we will bring case studies to learn different situations which affect relationship with others and how to effectively communicate in a business context.

【Goal】

We aim at achieving the following goals:

- (1) Learn basic methodologies for effective business communication with a focus on others.
- (2) Understand cultural differences in communication based on “the Culture Map.”
- (3) Gain a basic understanding of unconscious bias and how to cope with it.
- (4) Learn effective communication under business context.

【Outline and objectives】

The theme of this course is "fashion and sustainability".

In this course, students will learn about the sustainability-related issues surrounding fashion, one of the design forms most familiar to us, and contemplate how we can address these issues through the pieces of clothing we wear every day.

【Goal】

Students will learn the following concepts: 1) how our every-day commodities (in this case, garments) are deeply related to the environmental problems, consumerism and global economy, 2) how we can critically think about the impact our every-day activities (e. g., purchasing clothes, wearing clothes, etc.) have on the sustainability of our society and environment, and 3) what kinds of measures can be taken to tackle sustainability-related issues in fashion.

[Outline and objectives]

"Human and Environment" is an introductory-level environmental anthropology course to learn about various forms of human-environment relationship through anthropological lenses.

Through examining anthropological perspectives on the environment, students will gain basic understanding on environmental anthropology and also ability to discuss how environmental subjects are connected to broader socio-cultural issues, such as development, globalization, religion, food, and disasters.

No prior knowledge on cultural anthropology is necessary. Any students who are interested in cultural dimensions on the environment are welcomed!

[Goal]

The goal of this course is NOT to teach solutions to environmental problems, but rather to provide tools to think critically about human-environment relations. Environmental problems are often intertwined with social issues. Through learning environmental anthropology, students will develop critical thinking skills to recognize and articulate intricate human-environment connections, which are necessary to pursue the Sustainable Development Goals, or SDGs.

【Outline and objectives】

This course explores how culinary tourism has been adopted as a viable strategy for revitalizing and sustaining rural society. It focuses on Japan's wine tourism and compares it with international practices of sustainable wine tourism. Wine tourism as a business serves as a lens for students to understand the complexity of economic growth and sustaining social development. Throughout the course, students explore the ongoing projects of wine tourism in Japan and learn about sustainable wine tourism practices in New Zealand, Australia and Canada.

【Goal】

The nature of this course is student-oriented and project-based. It connects the classroom and actual society. Following the lectures and discussions in the first half of the course, students will work together on designing wine tourism in Japan in the form of role-playing in the second half of this course. At the end of this course, they will evaluate their completed project according to the UN's SDGs goals. Upon the completion of this course, students will gain hands-on experience in designing a sustainable project and develop logical and critical thinking in English.

【Which item of the diploma policy will be obtained by taking this class?】

【Method(s)】

Students will find various forms of learning, including lectures, discussions, ideas exploration and role-playing in this course. In the first half of the semester, instructor will lead each class session by giving a lecture on the topic of the day. Students are required to join several rounds of group discussions in class. In the second half, students will explore and generating ideas through group work and complete a project in the form of role-playing.

These are very basic. Students are always encouraged to think beyond the box, be creative, and be their own leader of their learning experience!

[Outline and objectives]

This course focuses on the understanding of environment and society as an integrated system. The course explores the theory of social-ecological systems, and with this theoretical underpinning, we will learn about different aspects of environment and society interactions. We will particularly focus on the role of human agency and its present and possible future roles for the state of the earth.

The course is roughly divided into two parts: (1) problems associated with the environment and society and (2) solutions toward more sustainable human-environment relationships.

[Goal]

At the end of the course, students will develop a good understanding of the main arguments related to environment and society relations from different case studies. These arguments include some of the classic environmental problems in our time, such as loss of biodiversity, climate change, water-energy-food nexus, environmental pollution, and diseases. The students will learn about efforts of conservation, and policies that strive to reduce human impact on the earth's natural systems that we need for our own survival.

【Outline and objectives】

As the global economy is becoming increasingly integrated and interdependent, the relationship between business and society is becoming more complex. Corporate management has been significantly impacted by the globalization of business, increasing new regulations, international accords such as the Paris Agreement and SDGs, and the emergence of civil society organizations. Under these situations, businesses today are expected to integrate social and environmental aspects into corporate management and achieve sustained growth. In this course we will learn various topics related to business and society and understand necessary conditions for businesses to achieve sustainable growth.

【Goal】

Students aim at the following goals:

- (1) Understand various topics and theories related to business and society.
- (2) Analyze actual business cases with analytical frameworks students learn in class.

[Outline and objectives]

This course examines "peace," which is one of the "Sustainable Development Goals (SDGs)" listed in the "2030 Agenda for Sustainable Development" adopted at the United Nations Summit in 2015. The SDGs are the goal of realizing a sustainable and better society where no one is left behind, and in order to achieve that goal, the realization of "human security" is required.

Understand the concepts of "peace and security" and learn about the "threats" that impede them.

The feature of this lecture is how to maintain peace based on the "fictitious scenario" of peace by utilizing the active learning method and actually becoming a political leader or policymaker. Incorporate a policy simulation that discusses and presents the best method with other students on whether to foster it.

In addition, we will deepen our understanding of the work of achieving peace and conduct off-campus training to interview practitioners engaged in peacebuilding.

[Goal]

- (1) What is "peace"? Organize what kind of state is called 'peace'.
- (2) Understand the concept of "security" and learn examples of what threatens 'peace'.
- (3) Learn the problems that must be overcome in creating peace through policy simulation.

【Outline and objectives】

This course will cover "Energy," "Infrastructure, Industrialization," in the "Sustainable Development Goals (SDGs)" listed in the "2030 Agenda for Sustainable Development" adopted at the United Nations Summit in 2015. This course also deals with economic challenges such as "innovation" and "sustainable cities".

The feature of this lecture is the way to utilize active learning methods. Students will play the roles of political leaders or policy makers to promote sustainable development based on the "fictitious crisis scenarios" related to economic problems such as food and energy crises. This is a kind of Role-playing game and students will have to think about the best solution to maximize each country's own national interests and establish multilateral or international cooperation.

This course also provides off-campus learning to interview practitioners who are active in Japanese industry working on SDGs. Through this learning, students will be able to deepen their understanding of actual policies and corporate initiatives to achieve sustainable economic growth.

【Goal】

Through this lecture, students will understand what are "SDGs"? and organize specific examples of sustainable development. In addition, students will learn the necessity of international cooperation to realize the SDGs through the policy simulation.

[Outline and objectives]

This course is an introduction to theory and practice of social science research, particularly qualitative methods. Students become familiar with the core concepts and basic principles of social science research and learn to develop research questions, think systematically, collect reliable and valid data, and how data, key concepts and theory fit together. The course encourages students to develop critical analytical and evaluative skills.

[Goal]

Upon successful completion of this course, students will be able to:

- 1) have a comprehensive understanding of key components of research paper.
- 2) formulate a meaningful research question.
- 3) improve ability to complete a research project on their own.
- 4) write a concrete research proposal.

[Which item of the diploma policy will be obtained by taking this class?]

Among diploma policies, "DP2" is related

[Method(s)]

The course consists of lectures, discussions, midterm exam and final paper. Students will conduct an in-class group research project. This course is provided as an online live course using Zoom.

【授業の概要と目的（何を学ぶか）】

In today's globalization, we are increasingly required to interact internationally across cultural borders. Misunderstandings and conflicts are bound to occur, which calls for constructive dialogues and creative solutions. In this course, we will focus primarily on "invisible culture" to deepen your understanding of diversity in cultural orientations, values, behavior, and language uses. You will also reflect on your intercultural experiences and explore your multicultural identities while studying dynamic cultural dimensions.

【到達目標】

In this course, you will 1) cultivate your understanding of the relationships between culture and identity, 2) be able to analyze examples of and reasons for intercultural clashes and relate to others respectfully to come up with constructive solutions to intercultural issues and confusions, 3) be able to use concepts such as stereotypes, generalizations, othering, and marginalization in your analysis, 4) reflect on your intercultural experiences and multicultural mediation.

【授業時間外の学習（準備学習・復習・宿題等）】

You should complete assigned reading and/or writing before coming to class. Come ready to discuss the material with your classmates coming from different (sub)cultures.

According to the university guidelines, the preparation and review time of approximately two hours a week is recommended for this course.

【テキスト（教科書）】

Weekly readings will be made accessible through the course website (Google Classroom). Become familiar with this online resource to do your readings and post your assignments. You are also expected to check your university email account daily to keep up with course announcements.

【参考書】

Handouts and resources related to the course content will be made available in Google Classroom.

【成績評価の方法と基準】

You will receive a formal evaluation of your work at the end of the term. The grade on a late assignment will be lowered. You will be graded on:

- 1) Participation (20%)
- 2) Reading assignments and quizzes (50%)
- 3) Intercultural case study discussion (10%)
- 4) Final group paper (20%) (tentative breakdown)

Regular attendance is essential in order to benefit from the interactive nature of this course. You will not be able to pass this course if you miss more than three class periods a semester except in extreme circumstances.

【学生の意見等からの気づき】

Because this course is to be conducted in English, students must be competent speakers/writers of English (e.g., native or proficient with TOEFL® iBT 81 or above). International and Japanese students of any majors are welcome as long as they are interested in diverse world cultures. Students should view each other's cultural experiences as an asset to this course and create a friendly and respectful learning community.

【学生が準備すべき機器他】

Be prepared to use Hoppii, Google Classroom, and Zoom with your university account and check your university email daily. You will need to use a headset with a microphone when you attend class on campus.

【授業時間外の学習（準備学習・復習・宿題等）】

Students are required to read all the assignments and be ready for class discussions and presentations. They will also write weekly one-page reaction papers. University guidelines suggest preparation and review should be around two hours a week for a two-credit course.

【テキスト（教科書）】

Weekly reading and viewing assignments will be made available in the reserve section of the library and/or uploaded to the course website (Hoppii - student information management system).

その他属性：〈グ〉〈ダ〉

【授業の概要と目的（何を学ぶか）】

In this course, we start by discussing how arts facilitate learning, especially of current social issues related to equity, diversity, and social justice in the globalized world today. You are invited to become part of this learning community sharing your cultural and social knowledge and experience while learning from others of all majors enrolled in this course. You will experience various forms of art incorporated into social activism calling for social and ecological justice. Through this experience, you will understand social, cultural, political, and historical backgrounds associated with the given activism. Your learning will be facilitated through the modeling by the instructor as well as through peer teaching. We will also collaboratively research, discuss, and learn about non-violent peace activists from various cultures and ethnic groups in the world. This will provide you with an opportunity to consider a method and option of acting and relating to others with respect, empathy, and compassion within and across cultural borders.

【到達目標】

In this course, you will: 1) understand and appreciate artistic expressions of equity and cultural diversity, 2) understand social activism behind artistic expressions, and 3) participate in an arts-based approach to social justice issues. You will also reflect on your own reactions to issues of equity and diversity and consider how this learning may influence your values, identities, and worldview in relation to your major field of study.

【授業の概要と目的（何を学ぶか）】

The goal of this class is to learn about the history and culture of French speakers living in the Canadian province of Quebec. Students will look at the very diverse cultural production of Quebec writers, intellectuals, and filmmakers from the 1960s to the present day. The class will focus on one important keyword in order to understand Quebec society and culture: the concept of sovereignty.

*** This class will be conducted online.

【到達目標】

Students will learn the basic theories surrounding the political concept of sovereignty. Then, they will apply these theories in order to better understand Quebec literature and films. They will be able to develop a critical approach to literary and film analysis that takes into account the cultural specificity of Quebec as well as its place in wider debates concerning political independence, minority language and intercultural communication.

回	テーマ	内容
1	Introduction to Quebec society from the 1960s	This class will be a survey of Quebec history from the Quiet Revolution to the present day.
2	Introduction to the concept of sovereignty	Students will learn about the concept of sovereignty through analysis of canonical texts.
3	Criticism regarding the concept of sovereignty and nationalism	We will look at the main criticism against sovereignty and nationalism as well as their impact on Quebec nationalist movement.
4	The importance of French language as the foundation of Quebec identity	We will try to understand why French is the cornerstone of Quebec identity.
5	Hockey, French language, and religion	We will watch and analyze a short film based on a novella by Roch Carrier: The Hockey Sweater

6	Personal sovereignty and political sovereignty	We will read and analyze excerpts from a novel by Hubert Aquin: Next Episode
7	Referendum and independence	We will look at the cultural production surrounding the first (1980) and second (1995) Quebec Referendum.
8	Post-referendum identity crisis	We will read and analyze songs and poems, as well as essays about the Referendum.
9	Immigration, identity, and interculturalism	We will look at the different steps taken by the Quebec government to create an inclusive society, and how it conflicts to a certain extent with the idea of sovereignty.
10	Current debates surrounding immigration and interculturalism	We will look at essays and opinion pieces written about immigration in Quebec.
11	Feminism in Quebec	Students will learn about the history of the feminist movement in Quebec.
12	Literature and migration	We will read a text by Kim Thuy and look at the situation of refugees in Quebec.
13	Literature and Quebec migration	We will read a text by Marco Micone.
14	Quebec and cinema	We will watch and analyze a film by Pierre Falardeau.

【授業時間外の学習（準備学習・復習・宿題等）】

回	テーマ	内容
1	Introduction: Defining Quality of Life and Happiness	Self-introductions, course explanation, placement test
2	Japanese university education and student ability	Reading and discussion
3	The economy, careers and the job hunting of University Students	Reading and discussion
4	Gender issues: exploring the low birthrate in Jaapn	Reading and discussion
5	Gender Part II: the role of women in Japanese society	Reading, discussion and debate
6	Multicultural Japan: accepting foreign immigrants	Reading and discussion
7	Immigration in Japan (II)	Reading and discussion, and debate
8	Mid-semester Review	Midterm Essay due.
9	School education related Issues	Review of writing assignments

10	Educational Issues: Conformity and Ijime	Readings and discussion
11	School education: the struggle for foreign language aquisition	Reading, discussion & debate
12	Various topics	Students presentations and feedback
13	Nationalism in Japan	Final papers submitted
14	Course wrap up: Pursuit of happiness and life satisfaction	Hand back final papers

【授業時間外の学習（準備学習・復習・宿題等）】

Readings must be done prior to class sessions. Students are responsible for looking up unfamiliar vocabulary and preparing answers for discussion questions.

University guidelines suggest preparation and review should be around an hour a week for a one-credit course

【テキスト（教科書）】

No required textbook. Reading materials will be provided by the instructor.

【参考書】

Students should have a good English-Japanese dictionary either in paper or electronic format to use both in and outside of class.

【成績評価の方法と基準】

Students will be evaluated partly their willingness to express themselves in both spoken and written English.

Class Participation: 30%

Midterm essay and Final report: 60%

Presentation (not graded): 10%

Attendance Policy: Students can miss no more than three classes per semester without a good reason (illness, emergency, etc). Coming to late class more than twice=one absence.

【学生の意見等からの気づき】

Students should have some prior experience writing essays and/or reports in English, Students will be doing short debates in groups.

【学生が準備すべき機器他】

Students should have a good dictionary (paper or electronic) and a file folder for keeping handout materials and notes.

【その他の重要事項】

Students are allowed up to 3 unexcused absences. One more absence may be permitted if verification is provided.(job hunting, etc)

In general, auditing the course (聴講) is not allowed and students must register for course credit Students may choose to audit the course after receiving approval from the instructor. International (ESOP)Students are also welcome to enroll in this course if they have sufficient English proficiency.

【Outline (in English)】

Issues in Modern Japanese Society: This intermediate to advanced course examines various aspects of Japanese society (education, economy, immigrants, etc.) using mostly materials written by non-Japanese writers. The purpose of the course is to enable students to think deeply about important societal issues that affect them and to give students the opportunity to discuss them in English. Students will have the opportunity to choose what individual topics interest them the most.

14	Healthy life-work balance: A review	Return final reports & Semester Wrap up

【授業時間外の学習（準備学習・復習・宿題等）】

Students must come prepared to class by doing the assigned readings, looking up unfamiliar vocabulary words, etc. Students are expected to already know how to write a simple essay, including paragraph writing, introduction, body and conclusion.

Approximately two hours each week will be necessary for out of class study time.

【テキスト（教科書）】

There is no textbook for this course. Instructor will provide reading materials each week.

【参考書】

Students should have a good English-Japanese dictionary, either paper or electronic and bring it to class every week.

【成績評価の方法と基準】

Students will be evaluated on their understanding of the material as well as their ability to express themselves in both spoken and written English.

Class Participation: 30%

Midterm and Final Papers: 60%

Presentation: 10% (not graded)

Attendance Policy: Students cannot be absent more than three times to earn credit for this course.

【学生の意見等からの気づき】

More opportunities for student debate will be incorporated into classroom activities, depending on the numbers of students who enroll.

【学生が準備すべき機器他】

Student should have a good dictionary and a file folder for keeping all class handouts and notes.

【その他の重要事項】

Attendance is very important. Students who have more than 3 unexcused absences may not receive credit for this course. One additional excused absence may be permitted if proper verification is provided (for job hunting, etc).

Students should have some experience in writing essays or reports in English.

Students may enroll in this course only for fall semester if they wish.

International students (ESOP) are welcome to enroll in this course.

Students wishing to audit (聴講) the course may do so with the permission of the instructor.

【Outline (in English)】

This intermediate to advanced English course (Level 4) examines various important issues in modern Japanese society. Students will learn about different societal problems facing Japan and will be able to exercise critical thinking to give and clarify their opinions in English.

【授業の概要と目的 (何を学ぶか)】

The UN 2030 Agenda for Sustainable Development, or Sustainable Development Goals (SDGs), has come to be recognized as a common challenge for the human society, which is a manifestation of the severity of various problems we as a species are faced with. In light of this current situation, this course focuses on the concept of "sustainability" so as to provide students with an opportunity to learn about basic scientific aspects of environmental problems and also to learn about relevant social issues in an attempt to provide a holistic view of human impact on the global environment.

【到達目標】

This course is designed to teach about ecological and social issues. Therefore, the course objectives are: 1) to understand basic scientific concepts required to comprehend various environmental problems; 2) to understand social problems related to the environmental problems dealt with in this course; and 3) to form personal perspective and opinion about the current state of human society by understanding the interrelated nature of the environmental and socioeconomic problems.

【授業の進め方と方法】

The course will be taught mainly in a face-to-face lecture format, however, there will also be opportunities for students to actively participate in class through, for example, group activities and discussions. In addition to in-class interactions, students will utilize the learning assistance system (Hoppii) to express their opinions/reactions and to submit questions regarding the materials presented in each class, and the instructor will give feedback/answer questions, as needed.

回	テーマ	内容
Week 1	Understanding sustainability and basic features of ecosystem	As an introduction to the course, the concept of sustainability and the basic features of ecosystem will be discussed.
Week 2	Atmospheric changes and their consequences	In light of the ongoing "climate crisis", the composition of the Earth's atmosphere and consequences of atmospheric changes will be discussed.
Week 3	Water cycle and the use of water resource	Water will be focused as an essential matter for sustaining life and ecosystem, and the water cycle and use of water resource will be discussed.

Week 4	Energy supply	Energy supply in ecosystem and energy issue in the human society will be discussed.
Week 5	What is "soil"?	The importance of soil in an ecosystem will be discussed in relation to ongoing environmental problems.
Week 6	What is biodiversity and why is it important?	Basic features and current state of biodiversity will be discussed in relation to its importance for the human society.
Week 7	Applied ecology for sustainable resource management	Group activity is used to integrate the concepts learned in the previous lectures and apply them to ecological problem solving.
Week 8	Ecological issues of modern agriculture	Positive and negative impacts of agricultural modernization will be discussed.
Week 9	Food production and environmental conservation	Approaches to achieving food security without degrading environment will be discussed with concrete examples.
Week 10	Is development sustainable?	Focusing on mineral resources, issues related to demand and supply of natural resources will be discussed.
Week 11	Consequences of "unwanted" development	Environmental and social problems caused by "development" in the developing world will be discussed.
Week 12	Understanding multi-stakeholder problem solving	Group work will be used to integrate the concepts learned in the previous lectures and apply them to socio-ecological problem solving.
Week 13	Toward a sustainable society	Alternative models that may help build a sustainable society will be discussed.
Week 14	What is happening in the global environment and where do we go from here?	The course contents will be reviewed to grasp the current state of the global environment, and future prospects will be discussed.

【授業時間外の学習 (準備学習・復習・宿題等)】

Students are expected to review contents of individual lectures, thoroughly read distributed materials, and utilize the online learning support system, as needed. Standard amounts of time to be spent for this purpose are two hours each for preparation and review.

【テキスト (教科書)】

None. Reading materials will be distributed as needed.

【参考書】

To be announced as needed.

【成績評価の方法と基準】

Student performance will be graded based on quizzes (40%), a final assignment (40%), and participation/in-class contribution (20%). Quizzes will be used to evaluate understanding of course materials (Course objectives 1 and 2). The final assignment will be an opportunity for students to demonstrate their understanding of the course material by presenting their personal analysis/opinion about the current state of human society (Course objective 3). Participation will be used to evaluate student performance in each class and in-class activities.

【学生の意見等からの気づき】

Providing opportunities for students to interact with other students and exchange their opinions proved effective in enhancing their learning.

【学生が準備すべき機器他】

【授業の概要と目的（何を学ぶか）】

The purpose of this course is to deepen students' understanding of the significance and role of physical activity and to foster the acquisition of essential knowledge and attitudes that contribute to the maintenance and promotion of physical, mental, and social health and self-management throughout life through lectures and practical training.

【到達目標】

By the end of the course, students should be able to do the followings:

1. Deepen understanding of the significance and role of physical activity from various perspectives.
2. Acquire the ability to use sports activities to establish a prosperous and healthy student and social life.
3. Acquire basic knowledge and develop attitudes that contribute to self-management.
4. To acquire the ability to demonstrate leadership and solve problems through communication with others, which is considered to be extremely important for playing an active role in the real world after graduation.
5. Aim to acquire various skills that lead to the development of employment ability (ability to build relationships of trust, ability to act jointly, etc.).

【授業の進め方と方法】

If the Method(s) is changed, we will announce the details of any changes.

Students are expected to be in good physical condition before attending the class so that they will not have any physical or mental problems during the physical activities in the class. In addition, students are expected to follow the lecture's instructions in charge of the class regarding assignments to be done after class and preparations for the next class.

This class has comprised both lectures and practical lessons, and students are expected to learn and understand elementary health and physical education. Also, the class schedule may be changed due to COVID-19 and the university guidelines.

Due to the coronavirus pandemic, if too many students are registered for this class, we may have to choose students via random selection to avoid a large group gathering. Further details of this will be announced through Hoppii before the first lesson starts.

When students submit reaction papers, the teacher will comment or give feedback on those reaction papers at the beginning of the next session.

【授業時間外の学習（準備学習・復習・宿題等）】

This class's standard preparatory study and review time is 2 hours each. The purpose of this class is to understand that sports activities contribute to the promotion of physical and mental health and interpersonal relationships through lectures and practical training. Therefore, record the time spent on daily physical activity, meals, sleep time, etc., look back on the contents, and record the effects and future tasks. Also, get in the habit of looking at various sports-related information sent from TV, newspapers, the Web, etc. This work will deepen your understanding of the contents of this class.

【テキスト（教科書）】

No textbook will be used.

【参考書】

Reference books may be introduced as and if necessary.

【成績評価の方法と基準】

Your overall grade in the class will be decided based on the following.

1. Participation status for activities during class / Reaction paper 60%,
2. Assignments / Reports 40%.

In principle, this grade evaluation method is used, and students who have difficulty in normal activities will be treated and evaluated individually.

【学生の意見等からの気づき】

None (due to a newly appointed teacher).

【学生が準備すべき機器他】

1. Students must bring their proper sportswear and indoor shoes for practical lessons.
2. Students must bring their own personal computer or mobile device to create and submit assignments.

【その他の重要事項】

1. The order and content of each class can be changed/modified due to the number of participants and available facilities, as well as the situation of COVID-19 and university guidelines.
2. This class is planned to be held offline (face to face); therefore, please follow the university guidelines carefully when participating in classes (e.g., sanitizing your hands before participation).
3. If students have any issues, including health, before, during, and after the class, students must inform their condition to the teacher.

Introduction to Biology and Chemistry for Sustainability I

常重 アントニオ、山下 明泰、杉山 賢次、越智 英輔、廣岡 裕吏

開講時期：春学期授業/Spring

その他属性：〈グ〉

【授業の概要と目的（何を学ぶか）】

This course gives a multidisciplinary overview of Bioscience and Applied Chemistry, and how they contribute to a progressive yet sustainable society. Faculty members of three departments: Frontier Bioscience, Chemical Science and Technology, and Clinical Plant Science, will present in an easy-to-understand manner how their respective fields are contributing to the improvement of both humankind and nature.

【到達目標】

The foremost goal of this course is to get the enrolled student acquainted with an introductory course delivered in English that demands active participation. In addition, through this course, the student will acquire a basic knowledge of Bioscience and Applied Chemistry, emphasizing the importance of coexistence between human beings and the environment, the crucial role of improving, expanding and renewing resources, in order to create a sustainable society for future generations.

【授業時間外の学習（準備学習・復習・宿題等）】

【本授業の準備・復習等の授業時間外学習は、4時間を標準とする】 Students are expected to review class materials. Further study on each topic is encouraged. Full participation of students as discussions is encouraged and will be graded.

【テキスト（教科書）】

Due to the nature of emerging technologies and the multi-disciplinary nature of the course, no textbook in particular is necessary, but important reference materials are listed below. Hand-outs will be distributed for each class, or made available in advance through the supporting system Hoppii.

【参考書】

(1) "Life in the Universe", by Sagan, C., Gould, S.J., Minsky, M. & Weinberg, S. Scientific American, 1984; (2) Gaia: A New Look at Life on Earth", by James Lovelock (Oxford Landmark Science, 2016); (3) "The Circular Economy", by Walter R. Stahel, Taylor and Francis Group, 2019. "Human Scale Development" (1989) Manfred Max-Neef et al. Development Dialogue, Other references for further study will be introduced in each class, and can be downloaded from the supporting system Hoppii.

【成績評価の方法と基準】

Grading will be assessed on the student's performance in each class, based on reports, active participation, presentations, and discussion.

【学生の意見等からの気づき】

Topics that required more attention have been expanded. Compared with previous years, some topics have been renewed as new lecturers join the present course.

This is an Open-Global Course, and therefore, students from other campuses different from Koganei are also welcome to enroll. Considering the timetable difference from different campuses, appropriate adjustments will be arranged.

【学生が準備すべき機器他】

For online classes, computers with audiovisual capabilities and internet access are required. Some, if not most materials can be downloaded prior or during class via the Hoppii system.

【授業の概要と目的（何を学ぶか）】

This course covers ubiquitous computers, devices, networks, applications and key technologies in ubiquitous systems and services. Students are expected to learn a systematic knowledge on ubiquitous computing as well as various ubiquitous applications.

【到達目標】

This course attempts to provide a unified overview of the broad field of ubiquitous computing. Students are expected to understand ubiquitous devices from RFID, sensors, wearables, various ubiquitous networks, as well as key technologies including context-awareness, smart u-things, IoT, security, privacy, etc.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

情報科学部ディプロマポリシーのうち「DP4-2」に関連

【授業の進め方と方法】

This course will first give general introductions of ubiquitous computing, essential devices, important networks and representative services, and then check various ubiquitous devices including RFID, e-tag, sensors, handhelds, wearable devices, robots, IoT, etc. as well as their typical applications. The context as a special kind of information in ubiquitous computing will be described in details and related context-aware computing technologies, systems and application will be presented. Various key issues in ubiquitous computing smartness, intelligence, security, safety, trust and related social issues will be discussed. In each class, a student is requested to write a summary of main content learnt in the the class. Students are also requested to write four reports corresponding to the four parts of this course. Students are encouraged to ask questions in class and via email after class. All questions will be answered and feedback promptly in class or after class.

【授業の概要と目的（何を学ぶか）】

Japan's economy witnessed a fast growth after world war II. But ever since 1989, Japan's imploding stock bubble threw the country into a deep financial crisis, resulting in the famous "lost decades". And the stagnation continues especially after the world economic crisis hit in 2008. This will be one-year course. In the 1st semester, we will mainly take a macroeconomic perspective, and look at the reality and problems of Japanese economy from 1980s in a big picture, such as economic growth, financial and monetary policies, "the lost decade" and Abenomics.

【到達目標】

The purpose of this course is twofold: to arouse the students' interest towards the happenings that are related to Japanese economy, in a globalized context; and to equip students with the basic knowledge to reasonably question the phenomenon during the process of Japan's globalization, from the standpoint of economics.

【授業の概要と目的（何を学ぶか）】

Japan's economy witnessed a fast growth after world war II. But ever since 1989, Japan's imploding stock bubble threw the country into a deep financial crisis, resulting in the famous "lost decades". And the stagnation continues especially after the world economic crisis hit in 2008. This will be one-year course. In the 1st semester, we will mainly take a macroeconomic perspective, and look at the reality and problems of Japanese economy from 1980s in a big picture, such as economic growth, financial and monetary policies, "the lost decade" and Abenomics.

【到達目標】

The purpose of this course is twofold: to arouse the students' interest towards the happenings that are related to Japanese economy, in a globalized context; and to equip students with the basic knowledge to reasonably question the phenomenon during the process of Japan's globalization, from the standpoint of economics.

【授業の進め方と方法】

This will be an on-demand course. Videos and teaching materials will be uploaded in advance via Hosei's website ('lecture supporting system'). Lectures are given in line with the teaching materials. The combination of response papers, homework and a final exam will be used. The answers to the representative questions in the response papers will be provided in each class.

【授業時間外の学習（準備学習・復習・宿題等）】

- (1) Taking business courses offered at Hosei
- (2) Reading recent business news
- (3) Preparing for class activities

Since the theme of the fall semester is "working in Japan," students who are interested in working for a Japanese company after graduation would benefit from taking this course.

Regular (daily) study (of about 2 hours total per week) is key to academic success. 本授業の準備学習・復習時間は、各 2 時間を標準とします。

【テキスト（教科書）】

There is no textbook. Readings will be made available on Hoppii.

【成績評価の方法と基準】

- (1) Participation (40%). Students MUST attend all of the classes and express their opinions in discussions in order to receive a high grade. Attitude, punctuality, and overall effort are also important factors for evaluating student performance.
- (2) Evaluation (60%): Students must score at least 60% on their evaluation (presentations) in order to pass the course. Due to the pandemic, the evaluation method and teaching method (face to face) are subject to change. Should the class be held via zoom, students must keep their video camera on at all times, unless doing so would compromise their internet reception.

【学生の意見等からの気づき】

N/A. Students are welcome to make requests or voice complaints and concerns at any time during the semester.

【学生が準備すべき機器他】

Should the pandemic prevent us from meeting in person, students should secure a reliable high-speed internet connection in order to participate via zoom.

【その他の重要事項】

THIS CLASS IS LIMITED TO 20 STUDENTS. THOSE WHO WISH TO REGISTER MUST ATTEND THE FIRST CLASS. This course is designed for IGESS students who are earning their degree in English. Japanese language degree students in the economic department or others may enroll with permission from the instructor.

【授業の概要と目的（何を学ぶか）】

We will discuss the globalization of economics from mainly two important perspectives: international trade and foreign direct investment (FDI). In the first half, we will investigate why countries trade, types of trade, and study some of the benefits and costs of trade. In the second half, we will study why firms choose the form of FDI, the determinants of FDI, the spillover impact of FDI on the host countries. Various policies that different governments implement to promote globalization will also be studied.

【到達目標】

The purpose of this course is twofold: to arouse the students' interest towards the happenings that are related to international economics; and to equip students with the basic knowledge to reasonably question the phenomenon during the process of globalization, from the standpoint of economics.

【授業の概要と目的（何を学ぶか）】

After the second world war, Japan has followed a very distinct development path with unique economic policy choices and pragmatic state-led industrialization. This course intends to cover the influence of the Japanese economic model on remarkable patterns of development in South East Asia. Specifically, the course highlights some of the most pertinent macroeconomic concepts to bind the empirical path of economic development in Japan and ASEAN.

Each class consists of two parts: (1) lecture and (2) students' presentations of the assignment. At the end of the course, students are also required to submit a short report.

【到達目標】

1. Introduce the historical economic perspective about Japan and ASEAN
2. Impart macro-economic tools to understand and analyze economic development in the region

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The class is designed to be:

1. Interactive: With a strong emphasis on student participation.
2. Up-to-date: With the real-time explanation of unfolding events.
3. Critical and Analytical: Understanding the whys and hows of the global economy.

4. Accessible: Breaking down the complex jargon in simple terms.
Each class consists of two parts: (1) lecture and (2) discussion. Active participation is required.

Two-Way Interaction:

Students will be able to partly design this course by participating in regular surveys and writing weekly posts on Hoppii. After the submission of each assignment, the instructor will give feedback or remedial explanation via an online forum and/or in the weekly session.

【授業の概要と目的（何を学ぶか）】

The focus of this course is on providing a deep dive into the Japanese economy and business. The participants learn the implications of the policy decisions and their impact on the state of the economy. The course seeks to provide an understanding of the historical and institutional background of the contemporary Japanese economy.

We use a wide range of sources, covering academic literature, business case studies, and topical news items as well as op-ed pieces to understand the various aspects of Japanese business. Each class consists of two parts: (1) lecture and (2) students' exercises. In the second half of each lecture, students are expected to participate in various exercises. Exercises are followed by short class-discussion to develop the take-aways. Students are also required to take short quizzes.

【到達目標】

The course intends to cover:

Content-Based English A I (Drama)

GEORGE HANN

開講時期：春学期授業/Spring | 単位数：2 単位

曜日・時限：水 2/Wed.2

備考（履修条件等）：All Levels。受講許可が必要。詳細は「クラス指定科目・抽選科目・受講許可科目について」参照。

その他属性：〈グ〉

【授業の概要と目的（何を学ぶか）】

This class aims to improve students' English listening and speaking abilities, as well as their ability to recognize and use non-verbal communication (NVC) strategies, through the use of short dramatic scenes and plays. Students will also learn acting techniques drawn from the Western drama tradition, including the Stanislavski, Meisner and Adler approaches.

【到達目標】

From the plays, students will gain a deeper understanding of the culture of English-speaking societies, and a greater ability to apply interaction rules with people from those societies. Students will also be able to make their English communication sound more “natural”.

【授業の進め方と方法】

The lesson cycle follows this flow:

1. Read the scene/play aloud (for pronunciation/intonation patterns etc.)
2. Script analysis (for character motivations, subtexts, etc.)
3. Assigning roles
4. Scene rehearsal
5. Performance.

After the performance, students in groups write original scenes based on themes and vocabulary from the given scene. They then perform their new scene the following week. Feedback will be in the form of annotated evaluations from the instructor, with points awarded for clarity, vocal and body dynamics, etc. There will also be short scene quizzes.

【授業の概要と目的（何を学ぶか）】

This class aims to improve students' English listening and speaking abilities, as well as their ability to recognize and use non-verbal communication (NVC) strategies, through the use of short dramatic scenes and plays. Students will also learn acting techniques drawn from the Western drama tradition, including the Stanislavski, Meisner and Adler approaches.

【到達目標】

From the plays, students will gain a deeper understanding of the culture of English-speaking societies, and a greater ability to apply interaction rules with people from those societies. Students will also be able to make their English communication sound more “natural”.

【授業の進め方と方法】

The lesson cycle follows this flow:

1. Read the scene/play aloud (for pronunciation/intonation patterns etc.)
2. Script analysis (for character motivations, subtexts, etc.)
3. Assigning roles
4. Scene rehearsal
5. Performance.

After the performance, students in groups write original scenes based on themes and vocabulary from the given scene. They then perform their new scene the following week. Feedback will be in the form of annotated evaluations from the instructor, with points awarded for clarity, vocal and body dynamics, etc. There will also be short scene quizzes.

【授業の概要と目的（何を学ぶか）】

This class is for students who:

- 1) plan to study abroad in an English-speaking country
- 2) have returned to Japan after living in an English-speaking country
- 3) wish to learn more about world cultures

【到達目標】

This course has three goals: 1) to show students who will soon study abroad what to expect from a North American classroom environment; 2) to allow students returning from study abroad to maintain their English level; 3) to introduce students to current topics in cross-cultural communication and understanding.

【授業の進め方と方法】

Each lecture is based on a reading which focuses on a subtopic within the field of Comparative Culture. Students will engage in group and class discussions on the topics. Students will also perform independent research on one of the lecture topics and make a team presentation of their findings.

Past topics have included (but are not limited to):

- Language and Culture
- Work and Leisure
- Religion and Spirituality
- Monocultures vs Multicultures
- Marriage and Family Structure
- Cultural Imperialism
- Sexuality

Feedback will be in the form of annotated evaluations of student presentations and research reports by the instructor.

PLEASE NOTE THE FOLLOWING:

1)THIS CLASS IS CONDUCTED ENTIRELY IN ENGLISH. Students with low-level English listening and speaking skills should think carefully before registering for this class.

2)Students must arrive on time and participate fully. 2 consecutive lates = one absence. Students who miss 5 classes for any reason will automatically receive a failing grade.

【授業の概要と目的（何を学ぶか）】

This course focuses on the structure and function of the United Nations and its wider system. By looking at three areas of global issues, that is, peace and security, human rights, and development, the course examines how the UN system tackles with global problems.

【到達目標】

The course aims to enhance the understanding on the impacts and limitations of the United Nations in the areas of peace and security, human rights, humanitarian issues, and development. In each issue, the course focuses on existing problems, the expected role of the UN system, and its limitation, rather than to go through the structure of international organizations in detail.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The course starts with the overview of the UN system and how the UN has been understanding international peace and security. It then moves onto issues of peace operations, human rights and humanitarian problems, and development including MDGs and SDGs.

Students are encouraged to raise questions and comment on the topic along the lecture. They will be also given a discussion theme for a group discussion.

At the end of the class, students will submit a short reflection paper. Feedbacks will be given at the beginning of the next class.

【授業の概要と目的（何を学ぶか）】

Processing is a computer language designed for those who study programming for the first time. Despite its simple grammatical structure, it provides us with a beginner-friendly graphical environment. In this lecture, you will experience programming in Processing and learn basic knowledge about programming.

【到達目標】

You will learn basic elements of a programming language and how to write simple programs. The grammar of Processing has a lot in common with java and other computer languages widely used in the society. Thus, the knowledge and techniques which you learn in this lecture will be easily transferred to other programming environments.

1	What is Processing?	Programs in Processing is given as an example and you will learn how it works.
2	Calculation	You will learn how to calculate in a computer language.
3	Variables	You learn how to declare variables. You also learn several types of variables.
4	Drawing [1]	You learn how to draw pictures in Processing.
5	Drawing [2]	You learn the importance of using variables when you draw a picture.
6	Conditional Sentence [1]	You learn the "if" statement and how to use it.
7	Conditional Sentence [2]	You will learn how to combine logical conditions.
8	Conditional Sentence [3]	You will learn how to construct a nested structure of conditional sentences.

9	Repetition [1]	You will learn the "while" statement, which enables you to repeat the execution of certain sentences.
10	Repetition [2]	You will learn the "for" statement, another important repetitive control sentence.
11	Repetition [3]	You will learn the combination of repetition and conditional statements.
12	Animation [1]	You will learn the active mode of Processing, in which you can manipulate animation.
13	Animation [2]	Combining repetitive and conditional sentences, you will create a simple animation.
14	Animation [3]	You will upgrade you animation created in the previous lecture by integrating your own idea.

【授業時間外の学習（準備学習・復習・宿題等）】

A homework is assigned in each class. You are required to finish it by the next class. Also the slides for the next class are available a couple of days in advance. You are required to browse them and grasp the image of the upcoming class. An estimated time for this work is 2 hours.

【授業の概要と目的（何を学ぶか）】

This course is a survey of ancient to medieval Japanese literature. Major literary works are introduced with an emphasis on their literary artistry as well as their historical and cultural importance. Focus is also placed on the unique philosophy that shaped the aesthetic values in Japan throughout the centuries. This topic will be further highlighted by discussing differences in Eastern and Western world views and by introducing Okinawan poetry which displays unique features when compared with classical Japanese poetry.

【到達目標】

1. to learn about major literary works in their historical and cultural context
2. to gain deeper understanding of the different philosophical backgrounds that have influenced the way of thinking in Japan and the West
3. to improve your English vocabulary regarding the topic

【授業の概要と目的（何を学ぶか）】

This course focuses on the major literary figures and their representative works of early modern, modern and contemporary Japanese literature. The works will be discussed with regard to the circumstances and background that shaped the authors' way of thinking. The course will also include a lesson introducing two significant works of medieval literature to shed light on one of the crucial concepts in Japanese culture - transience. There will also be a lesson introducing two major women poets of Okinawa.

【到達目標】

Goals:

1. to learn about the major literary figures of pre-modern, modern and contemporary Japanese literature
2. to gain an appreciation of the depth and atmosphere of their literary works as well as the beauty of the English translations

【授業の概要と目的（何を学ぶか）】

This course will seek to introduce the culture & society of contemporary Britain to students through a series of stimulating audio-visual units, together with selected thematically linked readings.

In addition to offering a greater understanding of contemporary UK culture, the course encourages students through the presentation & report to critically compare & contrast UK culture & society with their own.

【到達目標】

During this course, through regular exposure to a variety of audio-visual material, students will have the opportunity to sharpen their listening skills. Follow-up pair-work comprehension questions, discussion & structured conversation practice will also give them the opportunity to improve their oral skills. Finally students will be encouraged to reflect on their own culture & society as they learn about UK.

【授業の概要と目的（何を学ぶか）】

Despite the rise of powers in Asia such as China & India, the US remains the pre-eminent global power and a key to understanding its prominence lies in an understanding of its rise as a superpower during the 20th century. Therefore, this course will focus on key political, economic & cultural developments during the latter half of that period, how they contributed to the rise of American power and continue to influence nations around the world, especially in Asia. Regular reading assignments will be set, analyzed & discussed during the lessons, allowing students to reflect on how the US continues to influence their nations as we enter a new century.

【到達目標】

Through a variety of media, this course seeks to firstly, give students a thorough understanding of key events in the US from the end of World War I to the close of the century. In addition, students will be able to comprehend how those events impacted not only on the course of modern US history, but their wider effect throughout the world, especially in the Asia-Pacific region.

サブタイトル：Introduction to Legal Theory : from Monism to Pluralism

ガエル ベッソン

開講時期：春学期授業/Spring | 曜日・時限：火 5/Tue.5

単位数：2 単位

定員制

その他属性：〈グ〉

【授業の概要と目的（何を学ぶか）】

Legal theory is a discipline that uses tools, concepts and methods from philosophy, sociology, political science, economics and critical studies, in order to study the concepts that are central or deemed the most important to talk about Law in a general way : authority, rule, norm, obligation, and the concept of law itself. But as a specific discipline, Legal theory's vocabulary is distinct from the Legal vocabulary, so it is therefore important to be able to understand the texts of the founders of the discipline among whom we will find Hart, Kelsen, Perelman, Dworkin, Habermas ... and be able to keep the discussion ongoing. This class will accompany the student into one of the most fundamental branches of this discussion : How to distinguish what is law and what it should be ? How do judges, legal practitioners and law professors deal with their functions and their personal preferences ? And overall, how does analytical philosophy of law, one of the most influential positivist approaches of legal phenomenon, deal with international law and the tension between globalisation and localisation ?

【到達目標】

By the end of the course, students are expected to have acquired:

1. an understanding of the purpose of legal theory
2. an overview of main figures of the discipline
3. analytical tools to understand legal theory texts and contemporary debates

【授業の進め方と方法】

Classes consist in discussion, documents study, and lecture. Students will be required to apply analytical frameworks they learned during class by conducting a research on an author of their choice that will result in a presentation during the second half of the semester (starting week 13) and a written report to be submitted at the end of the semester. This will be performed collectively or individually depending on the number of students attending the course. Feedback by peers and the instructor will be given in class. Course contents will vary depending on the number of students' presentations to be performed in class.

【授業の概要と目的 (何を学ぶか)】

Constitutional law is now a trans-disciplinary field that connect to every branches of law, whether it is family law, commercial law, penal law... At the core of it is the protection of fundamental rights. But, even if one of the wonders of the Japanese legal system is to provide the texts of the great legal decisions in English, the vocabulary that the judge uses to make or justify his decision can look frightening for the non-specialist. The class will accompany the student in acquiring the tools to read and understand in English, some of the most important constitutional cases in Japan. We will see the influence of French, German and US doctrines, and the very specific Japanese ones on Japanese constitutional law, compare with solutions in other countries, and see that, contrary to the idea that Japan is always a country of consensus, that there have been strong debates between Justice especially because some defend a very national concept of Law when the other want to promote human rights protection with the same standards as others countries do.

【到達目標】

By the end of the course, it is expected that students have acquired :

1. Specific vocabulary to be able to read legal decisions.
2. Overview of some of the most important cases in Japan.
3. A robust knowledge of the structural doctrines that ensure or limit fundamental rights protection.

【授業の概要と目的（何を学ぶか）】

One of the most pressing issues the Earth is facing is environmental problems. Such environmental problems are universal issues, so all the people on the earth should cooperate to solve these problems. At the beginning of this course, each environmental problem will be focused from the chemical viewpoint. Then, the students with different backgrounds will delve into the matters. The ultimate goal of this course is that we think about these problems deeply by sharing possible solutions with each other.

【到達目標】

The goal of this course is for students to lean environmental problems through chemistry. The objective 1) entirely environmental problems in the world; 2) to learn them you understand basic chemistry; 3) they think about solving the imminent problems by themselves.

【授業の概要と目的（何を学ぶか）】

The purpose of this course is to deepen students' understanding of the significance and role of physical activity and to foster the acquisition of essential knowledge and attitudes that contribute to the maintenance and promotion of physical, mental, and social health and self-management throughout life through lectures and practical training.

【到達目標】

By the end of the course, students should be able to do the followings:

1. Deepen understanding of the significance and role of physical activity from various perspectives.
2. Acquire the ability to use sports activities to establish a prosperous and healthy student and social life.
3. Acquire basic knowledge and develop attitudes that contribute to self-management.
4. To acquire the ability to demonstrate leadership and solve problems through communication with others, which is considered to be extremely important for playing an active role in the real world after graduation.
5. Aim to acquire various skills that lead to the development of employment ability (ability to build relationships of trust, ability to act jointly, etc.).

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

If the Method(s) is changed, we will announce the details of any changes.

Students are expected to be in good physical condition before attending the class so that they will not have any physical or mental problems during the physical activities in the class. In addition, students are expected to follow the lecture's instructions in charge of the class regarding assignments to be done after class and preparations for the next class.

This class has comprised both lectures and practical lessons, and students are expected to learn and understand elementary health and physical education. Also, the class schedule may be changed due to COVID-19 and the university guidelines.

Due to the coronavirus pandemic, if too many students are registered for this class, we may have to choose students via random selection to avoid a large group gathering. Further details of this will be announced through Hoppii before the first lesson starts.

When students submit reaction papers, the teacher will comment or give feedback on those reaction papers at the beginning of the next session.

【授業時間外の学習（準備学習・復習・宿題等）】

This class's standard preparatory study and review time is 2 hours each. The purpose of this class is to understand that sports activities contribute to the promotion of physical and mental health and interpersonal relationships through lectures and practical training. Therefore, record the time spent on daily physical activity, meals, sleep time, etc., look back on the contents, and record the effects and future tasks. Also, get in the habit of looking at various sports-related information sent from TV, newspapers, the Web, etc. This work will deepen your understanding of the contents of this class.

【テキスト（教科書）】

No textbook will be used.

【参考書】

Reference books may be introduced as and if necessary.

【成績評価の方法と基準】

Your overall grade in the class will be decided based on the following.

1. Participation status for activities during class / Reaction paper 60%,
2. Assignments / Reports 40%.

In principle, this grade evaluation method is used, and students who have difficulty in normal activities will be treated and evaluated individually.

【学生の意見等からの気づき】

None (due to a newly appointed teacher).

【学生が準備すべき機器他】

1. Students must bring their proper sportswear and indoor shoes for practical lessons.
2. Students must bring their own personal computer or mobile device to create and submit assignments.

【その他の重要事項】

1. The order and content of each class can be changed/modified due to the number of participants and available facilities, as well as the situation of COVID-19 and university guidelines.
2. This class is planned to be held offline (face to face); therefore, please follow the university guidelines carefully when participating in classes (e.g., sanitizing your hands before participation).
3. If students have any issues, including health, before, during, and after the class, students must inform their condition to the teacher.

【授業の概要と目的 (何を学ぶか)】

This course will help students to improve their ability to make presentations in English. Students will increase their confidence in English communication through researching, talking, reading, writing and presenting about a variety of personal, academic, business and cultural topics. Students will choose their presentation topics according to their own interests. Students will focus in particular on developing and explaining their topics in a clear and engaging manner. Students will make three presentations of about 5-10 minutes.

【到達目標】

You will become a better presenter. You will improve your ability to communicate in front of a group, including topic selection, generating ideas, organising, collecting supporting information, visual communication, consideration of your voice, and movement. You will have many opportunities to express your thoughts in a concise and logical manner. You will try various ways to make your opinions more persuasive.

【授業の進め方と方法】

In this class, you will work in pairs, small groups and individually. You will research and collect information for your topics outside of class. You will organize and arrange your ideas, and prepare visual materials (using PowerPoint or poster paper) to accompany your presentation. Preparation is vital to participate fully and get the most from class time. In class, you will explain your research and ideas. This will enable you to become familiar with your topic and less reliant on a script. Additionally, you will have chances to find the points of interest that need more development, and the places in your work that need further re-thinking and reorganisation. You will also practise a number of important academic skills through listening and note-taking of your own and classmates' topics. These include identifying the key points, re-organising ideas, summarising and reconstructing partner's talks from your notes as well as giving critical feedback. You may be asked to prepare discussion questions related to your topic, and of course, must be ready to answer questions from the audience about your own work. Please come to class ready to participate actively and positively. You may sometimes record your presentations using easy editing software on your phone or PC to share with the class. Teacher feedback will be given in the class and online as necessary.

The goal of this course is to enable students to make effective presentations on a variety of topics. Students will learn to confidently deliver multimedia informative/descriptive speeches, as well as comparative, demonstrative and argumentative/persuasive presentations. Students will also learn to evaluate the quality and content of others' presentations, to take notes on presentation content, and to provide detailed feedback to help presenters to improve their presentation technique.
