【授業の概要と目的（何を学ぶか）】

In our era of globalization, what happens on the other side of the world affects our lives. The COVID-19 outbreak in a Chinese city in 2019 evolved into a worldwide pandemic. Russia's months-long war in Ukraine has accelerated a global energy and cost-of-living crisis and caused an economic slowdown in many countries. Understanding the problems that seem far away from home has become ever more important in this global era as we cannot afford to ignore them. But how can we interpret and tackle the key issues and challenges facing our world today? This introductory course in international politics and global affairs is designed to provide students with the analytical skills to explore and explain solutions to real-world issues.

The course consists of three segments. To start, we will look at the historical background of today's international system, focusing on the evolution from the end of the bipolarity of the Cold War to the emerging global order increasingly led by rising powers. The second segment will cover the main concepts and major strands of theory in the discipline of international relations (IR). These conceptual tools help us analyze global problems and are necessary knowledge for students who wish to continue their studies of international politics after the conclusion of this course. In the final segment, we will investigate contemporary issues that are likely to affect our world for years to come.

Students of all disciplines who are interested in international relations are welcome to enroll. No prerequisites or previous knowledge of international relations is required, but it would be an advantage.

【到達目標】

At the end of this course, students should be able to:

- Describe the historical development of the international system from the end of the Cold War to the present
- Demonstrate a foundational understanding of the major IR theories and concepts and apply them to historical cases and current events
- Analyze and consider solutions to global challenges in the contemporary world
- Show research, communication, and writing skills useful for future career paths in the field

【授業の進め方と方法】

The course will meet once a week. The structure of the course will consist of a mixture of lectures, student presentations, and group discussions. Lectures, which will introduce background information on each week's topic, will be followed by student presentations on selected seminal texts related to a weekly debate question designed to expand students' knowledge of the topic. Students will have a chance to interact with each other in small groups to review the ideas introduced in class and respond to the debate question before participating in a whole-class discussion. In the last few sessions of the class, students will each share a proposal for their intended research with the class.

【授業時間外の学習（準備学習・復習・宿題等）】

Outside of formal classes, students are expected to:

- Read the weekly required materials and prepare relevant questions to clarify and confirm their understanding or discuss in class
 - Summarize and critically assess one or two required readings and prepare their analysis to share with the class
 - Conduct an individual research project on a policy issue of interest in global affairs and present its results via oral presentation and written submission
- Students are encouraged to do the following to contribute meaningfully to the class discussion:
- Explore supplemental readings provided on the list
 - Keep abreast of current events by reading major news stories relating to international politics

【テキスト（教科書）】

All required course materials will be made available via hyperlinks in the syllabus or through Hoppii. No purchases are necessary.

【参考書】

The optional reference readings below are on reserve in the library. They provide helpful background information, particularly for the IR theoretical foundations.

【授業の概要と目的（何を学ぶか）】

This course is a general introduction for students who wish to expand their comprehension of global issues with reference to Africa as informed participants. It is also for students who are interested in studying Africa's society, culture, and politics. Students will learn to identify, analyze, interpret, and evaluate African issues and relate them to global issues.

【到達目標】

This course aims to expose students to how Africa has been subjected to profound stereotypes and misconceptions that have largely informed the continent's global perspectives. The course will seek to humanise our understanding of Africa by emphasising forms and means of daily life experiences and understandings such as family life, love and joy, the life cycle, faith and belief, livelihoods, aspirations, hopes for the future, development aims and achievements, and a sense of global belonging. The overall goal is that students will gain experience researching, discussing, and presenting Africa in the discussion of global issues using a good command of the English language with both clarity and confidence.

【授業の概要と目的（何を学ぶか）】

This class examines how American culture has understood and utilized the culture of "kawaii" in Japan through the comparative study of cuteness in both the United States and Japan.

【到達目標】

Students will be able to:

1. show how media texts are shaped by their distinctive local, national, international, and transnational contexts.
2. gain a cross-cultural perspective of Japanese popular culture aesthetics.

【Outline (in English)】

This class examines how American culture has understood and utilized the culture of "kawaii" in Japan through the comparative study of cuteness in both the United States and Japan.

Students will be able to:

1. show how media texts are shaped by their distinctive local, national, international, and transnational contexts.
2. gain a cross-cultural perspective of Japanese popular culture aesthetics.

This course aims to teach how to understand the "diversity of parodies of cute Japan" critically. Learning how to do this requires that you examine media content and texts closely and read critical essays on them with the guidance of the lecturer, as well as through discussions with your classmates.

Preparing for quizzes at the beginning of each class: 2 hours.

Reading a chapter of the textbook: 2 hours.

There will be small tests at the beginning of each class. Grading shall be as follows:

1. Quizzes in class: 50%.
2. Final exam: 50%.

Three or more absences from discussion sessions without a valid and well-documented reason will lower your final course grade by one full grade.

【授業の進め方と方法】

This course is primarily conducted in a classroom (face to face classes). In some weeks, the class may be conducted online.

Sessions consist of lectures and in-class exercises. Lectures introduce the students to basic concepts and frameworks. In-class exercises to foster comprehension of the concepts and frameworks include discussions and quizzes.

Additionally, students work on a team project during the semester. The team consists of 3-4 students. The number of team members may vary depending on the number of registered students. Teams are required to conduct a team project. At the end of the semester, teams will deliver a presentation of the project. After the presentation, each team member writes up a term paper based on the team project. Details regarding the team project will be announced in class.

Assignments are submitted using Hoppii. Feedback will be given either in-class or on Hoppii.

【授業の概要と目的（何を学ぶか）】

This course is designed to provide a basic understanding of accounting, including introductory accounting concepts, principles, and procedures. Specific attention will be devoted to the four financial statements and frameworks for understanding them, as well as ways in which to prepare financial data. Students will be expected to apply these skills to the analysis of real companies, and to interpret their respective financial statements accordingly. These cases will enable students to grasp the importance of accounting knowledge in the business world, to understand current events in terms of accounting measurements, and to communicate effectively with other professions.

【到達目標】

Upon successful completion of the course, students should be able to:
 - Analyze a company's financial statements
 - Describe conclusions about profitability, efficiency, liquidity, and solvency
 - Record basic debt-credit journal entries and prepare a set of financial statements

【授業の概要と目的（何を学ぶか）】

This course provides an introduction to (1) the Japan's macroeconomic characteristics, (2) the Japan's current economic issues, and (3) the basic economic principles and methods.

After learning a brief history of the Japanese economy and the basic analytical tools of economics, we focus on Japan's labor markets, financial markets, corporate finance and capital investments, international transactions, and economic policies from the 1980s onward. Comparison with the other economies is frequently done.

By the end of the semester, you are expected to be able to utilize the theoretical and empirical tools practiced in this class to generate practical policy recommendations for Japan's major economic problems.

【到達目標】

This course is designed to provide students with opportunities to gain a basic understanding of the Japanese economy. The particular goals can be summarized as follows:

1. To learn the brief history of the Japanese economy after WWII
2. To learn the basic features of Japanese households, firms, and the government and to apply conventional economic theory to understand their behaviors
3. To strengthen analytical skills by discussing the strengths and limitations of Japan's corporate system, labor markets, economic policy, and so forth

Daron Acemoglu, David Laibson, John List (2021) Macroeconomics, Global Edition, Pearson.

This book is called "ALL" based on the authors' names. You SHOULD NOT buy this textbook before the first class meeting since a special instruction will be provided for the students of this class.

【参考書】

1. Papers and newspaper articles will be assigned throughout the semester.
2. Greg Mankiw (2020) Principles of Economics, Cengage.
3. Ito and Hoshi (2020) The Japanese Economy, MIT Press.

【成績評価の方法と基準】

Final exam: 100%. (1) Solving and submitting non-mandatory problem sets and (2) class participation (including non-mandatory problem sets) will give you extra points.

Final exam will be offered in-person. You might need PC (no smartphone or tablet) to take the exam properly.

The fail rate was less than 5% for the last 5 years.

【学生の意見等からの気づき】

I tried to design this course to motivate students to be interested in learning economic ideas and to understand why those ideas are powerful.

【学生が準備すべき機器他】

You need a computer/tablet. Most of the materials would be distributed electrically.

【その他の重要事項】

This course has no prerequisites. I strongly encourage students to take Principles of Macroeconomics, Principles of Microeconomics, Business Management in Japan, Japanese Innovation Management, Human Resource Management I / II, and Corporate Finance AFTER taking this course.

Please note that if the number of students attending the first class significantly exceeds expectations, in order for the instructor to effectively manage the class, the number of students who are allowed to register for the course may be limited.

【Prerequisites】

None

【Upon threat level change】

Please note that the teaching approach may vary according to which threat level we are at: at level 1, this course will be held on campus, though at level 2, it will be held online.

【授業の概要と目的（何を学ぶか）】

This course introduces students to key concepts and theoretical frameworks of international business. Accordingly, the course is more theoretical than practical.

The course focuses on key topics in international business such as institutional and sociocultural environments, foreign direct investment, internationalization of firms, and entry strategy.

At the end of this course, students will be able to understand how firms enter foreign markets, manage foreign subsidiaries, and gain competitive advantage overseas. They will also acquire an ability to analyze firms' success and failure in foreign markets.

【到達目標】

Objectives of this course are:

1. To develop the ability to analyze national difference in institutional and sociocultural environment.
2. To understand theories of firms' internationalization.
3. To understand multinational enterprises, foreign direct investment, and entry strategy.
4. To build skills in analyzing firms' success and failure in foreign markets using the theories of international business.

【この授業を履修することで学部等のディプロマポリシーに示されたなどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

This course is strongly related to the "DP1-1" and "DP4" diploma policies and fairly related to the "DP2-2" policy.

【授業の進め方と方法】

This course is conducted in a classroom (face to face classes). In some weeks, the class may be conducted online.

Sessions consist of lecture, in-class exercise, and discussion. Lecture introduces students to basic concepts and frameworks of the session's topic. Discussion and in-class exercises as well as case analysis are conducted to foster comprehension of the concepts and frameworks.

Students also work on a team project during the semester. A team consists of 3-4 students. Each team is required to conduct a team project. In Weeks 13 and 14, teams make a presentation of the project. After the presentation, each team member writes up a term paper based on the team project. Details regarding the team project will be announced in class.

Assignments are submitted using Hoppii. Feedback will be given either in-class or on Hoppii.

【授業の概要と目的（何を学ぶか）】

Management Accounting is an essential tool that enhances a manager's ability to make effective economic decisions. This course teaches students how to extract and modify costs in order to make informed managerial decisions.

The course covers 3 topics:

1. After an introduction, we will first focus on the interaction of Management Accounting and the business process. "Cost Behavior", "Cost Management Systems" and "Decision Making" are the key issues.
2. In the second part, we will use accounting techniques for planning and control. "Budgeting", "Variance Analysis" and "Management Control System" will be discussed.
3. The last part will be about Capital Budgeting, a technique to evaluate projects having cash flows at different moments in time.

【到達目標】

After successfully completing this course, students should be able to:

- Use cost-volume-profit analysis in decision-making
- Use relevant information for decision-making, both for pricing and operational decisions
- Set-up and use a master budget
- Execute variance analysis
- Understand, define, and implement management control systems and responsibility accounting

【授業の概要と目的（何を学ぶか）】

The firm makes investment, financing and payout decisions. This course will provide students with a concrete basis for understanding how those financial decisions should be made. It will focus on basic and core topics in an introductory level of corporate finance rather than attempt to cover a whole spectrum of corporate finance due to time constraints.

【到達目標】

Upon completing the course, students will be able to

- 1) understand what goals the management should pursue.
- 2) evaluate the projects in a concrete way.
- 3) calculate the value of the firm.
- 4) understand the concept of cost of capital.
- 5) understand the link between the firm value and financing choices.
- 6) understand when the payout policy of the firm matters.
- 7) solidify an understanding of business and financial news.

【授業時間外の学習（準備学習・復習・宿題等）】

It is advisable to read financial and economic news as often as possible. Students should submit all homework assignments on time. Preparatory study and review time for this class are 2 hours each.

【テキスト（教科書）】

The textbook is the latest global edition of 'Fundamentals of Corporate Finance' by Jonathan Berk, Peter DeMarzo, and Jarrad Harford, Pearson. For your reference, it is also used in Introduction to Finance. This course will primarily cover chapters related to core topics of corporate finance.

【参考書】

Any standard textbooks which have the title of 'corporate finance' will be helpful. Just as an example, Stephen Ross, Randolph Westerfield and Bradford Jordan, Fundamentals of Corporate Finance, McGraw-Hill Education, recent editions.

【成績評価の方法と基準】

Grading will be decided based on the following:
in-class contribution (20%),
homework assignments (30%),
and final examination (50%).

【学生の意見等からの気づき】

The lecturer will try to explain key concepts more clearly so that it is easier to understand.

【学生が準備すべき機器他】

Students can use their own pocket calculators and/or laptop computers during the class.

【その他の重要事項】

Please note that if the number of students attending the first class significantly exceeds expectations, in order for the instructor to effectively manage the class, the number of students who are allowed to register for the course may be limited.

【Prerequisites】

It is desirable if students have taken Introduction to Finance, or have equivalent knowledge. Several chapters covered in Introduction to Finance will be skipped. But the lecturer will quickly review the time value of money which is the key concept in Introduction to Finance and also indispensable in understanding core topics of corporate finance, to bring memories back.

【授業の概要と目的（何を学ぶか）】

This course gives students an overview of macroeconomic issues: economic growth, inflation, interest rates, and exchange rates. Topics include policy issues such as government expenditures, taxation, and monetary policy. Given that all industries in the world are influenced by macroeconomic situations, those issues are necessary for not only policymakers but also people in most industries.

【到達目標】

Macroeconomics is a necessary tool for understanding economic issues and policies. The goal of this course is to acquire basic knowledge of macroeconomics and to understand how to use the knowledge of macroeconomics to resolve challenges in business.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The lectures are based on slides and "MyLab," an e-learning platform by Pearson. Also, in the class, recent economic issues in newspapers, magazines, etc., are introduced to learn how to use macroeconomics to deal with real economic and business problems. Feedback on class assignments will be given in the class.

回	テーマ	内容
Class 1	Introduction	This lecture provides several key points for using economics to resolve real economic issues and explains the purpose of studying macroeconomics.
Class 2	A Brief Introduction to Microeconomics	This lecture covers the knowledge of microeconomics for studying macroeconomics, particularly the price mechanism to balance supply and demand.
Class 3	The Wealth of Nations	This lecture provides the concept of GDP and inflation and explains why it is an important measure to assess economic activity.
Class 4	Aggregate Incomes	This lecture focuses on very large differences across countries in income and explains that technology and the efficiency of production are key to accounting for the cross-country differences.
Class 5	Economic growth	This lecture explains why economic growth is important for everyone's economic activity and what encourages long-term economic growth (education, population growth, etc.).
Class 6	Why Isn't the Whole World Developed?	This lecture asks: What has prevented poor countries from catching up to the level of prosperity of developed countries? We examine various factors for economic development.
Class 7	Employment and Unemployment	This lecture covers labor market issues including unemployment rates and wages and explains the effects of government labor market policies.
Class 8	Credit Markets	This lecture explains the role of financial markets and banks in encouraging long-term investment for economic growth.

Class 9	The Monetary System	This lecture explains the role of central banks (i.e., the Bank of Japan in Japan and FRB in the U.S.) such as issuing currencies and conducting monetary policy.
Class 10	Short-Run Fluctuations	This lecture explains what we observe in economic booms and recessions, including the global financial crisis in 2008-2009, and what causes those short-term fluctuations.
Class 11	Countercyclical Macroeconomic Policy	This lecture covers fiscal and monetary policies by the government and the central bank and describes their effects on economic activity and inflation.
Class 12	Macroeconomics and International Trade	This lecture covers recent trends in international trade across countries and explains what a key driving force for the trade pattern under globalization is.
Class 13	Open Economy Macroeconomics	This lecture covers exchange rates and their determinants and explains their relationship with trade and international capital flows.
Class 14	Final Exam	We have an in-class examination.

【授業時間外の学習（準備学習・復習・宿題等）】

Students are expected to briefly read the corresponding chapter of the textbook before each class. Also, after the class, students are expected to review what they learned in the class and read articles in newspapers and magazines assigned in the class. Preparatory study and review time for this class are 2 hours each.

【テキスト（教科書）】

Macroeconomics (Global Edition, 3rd edition), by Daron Acemoglu, David Laibson, and John List. You can access the textbook via MyLab, provided by Pearson.

【参考書】

Other teaching materials, including articles in newspapers and magazines, will be provided in the class.

【成績評価の方法と基準】

The grades are based on (1) the final exam (30%), (2) the assignments (40%), and (3) class attitude (30%). Depending on the number of participants, the final exam is canceled, and the grade is based only on the assignments and class attitude. The students can discuss with other classmates and refer to textbooks when working on the homework, but all students should individually submit the assignments.

【学生の意見等からの気づき】

I will try to have more transactions with students in class by asking questions etc.

【学生が準備すべき機器他】

All students must purchase MyLab, a computer-based e-learning platform by Pearson, to access the assignments and the textbook (around 30 USD). However, students who bought MyLab for "Principles of Microeconomics" do not need to buy it again.

【授業の進め方と方法】

For the first half of the semester, 50% lectures and 50% active learning. Active learning requires the students to take the lead in the learning process with the instructor acting as a facilitator. This will particularly be the case in the second half of the semester. Some examples of active learning are group work, case studies with discussions and debates, team presentations, etc. This course provides students with a series of live presentations including Q&A sessions on specific topics related to global business expansion from experienced, globally active business leaders. The presentations by guest speakers are online. Before each presentation, the instructor will give necessary frameworks to facilitate understanding of the subject. Students are expected to prepare questions in advance so that the Q & A sessions will be fruitful for the students. After the presentation, any remaining time will be devoted to discussions among students and the instructor.

The plan is to conduct this course in a classroom. However, depending on the pandemic situation, the course may be held remotely via Zoom or equivalent software.

Instructor will give students his oral and written feedback on their assignments in class.

【成績評価の方法と基準】

Student grades will be based on the following:
 50% Mid-term test score
 30% In-class Participation
 20% Contribution to Team Presentation

【学生の意見等からの気づき】

Students feedback of the instructor's previous course and changes following the feedback will be presented at the first class.

【学生が準備すべき機器他】

A personal computer with MS PPT, Excel, and Word software
 High speed internet connection

【その他の重要事項】

Please note that if the number of students attending the first class significantly exceeds expectations, the number of students allowed to register for the course may be limited for the instructor to manage the class effectively.

Attendance is checked every class. If you cannot attend class due to illness or other unavoidable reasons, please notify the instructor via email about your absence and its legitimate reason before the start of the class. Students with more than two unexcused absences or absences without a valid reason will not be eligible to earn credits for this course. The instructor had worked for a Japanese manufacturing company for 42 years. He worked in the U.S. to develop markets for the company's products and customers for nearly 11 years. He worked in Germany for six years as President of the European Regional Headquarters of the company.

【Prerequisite】

Students should at least be knowledgeable of basic business terminologies; therefore, being sophomores or juniors with a business major or equivalent is advisable.

【授業の概要と目的（何を学ぶか）】

This course will provide an introduction to the culture and society of contemporary Britain. Students will acquire knowledge about Britain: its geography, climate, history, traditional culture, religion, political system, society, Britishness, and so on. The course will survey British society following globalization after Thatcher's government. Britain in the 70's was a nightmare, economically crippled, politically in a quagmire, and yet culturally vibrant. Thatcher, as prime minister (1979-1990), changed Britain drastically in the 80's. She insisted on free enterprise and deregulation, employed monetarist policies, privatized nationalized industries, passed legislations to weaken trade unions' political power, and was tenaciously skeptical about the deepening of European integration. However, socially, she was conservative and put an emphasis on the importance of traditional family, a self-help work ethic and community. Whether her policies worked well or not is still in discussion, but she is commonly thought to have prepared the way for globalisation, economic success, and the rise of so-called Cool Britannia. Political issues are often related to nation, religion, immigration, ethnicity, class, globalisation, gender, youth culture, and so on.

With UK as a case theme, we also understand the diversity of cultures around the world and the significance of enhancing communication with people from other cultural backgrounds.

【到達目標】

Students will (1) acquire the general knowledge of the society and people in contemporary Britain, (2) learn how one of the most globalized nations has gone through the changes, and (3) think about the new realities and the implications of the changes. By comparing the situations in Britain and Japan, students will gain clearer perspectives on complex issues common in the most advanced and affluent countries.

【授業の概要と目的（何を学ぶか）】

The course is for students intending to teach English; it is an introduction to second language (L2) acquisition and pedagogy. It encourages students to raise their awareness as language teachers.

【到達目標】

Upon completion of this course, students should be able to do the following:

1. Explain the core issues in L2 acquisition research.
2. Examine the connection between L2 research and pedagogy.
3. Conduct research on instructed L2 learning, and relate the findings to L2 learning and teaching in Japan.
4. Conduct research on L2 pedagogical approaches integrated with ICT
5. Understand what is needed to qualify as an English teacher.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The course focuses on the teaching and learning of English. Students will learn theories of first and second language acquisition and a range of opportunities to explore research studies and pedagogy on EFL/ESL education. The course will be highlighted by the students' individual performance: they are to choose one of the course topics and then make a presentation on it. They are required to practice their ICT pedagogical skills through the presentation as well as learning its content. Students are also required to take a final exam and submit a written assignment on a related issue.

Submission of the final requirements and feedback will be on the learning management systems.

【授業の概要と目的（何を学ぶか）】

The goal of this course is to introduce the students to various quantitative research methods used in the social sciences. When making important decisions, be it choosing a strategy to increase the sales of a product, implementing an intervention program to boost people's well-being, or selecting a school program to increase students' learning, people can rely on their intuition and experience, or they can base their decisions on facts: data. In this course, students will develop skills to obtain valid and reliable data through experimental and survey methods. The course will also cover topics related to research ethics, some basic statistics, and APA-style writing.

【到達目標】

This course provides an overview of the 'how's and 'why's of quantitative research in social sciences, and it covers such topics as design, ethics, and APA-style writing and such strategies as field experiments and surveys. Students will develop the ability to design, conduct, evaluate, and report empirical studies. By developing hypotheses and critically assessing information, students will improve on their critical thinking skills.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The course consists of lectures, in which general ideas and methods of research will be presented, and hands-on applications of the methods, in which student's research projects will be planned and presented. Although some of the class time will be set aside for planning students' research, the majority of it will be done as assignments to be completed outside class. Feedback for research will be given during class time. Comments for papers will be given via the Learning Management System.

【授業時間外の学習（準備学習・復習・宿題等）】

Students will have to complete the assigned homework on time to successfully complete the class. They will be asked to do the readings, create research materials, collect data, etc. outside the class. Please bear in mind that the course will require that students spend a considerable amount of time outside class (at least 2 hours every week, sometimes more). Most work will be done in small groups, suggesting that students need to be flexible in finding time to meet other students during the week. Preparatory study and review time for this class are 2 hours each.

【成績評価の方法と基準】

Final grades are based on two research papers (20% and 30%), a poster presentation (20%), and the quality and timeliness of group work done outside class (30%).

【学生の意見等からの気づき】

Students in previous years found this course very demanding but rewarding. Some students aimed to accomplish at a higher level while others were somewhat struggling to meet the requirements. 【授業の概要と目的（何を学ぶか）】

This is an introductory course in social psychology, the scientific study of how we view and influence one another. Students are introduced to the theories, research methods, and seminal findings of social psychology. Social Psychology I will primarily focus on how we think about the social world, how we come to understand others, and how we exert influence on others' thoughts, feelings, and behaviors. Topics include perceptions of others and the self, attitudes, conformity, obedience, and persuasion. Social Psychology II will focus on social relations and intergroup dynamics, covering topics such as helping and aggression, group influence, self, emotion, and prejudice. These two courses will complement each other to provide an overview of the main content areas of social psychology.

【到達目標】

This course will introduce students to the perspectives, research methods, and empirical findings in the field of social psychology and cultivate skills in analyzing the social situations and events that we encounter in our everyday lives. By the end of the course, students will be able to (1) identify and understand major theories, principles, and research findings in the field of social psychology, (2) apply social psychological theories and principles to real life experiences, and (3) critically evaluate social psychological theories and research. In Social Psychology I, students will be able to answer the following questions: How are we influenced by our environment and by other people? How do we explain others' behavior? What are attitudes and how do they affect us? What leads to conformity and obedience? When are people persuaded by differing opinions and when are they not?

【授業の進め方と方法】

Methods of instruction include lectures, films, individual and small group activities, and discussions. Students will engage in various hands-on activities and experiments to experience the concepts they learn in class. Students will be asked to reflect on their daily experiences and share examples that illustrate these concepts. Feedback for the quizzes and midterm exams will be given in class. Students are also encouraged to take advantage of the office hours should they wish to get more personalized feedback on how to improve their performance.

【授業の概要と目的（何を学ぶか）】

This course is designed for students interested in exploring the multifaceted landscape of teaching English to young learners (TEYL) within the context of primary English education. Specifically, it focuses on primary pupils to provide an overview of their second language learning (SLL) on a global scale, in particular concerning primary English as a foreign language (EFL). It gives an insight into a range of SLL theories to feature primary pupils from psychological, educational, and linguistic perspectives. Integrating these perspectives ensures a holistic understanding of TEYL, fostering consistency in language education across primary and secondary levels. By examining theoretical frameworks, practical considerations, and global trends, students are expected to be familiar with valuable insights into effective TEYL practices. They will also be encouraged to develop their own perspectives on the teaching of English in primary school.

【到達目標】

Upon completion of this course, students should be able to do the following:

1. Understand the core issues of SLL theories of young learners.
2. Explain different perspectives of the core issues of L2 education in primary school.
3. Examine the connection between the core issues of young learners' SLL and L2 pedagogy in primary school.
4. Utilise the theoretical knowledge of L2 education for young learners to give an insight into cultivating L2 pedagogy in primary school.

【授業の概要と目的 (何を学ぶか)】

The course is mainly provided for students intending to teach English. Its purpose is to give an insight into the basic issues in teaching methodology for L2 education. It will also encourage students to develop their own teaching performance with a consideration to make consistency in language education from the primary to secondary levels.

【到達目標】

Upon completion of this course, students should be able to do the following:

1. Understand different types of L2 teaching methods and approaches.
2. Learn how to apply some findings of linguistic studies to L2 English teaching.
3. Consider L2 education in relation to crucial issues of semantics and pragmatics.
4. Grasp the knowledge and skills for teaching languages as well as L2 pedagogy through ICT to qualify as an English teacher.

【授業の進め方と方法】

The course will focus on theoretical and practical aspects of the methodology of teaching EFL/ESL. It will also provide opportunities to explore a wide range of EFL/ESL teaching scenes in different countries with reflections on those in Japan; for example EFL/ESL classrooms for learners who vary in age, gender, nationality and occupation can be examined. The students will relive EFL/ESL teaching scenes by following principles and techniques discussed and suggested in a range of teaching methods and approaches: they follow the model English lessons and demonstrate them in the form of micro-teaching. They are also required to create the related teaching materials including ICT along with the lessons. The final exam and a written assignment are required for the completion of this course and, in a written assignment, they demonstrate their study of the model lessons. Submission of the final requirements and feedback will be on the learning management systems.

【授業の進め方と方法】

The course focuses on issues in planning and conducting EFL/ESL lessons: it encourages student teachers to take into consideration the importance of lesson planning when designing an EFL/ESL course. It also provides opportunities for the exploration of a wide range of ideas and examples in the syllabus design from different countries, with reflections on those in Japan. Students are expected to acquire a basic understanding of how to create a lesson plan with materials including ICT needed for managing the language classroom. Students are also required to create their own English lessons and teaching materials, with the opportunity to put them into practice. Students will complete a writing assignment and a final examination that reflects their work on teaching plans, performance and lesson materials. Submission of the final requirements and feedback will be on the learning management systems.

【授業の概要と目的（何を学ぶか）】

This course looks at Asian Americans and their experiences in the USA beyond the image of the economically successful "model minority". Focusing on the two oldest Asian minority groups, Japanese and Chinese Americans, but paying attention also to the many other groups included in the category "Asian Americans," students will study the history of Asian immigration to the United States and trace the process and extent of integration of Asian Americans into mainstream society by exploring a range of topics, including the history of immigration and exclusion, the "model minority" thesis, discrimination at work and in education, media images, gender and sexuality, hate crime and violence, relations with other minority groups, and social activism. Through these topics, students will consider critically the meaning of assimilation, citizenship, and "American" as an identity and a classificatory category and will reflect upon their own identities.

【到達目標】

Students will learn the multifaceted history and current situations of Asian Americans, and as a result acquire a deeper and more nuanced understanding of race relations in American society. Students can expect to develop skills of written communication and reading comprehension through engaging in critical thinking, analysis, writing, and discussion in this course.

【授業の概要と目的（何を学ぶか）】

This course will provide an overview of Foreign Policy Analysis (FPA), examining the processes and actors involved in foreign policy decision-making.

【到達目標】

The course objectives are: (1) to enable students to demonstrate an understanding of the processes involved in foreign policy decision-making; (2) to enable students to demonstrate an understanding of the contexts, pressures and constraints with which policy-makers must deal; (3) to enable students to demonstrate their ability to engage in comparative analysis of the foreign policies of major powers.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

This course will first examine the key concepts and theories in foreign policy analysis (FPA), which are essential for understanding the contexts, pressures and constraints with which policy-makers must deal. These include the Rational Actor Model, the cognitive and psychological approaches, the bureaucratic politics approaches, the role of history and identity in foreign policy, and other internal-external factors influencing foreign policy decisions. After examining the major approaches in FPA, students will conduct case studies. For this reason, students will be required to give a group presentation based on readings relating to the foreign policies of the major states.

Comments for assignments are given during class and office hours.

【授業の概要と目的（何を学ぶか）】

A general introduction to poetry, focusing on the works of a variety of poets from different countries, cultures and eras.

【到達目標】

The primary goal of this course is to teach the students an appreciation of poetry, doing so through a close reading of the texts. Additionally, the study of poetry will deepen student knowledge and understanding of English and English-speaking cultures.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

Will be able to gain “DP 1”, “DP 2”, “DP 3”, and “DP 4”.

【授業の進め方と方法】

Students will learn to analyze poetry, studying its formal elements: rhyme and meter, lineation, tone, voice, figurative language, and so on. By studying how poets see, think, and write about themselves and the world, students will improve their critical thinking, reading, speaking and writing skills. Discussion, comprehension and vocabulary activities, essay writing, and a poetry recitation are all part of the course. Submission of assignments and feedback will be via the Learning Management System.

【授業の概要と目的（何を学ぶか）】

This course introduces the perspectives and major research findings of cultural psychology. The course will introduce general theories and perspectives underlying cultural psychology, explore cultural influences on a wide range of psychological processes, including socialization, self-concept, motivation, emotion, and cognition. The course will also explain the mechanisms underlying cultural differences and examine the process of acculturation and biculturalism in an increasingly diverse world. Throughout the course, students will learn how culture (i.e., institutions, social interactions, and cultural ideas) shapes the way we think and behave and how we, at the same time, shape these cultures.

【到達目標】

One of the aims of this course is to introduce students to the perspectives, research methods, and findings of cultural psychology. Another equally important aim of this course is cultivating students' abilities to understand and deal with variations in psychological processes across cultural and ethnic groups, as well as to gain an understanding of the cultural groundings of their own experiences and actions. By the end of the course, students will be able to demonstrate understanding of how cultural systems influence individuals' psychological processing, including development, self-concepts, motivation, emotion, and cognition. They will also critically engage and analyze cultural products, such as books, films, and advertisements.

1	Introduction	What is culture? Why is cultural psychology important?
2	Models of Person, Self, and Agency I	How are different "selves" constructed?
3	Models of Person, Self, and Agency II	What are the independent models and their consequences?
4	Models of Person, Self, and Agency III	What are the interdependent models and their consequences?
5	Culture and Emotion I	How does culture shape our emotions?
6	Culture and Emotion II	How does culture shape how we should feel?
7	Review and Midterm Exam	What have we learned so far? Multiple choice and short-essays
8	Culture and Cognition I	How does culture shape what we perceive in the world?
9	Culture and Cognition II	How does culture shape how we make sense of others' behaviors?
10	Culture and Cognition III	Where do these cultural differences come from?
11	Socialization I	How do cultural practices shape us?
12	Socialization II	How does education shape us?
13	Review and Final Exam	What have we learned so far? Multiple choice and short-essays
14	Acculturation and Biculturalism	How do we adjust ourselves to the cultural contexts?

【授業時間外の学習（準備学習・復習・宿題等）】

Students should review their notes before each class and be prepared to explain the major concepts and theories they have learned. Students must download and print out the handouts before each class and bring them to class to take notes. Students are required to do the assigned readings and submit reaction papers during the term. Each student will be asked to find and share an example of a cultural product or practice and connect it to the course material.

【授業の概要と目的（何を学ぶか）】

This course is for student teachers of English. It explains how to evaluate learners and teachers in L2 education. It encourages students to examine, discuss and assess practices in L2 education. This course focuses on issues in assessing EFL/ESL learners and teachers: it encourages student teachers to reflect on EFL/ESL learning. The course provides opportunities to explore a wide range of ideas with a consideration to make consistency in language education from the primary to secondary levels.

【到達目標】

Upon completion of this course, students should be able to demonstrate the following:

1. Explain the core issues in L2 education testing and its integration with ICT.
2. Identify testing components.
3. Design testing materials that match educational objectives.
4. Employ a principled approach to the design, creation and implementation of materials testing and evaluation.
5. Understand what is required to qualify as an English teacher.

【授業の概要と目的（何を学ぶか）】

How do we process the experience of encountering a new language and culture? How does that process in turn affect our own personal language and identity? In this course, we will read translations of personal essays and fiction written in the Japanese language by contemporary authors undergoing such experiences, including Japanese authors living abroad and non-Japanese authors writing in their adopted language. As we compare their stories and observations, we will also consider how the act of writing provides each author with a space to form and perform new cultural identities and personal idioms.

【到達目標】

Students will practice reading and writing critically as they explore dynamics of culture, language, and identity in modern Japanese literature.

【授業の概要と目的（何を学ぶか）】

The purpose of this course is to deepen students' understanding of the significance and role of physical activity and to foster the acquisition of essential knowledge and attitudes that contribute to the maintenance and promotion of physical, mental, and social health and self-management throughout life through lectures and practical training.

【到達目標】

By the end of the course, students should be able to do the followings:

1. Deepen understanding of the significance and role of physical activity from various perspectives.
2. Acquire the ability to use sports activities to establish a prosperous and healthy student and social life.
3. Acquire basic knowledge and develop attitudes that contribute to self-management.
4. To acquire the ability to demonstrate leadership and solve problems through communication with others, which is considered to be extremely important for playing an active role in the real world after graduation.
5. Aim to acquire various skills that lead to the development of employment ability (ability to build relationships of trust, ability to act jointly, etc.).

【授業の進め方と方法】

If the Method(s) is changed, we will announce the details of any changes.

Students are expected to be in good physical condition before attending the class so that they will not have any physical or mental problems during the physical activities in the class. In addition, students are expected to follow the lecture's instructions in charge of the class regarding assignments to be done after class and preparations for the next class.

This class has comprised both lectures and practical lessons, and students are expected to learn and understand elementary health and physical education. Also, the class schedule may be changed due to COVID-19 and the university guidelines.

Due to the coronavirus pandemic, if too many students are registered for this class, we may have to choose students via random selection to avoid a large group gathering. Further details of this will be announced through Hoppii before the first lesson starts.

【授業時間外の学習（準備学習・復習・宿題等）】

This class's standard preparatory study and review time is 2 hours each. The purpose of this class is to understand that sports activities contribute to the promotion of physical and mental health and interpersonal relationships through lectures and practical training. Therefore, record the time spent on daily physical activity, meals, sleep time, etc., look back on the contents, and record the effects and future tasks. Also, get in the habit of looking at various sports-related information sent from TV, newspapers, the Web, etc. This work will deepen your understanding of the contents of this class.

【テキスト（教科書）】

No textbook will be used.

【参考書】

Reference books may be introduced as and if necessary.

【成績評価の方法と基準】

Your overall grade in the class will be decided based on the following.

1. Participation status for activities during class / Presentation/ Reaction paper 60%.
2. Assignments / Reports 40%.

In principle, this grade evaluation method is used, and students who have difficulty in normal activities will be treated and evaluated individually.

【学生の意見等からの気づき】

1. Students are expected to communicate and interact with other students from all over the world, so this class tried to create the opportunity to enhance communication skills through sports and physical activities, including individual and team sports.
2. Students are expected to learn and implement the proper physical training (strength and conditioning). This class provided the appropriate information regarding physical training and aimed to improve the knowledge and skills of physical training based on the evidence.

【学生が準備すべき機器他】

1. Students must bring their proper sportswear and shoes for practical lessons.
2. Students must bring their own personal computer or mobile device to create and submit assignments.

【その他の重要事項】

1. The order and content of each class can be changed/modified due to the number of participants and available facilities, as well as the situation of COVID-19 and university guidelines.
2. This class is planned to be held offline (face to face); therefore, please follow the university guidelines carefully when participating in classes (e.g., sanitizing your hands before participation).
3. If students have any issues, including health, before, during, and after the class, students must inform their condition to the teacher.

【授業の概要と目的（何を学ぶか）】

The objective of this course is to provide students with a brief survey of Japanese culture, covering both traditional and modern aspects. It also aims to raise students' awareness of the Japanese culture as well as their own, which will promote a better intercultural communication with local people. Classes will consist of lectures and various activities, including discussions, reaction paper writing, and student presentations.

【到達目標】

At the end of this course, the students are expected to have a clearer and deeper understanding of Japanese culture and people, which eventually facilitates intercultural communication with Japanese people.

【授業の進め方と方法】

This course will consist of primarily lectures, discussions and presentations. Students are expected to actively participate in class-/group discussions and oral presentations. Class tasks, quiz, and students' reaction paper will be provided on the Google classroom. Feedback to the task and reaction paper (=students' feedback) will be given in the following class session in order to deepen the discussion.

The basic language used in class will be English, however, occasionally Japanese will be also used because of the nature of our topics.

【授業の概要と目的（何を学ぶか）】

This course is designed for students who need calculus to study business, economics, or other related business majors. In particular, the course will review the basic ideas you need to start calculus. The topics include exponential and logarithmic functions, arithmetic and geometric sequences, graphing basic functions, graphing exponential and logarithmic functions, limit of a sequence, limit of a function.

【到達目標】

At the end of this course, students will demonstrate the ability to perform different operations involving algebraic expressions, to graph linear and quadratic functions, and to graph polynomial, rational, algebraic, exponential and logarithmic functions.

【授業の概要と目的（何を学ぶか）】

This course is a calculus course intended for those studying business, economics, or other related business majors, and a continuation of topics from “Elementary Mathematics II”. The following topics are presented with applications: derivatives, differentiation rules, derivative of an exponential function and logarithmic function, higher-order derivative, Taylor and Maclaurin series, integrals.

【到達目標】

Students will become proficient in techniques of differentiation, understand the concept of rate of change and how to use it to solve real world problems.

【授業の概要と目的（何を学ぶか）】

This course is about understanding how computers work and how to use them for academic developments. We also see how the computer technology will impact society and the workplace from both short-term and long-term points of view. There will be some exercises involving the use of office productivity software and computer programming. We will also follow current news and discuss developments as they occur.

【到達目標】

Students be able to use spreadsheet for statistical work, word processing software for preparing academic papers. After this course, students can manipulate statistical data and extract meaningful information from them, and then express the information as academic papers.

【授業の進め方と方法】

Demonstrations will be given of the use of software in class. Students are encouraged to try to perform the same tasks on their own computers. There will also be regular assignments, some to allow students to demonstrate that they can complete selected tasks and some involving essays on developments in computer technology. Homework assignments are to be submitted in the Hoppii system. Individual written feedback will be provided as appropriate, and general comments regarding the homework submissions will be made in class.

回	テーマ	内容
1	An introduction to computing	Introduction to the basic structure of computers. Input, storage, processing and output are explained.
2	The history of computers	A survey of the development of the concept of computing and computing machines.
3	Word processing 1	The way of document formatting is explained.
4	Word processing 2	The way of collaborative work with plural authors is explained.
5	Spreadsheet calculations 1	Introduction to Excel, and how to use it is given.
6	Spreadsheet calculations 2	Calculation of sum of table and ratio is given.
7	Spreadsheet calculations 3	The way of making graphs is explained.
8	Spreadsheet calculations 4	The way of inputting a large dataset is explained.

9	Spreadsheet calculations 5	The way of sorting data and matching criteria is explained.
10	Spreadsheet calculations 6	The way of analyzing data of one variable using the frequency table is explained.
11	Spreadsheet calculations 7	The way of location and obtaining scatter sales of the distribution of variables is explained.
12	Spreadsheet calculations 8	The way of analyzing two-dimensional data is explained.
13	Spreadsheet calculations 9	The way of using macros and user defined functions is explained.
14	Spreadsheet calculations 10	The way of using probability and random numbers is explained.

【テキスト（教科書）】

Kazumitsu Nawata, "Introduction to Statistics Using Excel" Asakura Publishing, 2021.

Additional materials will be given in the class.

【参考書】

Recommended references will be recommended in the class.

【成績評価の方法と基準】

Regular assignments (70%) and class participation of discussions (30%).

【学生の意見等からの気づき】

Classes will be discussion-based, so students can give immediate feedback during class. Teaching will be conducted in a flexible manner, taking students' comments into account, and making changes where appropriate. For example, if all students are already able to use office productivity software at a high enough level, it will be possible to focus more on current news reports relating to developments in computer technology, or we can even proceed to computer programming.

【学生が準備すべき機器他】

It is assumed that students bring a laptop computer to the class with Microsoft Office installed. The class will be organized as a remote one. Providing a Microsoft Office installed computer is students' responsibility.

【その他の重要事項】

Please note that if the number of students attending the first class significantly exceeds expectations, in order for the instructor to effectively manage the class, the number of students who are allowed to register for the course may be limited.

【授業の概要と目的（何を学ぶか）】

In this semester, students deepen their skills of use of computers through computer programming. This course provides the fundamental concepts of computing through programming practice in Python programming language.

【到達目標】

Taking this course, the students can understand what a given computer program does and can construct programs for various problems. Also, the students can comprehend what is Object-Oriented Programming, and can construct Python programs in object-oriented fashion.

The students are not expected any previous computer programming experiences. Basic understanding of PC is just enough.

【授業の進め方と方法】

The primary approach of this course will be active learning. Students are expected to solve programming exercises at their own pace. Every lecture gives a new programming construct. Therefore, students are expected to attend every class. If you skip a class, you have to self-study for that skipped class. There will be homework assignments. Homework assignments are to be submitted in Hoppii system. General comments regarding the homework submissions will be made in class.

Assignments are given from time to time. Students are expected to submit all of them. Please keep the deadlines.

The instructor and the students will discuss which programming language should be used in the first class through discussion.

The instructor has no office hour. Please ask question during or after classes. You can also ask question by e-mail.

回	テーマ	内容
1	Introduction to programming	The relationship between Python programs and computers Let's learn about hardware and software that constitute a computer, and its relationship with programs. Selection of the programming language must be done in the class. Eclipse installation is included.

2	Compile and execution	We have to translate a program written by people to a program understood by computers. Let's learn how to do through Eclipse programming environment.
3	Variables and assignments	Let's learn the relationship between variables and memory regions, and how to set a value in such a region.
4	Input and output (1)	Let's learn how a program interact with outside.
5	Input and output (2) and exceptions.	Let's learn how a program accepts values from outside. We have to deal with unexpected values.
6	Basic calculations and type conversion	Computers are calculating machine. Let's make them compute!
7	Program structure (1) (how to express conditional branches)	Let's learn how to control the computation sequence in a program.
8	Program structure (2) (more about conditional branches)	Let's learn how to select one execution sequence from many options.
9	Program structure (3) (repetition)	Let's make a program repeat as many as we want.
10	String and repetition	Let's deepen our understanding about the repetition constructs.
11	One-dimensional array and two-dimensional array	We can store many data in arrays. Let's learn how to create and use them. We can construct matrix-like data structures in a program by using two dimensional arrays.
12	Simple statistics	Let's construct an application program for statistics by using what we learn so far.
13	Class and constructors (a little about object-oriented programming)	In Python programs, we create a program by instantiating classes. To do so, we have to use special methods constructors. Let's learn them by storing statistical objects into an array.
14	Summary	Please complete the object-oriented statistic program.

【授業時間外の学習（準備学習・復習・宿題等）】

No preliminary preparation for the class is required. The standard preparation and review time for this class is 2 hours each.

【テキスト（教科書）】

Textbooks will be announced in the class.
The instructor tries to let student not buy a textbook.

【参考書】

References will be provided as appropriate.

【成績評価の方法と基準】

Regular assignments (50%) and two major projects (50%).

【学生の意見等からの気づき】

If you have already had programming experience by other programming languages such as C or Java, please report. The instructor is willing to cope with such people.

【学生が準備すべき機器他】

It will be useful if students can bring their own laptop computer to class.

【その他の重要事項】

We use Eclipse programming environment that is free to download and to use. The students are encouraged to install Eclipse so that they can perform their assignments at home.

【授業の概要と目的（何を学ぶか）】

This course is designed for the IGESS students. The modern economics takes a scientific method. This course is designed to assist students to learn theoretical models, empirical methodology, and datasets to conduct empirical research. We are scheduled to cover labor supply, labor demand, human capital theory, signaling model, labor mobility, and labor union. Using micro datasets, we will learn how to execute empirical research. If time permits, we might briefly study modern empirical research methodologies focusing on a difference in a correlation and a causality.

【到達目標】

Students will learn theoretical models, empirical methodology, and datasets to conduct empirical research.

【授業の進め方と方法】

All classes for this course will be comprised of lectures and group discussions. There are three homework assignments, that have to be completed in writing on report pads and submitted by the due dates. The instructor will provide the students with the answer keys for the homework assignments, and would also demonstrate how to solve some questions if some students requested me to do so.

Last semester a student in my lecture suggested that I shall divide students in two groups, groups of students who understand the lecture materials well and who may need extra supports, to cover more advanced materials next academic year. Hence I will hire a teaching assistant who did really well on the same course last year and give it a try to cover more advanced materials this semester. Let's see how it goes.

【授業の進め方と方法】

For each of the 14 classes, the professor will introduce a subject related to architecture or design. Students will gather in groups of 3 or 4 and discuss/debate the current subject based on visual documents provided by the professor. The professor will join each group to facilitate discussion and monitor the progress of the students. During the semester, students will be required to prepare visual materials for 4 presentations and discussions with the class. All conversations must be conducted in English, and all presentation materials must be submitted in the form of a PPT or PDF binder.

14回のクラスごとに、講師は建築やデザインに関連するテーマを紹介し、学生は3～4人のグループで集まり、講師が提供したビジュアルドキュメントを基に、現在のテーマについて議論やディベートを行います。講師は各グループに加わり、議論を促進し、学生の進捗状況を確認します。学期中、学生はクラスとの4つのプレゼンテーションと議論のためにビジュアル資料を準備する必要があります。すべての会話は英語で行われ、すべてのプレゼンテーション資料はPPTまたはPDFバインダーの形式で提出する必要があります。

回	テーマ	内容
Class 1	Place-site-origin	Students will introduce themselves to their group, give a presentation of their hometown and neighborhood. They will give their impressions on a remarkable building or space they remember.
Class 2	Graphic Representations; Tools of the Architect	Learn about the different graphic representations used by architects. The professor will present the different drawings and graphics which are commonly used by architects. Students will review in the group the different visuals provided by the professor. These visuals include sketches, diagrams, axonometric views, perspectives, site plans, floor plans, sections, and details.

Class 3	Architectural Movement through 20th and 21st centuries.	The professor will introduce the different main movements in architecture throughout the 20th and 21st centuries, and the students will discuss in groups based on visuals provided by the professor, analyzing the characteristics of each movement, and discussing their influence on contemporary architecture.
Class 4	Contemporary Architecture; Art facility	The professor will present some examples of remarkable architecture related to Art facility (Museums, Art pavilions, etc.). Students will discuss in groups the different projects, analyzing design features and exploring architectural elements.
Class 5	Contemporary Architecture; Art facility; Presentation	Following the previous class, students will give a presentation of one building of their choice. This presentation to be submitted by PDF to the professor, prior to the class.
Class 6	Contemporary Architecture; Transportation, sport facilities, large scale buildings	The professor will present some examples of remarkable architecture related to transportation, sport facilities, and large-scale buildings. Students will discuss in groups the different projects, analyzing design principles and identifying innovative features.
Class 7	Urban Design; City planning, city scape	The professor will present different examples of city planning related to urban design. Students will discuss in groups the different plans, analyzing the layout and examining how they influence the physical form of the city.
Class 8	Micro Architecture	The professor will present a series of very small buildings related to different cities. Students will review and discuss in groups the examples given by the professor.
Class 9	Micro Architecture; Presentation	The students will be asked to find a micro building that has been created in a leftover space within the city. They will give a presentation to the class, focusing on the design process and any challenges faced during its construction. This presentation is to be submitted as a PDF to the professor prior to the class.
Class 10	Contemporary Architecture; Habitat (Human living spaces)	The professor will introduce several case studies related to habitat, and the students will explore in groups the different forms the habitat can take.
Class 11	Contemporary Architecture; Habitat; Presentation	Students will look for examples of housing that challenge traditional ideas about houses. They need to pick one housing project (either individual or collective) and explain how and why it rethinks the idea of a home. Focus on architectural features, sustainability, and social impact. Submit your presentation as a PDF to the professor before the class.
Class 12	Architecture in Literature and popular culture	The professor will give examples of architecture models present in art production such as novels, movies, and paintings. The students will discuss in groups these examples.
Class 13	Contemporary Architecture; Remodeling, rehabilitation	Students will review and discuss a series of projects related to remodeling and rehabilitation, analyzing design transformations, evaluating sustainability aspects, and discussing the preservation of cultural heritage.

Class 14	Contemporary Architecture; Remodeling, rehabilitation; Presentation	Students will present one example related to remodeling and rehabilitation, collecting the different graphic representations introduced in class 2, such as sketches, diagrams, and renderings. This presentation is to be submitted as a PDF to the professor prior to the class.

【授業時間外の学習（準備学習・復習・宿題等）】

There is no preparation needed for most classes except for classes 5, 9, 11, and 14. For these classes, students will have to prepare visuals and materials to present and discuss with the class. Therefore, it is necessary to submit a PPT/PDF prior to the class. The presentation should be within 5 to 10 minutes.

クラス5、9、11、14回を除いて、ほとんどのクラスでは準備は必要ありません。5、9、11、14回のクラスでは、学生はプレゼンテーションおよび議論をするための視覚資料等を準備する必要があります。そのため、クラス前にPPT/PDFを提出する必要があります。プレゼンテーションは約5～10分以内を目安に行います。

【学生の意見等からの気づき】

During the 2023 semester, students expressed that discussions in small groups were more comfortable and less intimidating than formal presentations in front of the class. Consequently, this year, the emphasis has shifted away from formal presentations, with more focus placed on extended discussions on various topics. The class format with group discussions proved to be successful, fostering better collaborative learning and increased student involvement.

2023年度の学期中、学生たちから、少人数のグループでの議論の方が、クラス全体の前での形式的なプレゼンテーションより圧迫感が少なく話しやすかったとの意見がありました。その意見を考慮し、今年は形式的なプレゼンテーションよりもグループディスカッションに重点を置くことにしました。

【授業の概要と目的（何を学ぶか）】

People often think that “philosophy” is quite an old subject – and very *difficult*, unfortunately. It is true that philosophical questions have been discussed in rather complicated and often confusing manners since many years ago, for example, by Socrates and Aristotle in the ancient Greek period. But many philosophers did and do believe that these questions are closely related to our everyday life. That is, we are surrounded by many *philosophical* issues, although we may not always be aware of their philosophical significance. Philosophical issues are thus basically our everyday issues. But how are they related to our life?

In this course, you will discuss various philosophical topics, their in-depth meanings, and their philosophical significance, attempting to find their very relevance to your life. I hope that *under the new perspective* gained in this course, you will be able to see your surroundings, your society, and the world in quite exciting and interesting manners. Out of many philosophical topics found in our daily life, we will pick and discuss 13 topics in class.

【到達目標】

This course provides a broad introduction to philosophical ways of thinking. The course is open to students from any disciplines, who hope to:

- (1) understand some of the most fundamental philosophical topics (for instance: freedom, truth, and moral rightness/wrongness),
- (2) be able to explain the issues in very simple everyday terms, and
- (3) apply philosophical ways of thinking (reasoning) on every-day issues.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

Basic course requirements:

- * No previous philosophy courses required.
- * Intellectual curiosity: Keen eyes on everyday-life facts and issues.
- * Respectful attitude of others' opinions.

On enrollment:

The student enrollment in this course is limited to 20, and you will be admitted on a first-come and first-served basis. So, if you wish to take this course, you need to take an immediate action and do the following:

(1) You have to send me an e-mail (to the address below) in which you express your intention to enroll:

yasushi.ishida.85@hosei.ac.jp

(2) If you are accepted to the course, you will receive a note (e-mail) of confirmation. In case you are not accepted, you will be put on the waiting list in the order of application (i.e., sending the mail).

(3) Those who have received my note of confirmation can go through a procedure of 本登録.

(4) **[Important] Do not fail to notify me, in case you decide to cancel your enrollment.** 授業を取らないと決めた場合は、必ず連絡をすること。そうしないと、ウェイティング・リストに載っている他の学生が登録できません。

・ Those who are put on the waiting list can register, **ONLY IF** we have some openings in the enrollment **AND** the registration is still possible (that is, it is still in the registration period).

・ You will be accepted on a first-come and first-served basis. Equally importantly, I urge you to attend the first and/or second meeting. **In case you fail to attend both of them, that will affect your final grade (10%); if you have legitimate or good reason to miss the meetings, do not fail to contact me by e-mail.**

Organization of the class:

▶ Each class will consist of (less than)100-minutes of **lecture and discussion**. The class will be conducted in English.

▶ At this moment, **I am planning to hold the first 2 meetings online (by using Zoom)**, and after that we will meet on campus (i.e., in-person meetings). In the event that COVID-19 or other infectious disease conditions worsen, we would not hesitate to switch to the Zoom class. Make sure you have the Zoom application ready in your computer along with necessary devices.

▶ I appreciate interaction and exchange with you in class. So, please make best efforts to express your ideas, even if you find it very difficult to do so. I would NOT penalize you for making mistakes; you ARE entitled to make mistakes in class! **Occasionally, we will have group discussion on given topics.**

● On the Zoom meetings:

・ **I will e-mail you the “Zoom Link,” “授業参加用ミーティングID” and “パスワード” on 学習支援システム by Wednesdays (the day before the class).** You will have to sign in with your own Hosei University e-mail address and password.

・ Your attendance will be recorded automatically, but I will take attendance.

・ Note: **In case someone comes in one of the online classes to do any disturbing acts** (which is often called Zoom-Bombing), I will terminate the meeting immediately. And I will report to the University. I will then post in 学習支援システム what you will have to do.

【授業計画】 授業形態：対面/face to face

回	テーマ	内容
1	Guidance	Explaining the course
2	Moral judgment	How do we judge?
3	Morality	What does it mean to be "morally right"?
4	Relativism	Is everything relative?
5	Lying	Is lying always wrong?
6	Result Theory (Utilitarianism)	Is your action “right,” if it brings about a good result?

7	Rule Theory	Is your action “right,” if it follows a good rule?
8	Culture vs. Nature (1)	How different are they?
9	Culture vs. Nature (2)	The idea of “enhancement”
10	Freedom	Are we completely free?
11	Environmental Ethics	What you do may affect complete strangers
12	Perception and Knowledge	Is Perception so accurate? What do we truly know?
13	Language and Meaning	Why is it so unique to human beings?
14	Concluding remarks	Wrap-up: The Meaning of Life

And since thinking philosophically is an acquired skill, like many other skills it has to be practiced regularly and well. **It is thus important that you make adequate time each week to prepare for the class and write your "reaction paper" to the best of your ability.**

· Again, I urge you to attend the first and/or second meeting. **In case you fail to attend both of them, that will affect your final grade (10%); if you have legitimate or good reason to miss the meetings, do not fail to contact me by e-mail.**
 · As I appreciate interaction and exchange with you in class, I would like to know what you think and have your feedback. So, I strongly advise that you attend all the classes and participate in the discussions.

【授業時間外の学習（準備学習・復習・宿題等）】

- I recommend that you review what you have learned in each meeting.
- You are normally expected to spend about two hours for the preparation and review for each class.

【テキスト（教科書）】

- There will be no specific textbooks assigned.
- Occasionally, reading materials may be assigned and handouts will be given in class.

【参考書】

No specific books assigned. But looking into any (**large size**) philosophy dictionaries will be of great help.

【成績評価の方法と基準】

Basically, I will assess your grade based on the way you participate in the class discussions and on your final project.

Attitude/ Participation: 50% of course grade

Final exam (in-class exam): 50% of course grade

*** Attitude/ Participation:**

I appreciate your participation in class and would like to know your ideas and opinions. I will hence consider your participation as part of your grade.

*** Final Exam:**

I will explain the detail before the exam.

Based on the grading criteria set by the instructor, students that successfully achieve 60% or more of course goals will be able to earn a passing grade for the course.

【学生の意見等からの気づき】

In previous semesters, I received several comments from students: for instance, "having discussions in class was very hard at the beginning, but it helped me improve my English speaking skills and express myself logically. Eventually, I found it quite exciting and stimulating."

【その他の重要事項】

<< **Please Read; Very Important** >>

Most of us already have a general or intuitive understanding of many basic philosophical issues. The key to understanding these issues is, however, being able to **critically evaluate these issues from a number of different perspectives**, and these are neither obvious nor easy to apply. In studying philosophy, often you have to “get out of” your own perspective. *Philosophy* is different from *a philosophy*. Philosophy is the discipline that comprises logic, metaphysics, ethics, epistemology, and so on; a philosophy is a system of beliefs, concepts, or attitude of an individual or group, or a view about a sphere of activity or thought. Everyone has a philosophy of some sort or other even if s/he has never read a book in philosophy. **An individual’s philosophy or a group’s philosophy can be a subject for examination and discussion, and can be challenged within the discipline of philosophy. Studying philosophy may affect your own philosophy and thus may make you feel uneasy.**

【授業の概要と目的 (何を学ぶか)】

This course is designed to provide students with a comprehensive exploration of the complex intersections between society and religion in the context of a globalizing world. As globalization continues to shape and redefine human interactions, this course seeks to critically analyze the multifaceted roles that religion plays in influencing and responding to global dynamics. Students will explore issues such as immigration, nationalism, conflict, gender, sexuality, tourism, consumerism, and citizenship, all within the broader context of contemporary global society.

【到達目標】

By the end of this course,

- ① Students will have gained a nuanced understanding of the intricate connections between society and religion in the age of globalization, enabling them to critically engage with the complex issues that arise in our increasingly interconnected world.
- ② Through a multidisciplinary approach, students will be equipped with the knowledge and analytical tools to address the challenges and opportunities presented by the dynamic interplay of society, religion, and globalization.

【授業の進め方と方法】

The first part of class focuses on providing students with a broad understanding of the background of the topic covered in the assigned readings. The class then engages in a discussion that allows students to share their insights and interpretations of the reading assignment. In the second half of the class, the focus shifts to a broader examination of the issues raised in the reading assignment. The class expands its scope to explore the implications, connections, and applications of the issues in a broader context.

【授業の概要と目的（何を学ぶか）】

English Application is an integrated 4 skills communication skills course with a focus on an English for Academic Purposes (EAP) or English for Specific Purposes (ESP) content area. This course will explore the history of tourism and its continued expansion in a constantly globalizing world. All third and fourth-year students in the Faculty of Intercultural Communication have some experience with International Travel and living in a Foreign Country through their Study Abroad experience, which is an Intercultural Communication Activity sometimes described as Cultural or Educational Tourism.

【到達目標】

The goal of English Application is to give Post-SA students a forum to continue to use and enhance their English Communication skills. The theme of this English Application course is to explore how the world continues to become increasingly interconnected due to better communication systems and increasing opportunities for international travel. It will also examine how more people around the world are experiencing interactions with people from different countries and cultures, i.e., directly experiencing Intercultural Communication through tourism.

【授業の概要と目的 (何を学ぶか)】

In this course, we will analyze how gender and sexuality issues manifest throughout culture in Japan. Why do we need to discuss gender and sexuality in relation to Japanese contemporary culture? Who do we talk about when we discuss such issues? We will approach these questions from different perspectives and disciplines, such as history, literature, media, etc. While the main focus of this course is the representation of gender and sexuality in contemporary Japanese society, we will also address these issues in a global context.

【到達目標】

1. To become familiar with historical sources and social and political elements in regard to the construction of gender within contemporary Japanese society.
2. To develop critical thinking strategies and apply them in order to understand how gender and sexuality are represented within contemporary Japanese media.
3. To incorporate a gender perspective while participating in academic discussions, presenting on a selected topic, and writing analytical papers.

Group discussions help students to deepen their understanding of the course topics.

This course readings and classroom discussions will often focus on difficult and potentially challenging topics. Since readings and discussions might trigger strong feelings, content warnings will be given so that students will be prepared in advance.

【学生が準備すべき機器他】

Laptop to take the in-class midterm exam and write the final essay.

【Outline (in English)】

In this course, we will analyze how gender and sexuality issues manifest throughout culture in Japan. Why do we need to discuss gender and sexuality in relation to Japanese contemporary culture? Who do we talk about when we discuss such issues? We will approach these questions from different perspectives and disciplines, such as anthropology, history, literature, media, etc. While the main focus of this course is the representation of gender and sexuality in contemporary Japanese society, we will also address these issues in a global context.

Learning goals

1. To become familiar with historical sources and social and political elements in regard to the construction of gender within contemporary Japanese society.

2. To develop critical thinking strategies and apply them in order to understand how gender and sexuality are represented within contemporary Japanese media.

3. To incorporate a gender perspective while participating in academic discussions, presenting on a selected topic, and writing analytical papers.

Grading policy

Discussion and participation (comment sheets, involvement during discussion): 20%

Active participation in class is required. Submit your comments via Hoppii at the end of each session.

Attendance will be taken every time. You will not receive credit for the course if you miss more than four classes.

Midterm exam: 40%

Final paper (2000-3000 words): 40%

【授業の概要と目的（何を学ぶか）】

The Culture, Language, and Thought of the English-Speaking World is the product of many historical interactions between a variety of peoples with different ways of thinking and living in the world. To understand many aspects of the societies in the modern English-Speaking World, one must first recognize the historical forces that shaped them and brought them about.

【到達目標】

The primary goal of this course is to give students the basic knowledge necessary to understand: 1) how societies and cultures change in general and 2) how the cultures of the English-Speaking World developed their unique forms. Using the framework of cultural change, we will examine the formation of “Western” religious and political institutions that developed before 1500 CE in order to better appreciate the roots of “Western” social, political, and economic thought. Building on this foundation, the evolution of modern social systems and political-economic thought that occurred in the English-Speaking World after 1500 CE will be discussed.

【授業の進め方と方法】

When the university's Action Policy (Conduct Guideline) Level is 2, this class will be conducted online in principle. Details will be communicated via the Learning Managing System.

The course will start out by outlining the forces behind cultural change. This will be followed by a series of lectures discussing the development of European political and religious institutions following the Ancient Greco-Roman era. We will then attempt to analyze Britain's rather unique political & economic institutions at the beginning of the modern era as a product of cultural change. Building on this foundation, the cultural changes, i.e., the changes in thought, caused by the Protestant Reformation and Enlightenment Philosophy will be examined and their impact on the development of British and American Political-Economic Systems through the 19th and 20th Centuries will be discussed. Students will receive feedback and comments on homework assignments and in class activities throughout the term.

【授業の概要と目的（何を学ぶか）】

Towards the end of this course, students will be able:

1. to study the history of the English language, which, good or bad, has become an 'international language' in our modern world; and
2. to develop a general interest in the language itself through doing a lot of reading.

【到達目標】

1. To get a general idea how the English language has evolved,
2. To try to explain various apparent 'mysteries' of English in historical terms,
3. To begin to develop a general theory of linguistic change,
4. To study English in its general sense. (You see, you must keep that level of English acquired through your SA experience!)

Actual class sessions are all based on the Powerpoint slides (More than 200 slides in all!) all prepared beforehand. So, in order to make the most of them you should:

- download and print out the slides and skim over them;
- attend the class w/the printed-out slides, concentrate on the contents of the lecture, and take as many notes as you can;
- visit our Learning Management System (LMS) site and check the comments made by the instructor; and
- read the books/articles mentioned on the LMS site for further comprehension.

Please note that feedbacks to the lecture contents will be amply given on the LMS site. After each class session given, the detailed review articles will be given on the web; so please make the most of them. Should you have any trouble in taking realtime online class session, you can get access to the recorded educational material. Please check the LMS site for details.

Suggested reading materials to enhance students' comprehension will be mentioned through LMS in due course. However, the following are worth reading prior to the opening of the course:

- Algeo, John (2010). *The Origins and Development of the English Language*. Sixth edition. Boston: Wadsworth. [Based on the original work of Thomas Pyles. Careful about special phonetic notations used.]
- Barber, Charles, Joan C. Beal, and Philip A. Shaw (2009). *The English Language: A Historical Introduction*. Second edition. Cambridge: Cambridge University Press. [Offers clear explanations of linguistic ideas.]
- Bradley, Henry (1970). *The Making of English*. Tokyo: Seibido. [A bit out of date, but still a good introduction. Japanese translation available from Iwanami.]
- Schmitt, Norbert and Richard Marsden (2009). *Why Is English Like That? Historical Answers to Hard ELT Questions*. Ann Arbor: The University of Michigan Press. [A recent book; easy to read; written for English language teachers.]

【成績評価の方法と基準】

- Please note that attendance is taken for granted. However, if you miss a class, the following rule is applied: 1 demerit for each class missed. 3 demerits = -10% on your grade (roughly one letter grade). 5 demerits = failure for the course.

- The Final exam scheduled on the day of the final class session is very important, literally determining your grade. Please see my message on the LMS site for more information.

Any modification to the above shall be known to you by using LMS

Based on the grading criteria set by the instructor, students that successfully achieve 60% or more of course goals will be able to earn a passing grade for the course.

【学生の意見等からの気づき】

Overall, the instructor gets favourable comments from the students.

Using a personal computer is recommended, which enables you to get accustomed to make use of phonetic fonts as well as tree-drawing applications. Also, there are many interesting sites on the web which the instructor recommends you to visit.

【その他の重要事項】

In terms of its content, this course is the same as 「英語圏の文化VIII（英語の歴史）」 taught in Japanese. Therefore, if you have obtained credits taking that course, you cannot obtain credits by taking this course.

This course is just a half-year (semestral) course about the history of the English language. Students are highly encouraged to study various matters not treated in class sessions.

Also, as is shown in Goals above, always having a strong interest in English per se is important. So, please study English hard and try to develop a 'feel' for the language.

【カリキュラム上の位置づけ】

Open for the third- and fourth-year FIC students (many of them probably being the SA-English students). Also open for non-FIC students. Appropriate for those who have strong interest in the English language and historical linguistics.

【授業の概要と目的（何を学ぶか）】

The aim of this course is to consider structural aspects of the English language, which has become the de facto 'global' language. Towards the end of this course, students will be able to attain the following goals indicated below.

【到達目標】

1. To get a general idea about how English sounds and grammatical phenomena are described.
2. To obtain a certain level of knowledge about how various structural aspects of modern English SHOULD be described.
3. To obtain enough knowledge about modern English so as to answer various questions about the alleged 'mysteries' of the English language.
4. To study English in its general sense. (You see, you all finished your SA programmes, so you should keep that level of English until graduation.)

The following is the list of important topics (among others) to be covered in this course:

- a) articulatory organs and phonetic symbols,
- b) the notion of phoneme (introduction to structural linguistics),
- c) modular approach to linguistics,
- d) various units in linguistic description,
- e) syntactic categories (parts of speech),
- f) intermediate constituency, phrase structural analysis

【授業の概要と目的（何を学ぶか）】

This interdisciplinary course focuses on technology and sustainability, offering a critical examination of social and environmental impacts that synthetic biology might bring to sustainability. It introduces the principles, techniques, and applications of genetic engineering to design and create novel biological systems through the lens of food system. Students will explore the ethical considerations surrounding genetic manipulation, the societal impacts of creating synthetic organisms, and the potential consequences of deploying engineered biological systems to sustainability of human society. Through readings, discussions, and research, this course aims to equip students with the knowledge and analytical tools necessary to engage in informed discussions about the social and environmental challenges and responsibilities associated with new technology. Students will practice applying the informed knowledge and analytical tools into the examination of the same issue in the Japanese context.

【到達目標】

Upon the completion of this engaging course, students will:

1. Explore the applications of synthetic biology in creating synthetic organisms and designing novel biological systems.
2. Analyze the environmental and social implications associated with the advancement of synthetic biology.
3. Develop critical thinking skills to assess the potential benefits and risks of synthetic biology applications.
4. Apply informed knowledge through a research project that helps students comprehend diverse opinions on the topic in Japan.

Sociology of Gender and Families

The family is one of the most important social institutions that everyone in society is familiar with. Because of the familiarity, however, we often lack critical perspectives on the issues pertaining to the family. We will challenge typically taken-for-granted notions of the family by considering it from a sociological point of view. We will do so by highlighting the ways in which gender plays a critical role in shaping our experiences, identity, as well as relationship to others.

【到達目標】

While focusing on families in contemporary Japan, this course will take a historical and comparative perspective to highlight diversity and transformation of families, both within and outside Japan. By investigating both public policies and private dynamics, we aim to deepen our understanding of, and gain critical perspectives on the family.

Upon successful completion of the course, students will be able to:

1. identify and critically engage with social issues pertaining to the family and gender;
2. understand the connection between individual experiences in family and broader socio-historical contexts; and
3. discuss issues surrounding the family and gender with a comparative perspective.

【授業の概要と目的（何を学ぶか）】

This course provides students with a survey of various facets and challenges characterizing contemporary Japanese society. Topics covered range from class inequality, depopulation and aging society, food security, and disaster management and recovery, technology and social isolation, shortage of natural resources urbanization and rural challenges. It focuses on values, institutions, processes and patterns of social change against the background of history and tradition on the one hand, and on the other, how Japan is now taking actions in achieving sustainability in these terms with the 17 goals in SDGs from the UN.

【到達目標】

By the end of the course, students will be able to understand in a comprehensive manner central issues underpinning contemporary Japanese society and develop a foundation for detailed and critical analysis of specific aspects from the perspectives of sustainability. Students will also practice academic analysis of various sustainability issues in the Japanese context through data collection and in-class discussions.

【授業の概要と目的（何を学ぶか）】

This course offers students opportunities to acquire knowledge and skills to analyze the role of businesses to contribute to global sustainability. There is growing expectation for businesses to play more important roles toward solving global problems such as climate change, poverty, and various forms of inequalities. More concretely, businesses are expected to work with their stakeholders to reduce negative impacts across their supply chains and deliver solutions to challenging sustainability issues. In this course, through active learning, including students' presentation and class discussions, students will proactively learn the current status and challenges of corporate efforts regarding various sustainability challenges.

【到達目標】

Students should aim to be able to achieve the following goals:
 (1) Understand global sustainability challenges and how companies are tackling various problems to realize CSV(Creating Shared Value).
 (2) Analyze actual business cases with analytical frameworks learned in class.

【授業の概要と目的（何を学ぶか）】

At the start of this course, we will explore the concept of biodiversity and the various indicators that can be used to quantify it. Equipped with these tools, we will investigate the relevance of biological diversity for human societies. Looking at the arguments that have been put forward to call for the conservation of nature, we will learn about the way in which world views and value systems influence our thinking and our decision-making. Scientific evidence concerning biodiversity, ecosystem functions and ecosystem services is playing an increasingly important role for strategic planning of public administration and private companies. We will synthesize our findings concerning the links between human activities and biota derived from case studies and apply them to scenarios of the future development of social-ecological systems.

【到達目標】

Successful participants will be able to explain the various components of biological diversity and their relevance for the functioning of social-ecological systems. They will master the basics of species identification and biodiversity monitoring, including the application of biomarkers, remote sensing and image analysis. In addition to natural science aspects, participants will develop an understanding of the legal frameworks and the incentive schemes employed to balance the often-conflicting goals of economic prosperity and nature conservation.

Fundamental aspects are introduced through short lectures. Key topics are expanded on in a participatory approach using texts and figures related to biodiversity, nature conservation and methods for evaluating ecological functions in the context of policy-making and planning. Participants work on selected topics and present their findings in class. They summarize their findings in a report that will take the form of a short research paper. Feedback on assignments submitted by students will be provided in class or through the Learning Management System.

【授業の概要と目的（何を学ぶか）】

As urbanization intensifies globally, an increasing number of people are choosing to live in cities. It is widely acknowledged that the design of cities significantly impacts the quality of life for their residents. This interdisciplinary course amalgamates concepts from urban design, environmental psychology, sociology, and environmental studies to provide a comprehensive understanding of the dynamic interplay between urban spaces and social-individual sustainability. It delves into themes such as the psychological effects of different urban environments on individuals and communities, the role of urban design in fostering or hindering social interactions, and the intersection of urban design and individual sustainability. These themes are translated into empirical questions, such as (1) How do green spaces, public transportation, and architectural design contribute to our mental and emotional well-being? (2) How can cities be designed to enhance community engagement, social cohesion, and a sense of belonging?

【到達目標】

Upon the completion of this engaging course, students will:

- (1) Have developed a nuanced understanding of the intricate relationship between the design of our urban environments and the well-being of the people who inhabit them.
- (2) Be able to combine theory and practice to think critically about the spaces we inhabit and how they impact our lives.
- (3) Be able to examine empirical urban design case and provide solutions to transform the case of urban space that not only function efficiently but also contribute to the flourishing and sustainable life of their inhabitants.

【授業の進め方と方法】

Throughout the course, students will engage in critical discussions, collaborative projects, and independent research to apply theoretical concepts to real-world urban scenarios. This course is therefore divided into two parts—part I reading and discussion and part II knowledge application. Instructor will lead each class session in part I, conducting discussions and lectures on the topic of the day. Students are required to read assigned text before class and take part in discussions as basic requirements. In part II, students will examine a real urban design case with concepts that they have learned from part I and propose solutions to make a sustainable urban environment. Overall comments and feedback to student's performance are offered in class. Individual feedback can be offered by Hoppii or conversation in office hour.

【授業の概要と目的（何を学ぶか）】

This course explores social issues with sociological approaches. It introduces students to some major social theories and concepts in sociology. Topics include a review of sociology as a discipline, culture, socialization, social interaction, education, social stratification, networks, work, economic life, body and health, urbanization, population, environment, and globalization. It is a theory-oriented course. However, it addresses empirical questions such as (1) What is society? (2) How is society organized and structured? (3) Who are individuals and their roles in society? (4) How do individuals and society affect each other? and (5) What does sustainability mean to our contemporary and future human society? The goal of this course is to provide students with conceptual tools for understanding society, thereby some inspirations of how individuals can live a happy and meaning life and contribute to a sustainable world.

【到達目標】

By emphasizing reading, discussing, and critical thinking skills, this course helps students build the foundation for a deeper understanding of theory and methods in the social sciences. Upon completion of this course, students will be empowered an eye to consider what happens in daily life with evidence-based reasoning. This course is designed to inspire students to think with their own talents, interests, and passion. Students have plenty of time expressing their own opinions and exchanging ideas with peers and instructor in each class.

【授業の概要と目的（何を学ぶか）】

Balancing economic activity and the environment is essential in achieving a sustainable world. Countries around the globe have implemented various types of environmental regulations in order to reduce emission of pollutants. This course will focus on the Japanese experience in reducing various types of pollutants from the environmental economics perspective.

【到達目標】

The goal of this course is 1) to understand the economic theory behind the policies implemented, 2) study the economic efficiency of these policies, and 3) conceptualize policies that could have been economically efficient and could be used in developing countries.

By taking this course, students will be able to explain environmental economic theory and the economic efficiency of policies implemented in Japan. In addition, each individual will be able to come up with ideas on how to reduce emissions from developing countries based on the Japanese experience.

【授業の概要と目的（何を学ぶか）】

This is a course to explore Japanese rural society through anthropological perspectives. It focuses on mountain villages as a field site, and aims to examine some of the key topics to learn their characteristics, as well as their transformations today.

The course consists of two parts: (1) life in mountain villages in Japan,

(2) Their transformations, issues and problems.

Students will gain good understanding of peoples' lives in Japanese rural society, and also examine issues and problems in current rural areas, such as environmental changes, depopulation, and human-animal conflicts. By discussing these themes, we will analyze various environmental, sustainable issues in contemporary Japan.

【到達目標】

Students will gain a good understanding of rural societies of Japan, including their natural environments, subsistence activities, and religious rituals. Students also will be able to critically analyze the issues that rural villages have been facing today, such as depopulation and environmental degradation.

【授業の概要と目的（何を学ぶか）】

This course aims to examine some of the key topics and issues related to subsistence, resource use, and sustainability. By looking at case studies and ethnographic literatures, we will investigate different types of subsistence economies practiced around the world, such as hunting-gathering, reindeer herding, honey hunting, and fishery. We will learn how people have been practicing those subsistence economies and using natural resources in their everyday lives. We will look at how the relationships between people and natural environment have been formed in each subsistence activity. In addition, we also discuss the ways in which those subsistence activities are changing in today's world. By focusing on the issues of global warming, development project, deforestation, tourism, and natural disaster, we will develop our understanding of sustainability issues those societies are facing today.

【到達目標】

By the end of the course, students will obtain skills to examine a wide range of topics concerning resource use and sustainability. Students will also develop critical thinking skills and theoretical viewpoints to investigate issues regarding subsistence activities and environmental changes occurring widely today.

【授業の概要と目的（何を学ぶか）】

Intercultural Communication is a fundamental field of study in today's globalized world. This course will deal with two main approaches to intercultural communication, Culture-General Approach, and Culture-Specific Approach. In the Culture-General Approach, the focus is on building a general understanding of the importance of culture to human existence and examining ways to either neutralize the impact of culture so that it does not get in the way of communication or communicate within culturally diverse groups without stereotyping or discriminating. In the Culture-Specific Approach, individuals usually try to learn as much as possible about a particular culture or group of cultures often by comparing them to their own cultural background or a particular nation's predominant culture so that they can avoid communication challenges. Combining these two approaches in this course prepares students to approach intercultural encounters with a set of practical principles and behaviors so that students acquire skill-building opportunities through intercultural encounters.

【到達目標】

This course aims to provide students with advanced and integrated knowledge of intercultural communication theories and skills for research and professional practice. The course will critically analyze the key role that communication plays in developing intercultural relations and managing intercultural conflict, using various case studies from different cultures/countries. In addition, students will be able to evaluate how media and culture intersect as contested zones to influence cultural change. These contents will allow students to become aware of the diversity of cultures, become familiar with cultural variations, and develop skills in monitoring personal behavior and responding non-judgmentally to the unexpected behaviors encountered in diverse educational and workplace situations. After completing this course successfully, students should be able to engage sensitively and confidently with individuals, groups, and communities in local, national, and international communication environments.

【授業の進め方と方法】

Feedback on assignments submitted by students will be provided in class or through the Learning Management System. This course will consist of a series of lectures and various audiovisual materials using technology to provide many different cultural resources from different perspectives. In addition, each class will include interactive workshop activities focusing on group-based discussion, creating cultural resources including video clips and WebQuest lists, and problem-solving tasks. In order to develop knowledge and skills, students will be expected to participate in interactive discussions and activities and to critically engage with the weekly reading materials.

Please note that the teaching approach may vary according to which threat level we are at. The details will be announced through the Learning Management System.

【授業時間外の学習（準備学習・復習・宿題等）】

Students need to prepare for and review each session by using textbooks, references, and distributed materials.

Students will be given access to a wide range of resources through the course online site and Hosei University Library resources. These resources will include book chapters, journal articles, media articles, lecture notes, bibliographies for supplementary reading, videos, and links to external websites. Students will have the opportunity to contribute collectively to class resources by sharing their own research findings and sources with their peers. Preparatory study and review time for this class are 2 hours each.

【テキスト（教科書）】

There is no required textbook for this course. Handouts will be provided in class. Weekly required readings and assigned exercises are available on the course online site. It is STRONGLY recommended that students read the assigned readings BEFORE coming to the class of that week. In addition, they need to write online forum postings after each class for review purposes.

Business Communication

【授業の概要と目的（何を学ぶか）】

Effective communication is critical to our successful lives and careers. But the question is “How can we become an effective communicator?” In this course, we will be aiming to be effective communicators by understanding the following three topics:

(1) Effective communication with a focus on others

When we want to be a good communicator, learning how to speak and write clearly is not enough; it is important for us to improve our ability to connect with others. The ability to truly connect with others is the key to building good relationships and improving our communication. In this course, we will learn how to communicate effectively by focusing, not on our own perspective, but on the perspective of others and their interests.

(2) Understand cultural differences

Understanding cultural differences of people we communicate with is also very important for effective business communication. In this course, we will learn a model called “The Culture Map” and decode how cultural differences impact international business communication.

(3) Understand unconscious bias

Unconscious bias refers to a bias that we are unaware of, and which happens outside of our control. Unconscious bias happens when we make quick judgments and assess other people and situations. Our biases are influenced by our background, cultural environment and individual experiences. Increasing numbers of global companies are introducing in-company education programs on unconscious bias because it could be a potential obstacle for their business unless they effectively address it. In this course, we have a basic understanding of unconscious bias and learn how to deal with it.

【到達目標】

We aim at achieving the following goals:

- (1) Learn basic methodologies for effective business communication with a focus on others
- (2) Understand cultural differences in communication based on “the Culture Map”
- (3) Gain a basic understanding of unconscious bias and how to cope with it.

【授業の概要と目的（何を学ぶか）】

“Human and Environment” is an introductory-level environmental anthropology course to learn about various forms of human-environment relationship through anthropological lenses.

Through examining anthropological perspectives on the environment, students will gain basic understanding on environmental anthropology and also ability to discuss how environmental subjects are connected to broader socio-cultural issues, such as development, globalization, religion, food, and disasters.

No prior knowledge on cultural anthropology is necessary. Any students who are interested in cultural dimensions on the environment are welcomed!

【到達目標】

The goal of this course is NOT to teach solutions to environmental problems, but rather to provide tools to think critically about human-environment relations. Environmental problems are often intertwined with social issues. Through learning environmental anthropology, students will develop critical thinking skills to recognize and articulate intricate human-environment connections, which are necessary to pursue the Sustainable Development Goals, or SDGs.

【授業の概要と目的（何を学ぶか）】

This course explores how culinary tourism has been adopted as a viable strategy for revitalizing and sustaining rural society. It focuses on Japan's wine tourism and compares it with international practices of sustainable wine tourism. Wine tourism as a business serves as a lens for students to understand the complexity of economic growth and sustaining social development. Throughout the course, students explore international sustainable wine tourism practices and the ongoing projects of wine tourism in Japan, as well as examine Japan's sustainable wine tourism practices with the concept of imaginaries.

【到達目標】

The nature of this course is student-oriented and project-based. It connects the classroom and actual society. Following the lectures and discussions in the first half of the course, students will work together on designing wine tourism in Japan in the form of role-playing in the second half of this course. At the end of this course, they will evaluate their completed project according to the UN's SDGs goals. Upon the completion of this course, students will gain hands-on experience in designing a sustainable project and develop logical and critical thinking in English.

【授業の進め方と方法】

Students will find various forms of learning, including lectures, discussions, ideas exploration and role-playing in this course. In the first half of the semester, instructor will lead each class session by giving a lecture on the topic of the day. Students are required to join several rounds of group discussions in class. In the second half, students will explore and generating ideas through group work and complete a project in the form of role-playing.

These are very basic. Students are always encouraged to think beyond the box, be creative, and be their own leader of their learning experience!

【授業の概要と目的（何を学ぶか）】

This course explores the field of environmental anthropology, focusing on how humans relate to, and are influenced by, the natural environment. We will use analytical tools of anthropology to investigate human-environment interactions, and look at a wide range of topics, such as subsistence activities, endangered species, wildlife management, Traditional Ecological Knowledge, “intellectual property rights”, and zoonotic diseases. Drawing together classic anthropological ethnographies and some of the recent debates in environmental anthropology, students will think critically about the ever-changing relations between humans and environment today and discuss how such issues are connected to the socio-cultural, economic, political, and medical spheres of the societies.

【到達目標】

By the end of the course, students will obtain deep understanding of key discussions and theories of environmental anthropology. By looking at a wide range of topics with case studies around the world, students will be able to critically examine human - environment relationships and their transformations in contemporary societies.

【授業の概要と目的（何を学ぶか）】

As the global economy is becoming increasingly integrated and interdependent, the relationship between business and society is becoming more complex. Corporate management has been significantly impacted by the globalization of business, increasing new regulations, international accords such as the Paris Agreement and SDGs, and the emergence of civil society organizations. Under these circumstances, businesses today are expected to integrate social and environmental aspects into corporate management and achieve sustainable growth. In this course students will learn various topics related to business and society and understand necessary conditions for businesses to achieve sustainable growth.

【到達目標】

Students should aim at the following goals:

- (1) Understand various topics and theories related to business and society.
- (2) Analyze actual business cases with analytical frameworks students learn in class.

Week 12	The role of business leaders (3)	Solving social problems through leaders' commitment and knowledge creation Case study: multiple Japanese companies.
Week 13	Tackling social issues and business development	Analyze cases where companies have developed new markets by tackling social issues. Case study: Novo Nordisk, Unilever
Week 14	Wrap-up discussion	What is a win-win relationship for business and society?

【授業時間外の学習（準備学習・復習・宿題等）】

If students want to maximize their learning effectiveness, approximately 4 hours study (2 hours for preparation and 2 hours for review) for each class is required. Also, it can be a good exercise if students follow major economic and business topics reported in the media and try to think about them from the viewpoint of business and society.

【テキスト（教科書）】

Selected chapters of the following literature will be reviewed. Details will be explained in the first class.

- (1) Ikujiro Nonaka, Hirotaka Takeuchi (2019) "The Wise Company: How Companies Create Continuous Innovation" Oxford Univ Press.
- (2) Masaatsu Takehara, Naoya Hasegawa (2020) "Sustainable Management of Japanese Entrepreneurs in Pre-War Period from the Perspective of SDGs and ESG" Palgrave

【参考書】

Reference will be introduced in class as appropriate.

【成績評価の方法と基準】

Grading will be decided based on the following criteria:

- (1) Active class participation:30%
- (2) Students' presentation in class: 35%
- (3) Final writing assignments:35%

Details will be explained in the first class.

Please note that students who miss 4 classes or more without justification cannot receive credit.

【学生の意見等からの気づき】

If students request, they can present in class about business and society-related research topics that they are independently researching.

【授業の概要と目的（何を学ぶか）】

This course examines "peace," which is one of the "Sustainable Development Goals (SDGs)" listed in the "2030 Agenda for Sustainable Development" adopted at the United Nations Summit in 2015. The SDGs are the goal of realizing a sustainable and better society where no one is left behind, and in order to achieve that goal, the realization of "human security" is required.

Understand the concepts of "peace and security" and learn about the "threats" that impede them.

The feature of this lecture is how to maintain peace based on the "fictitious scenario" of peace by utilizing the active learning method and actually becoming a political leader or policymaker. Incorporate a policy simulation that discusses and presents the best method with other students on whether to foster it.

In addition, we will deepen our understanding of the work of achieving peace and conduct off-campus training to interview practitioners engaged in peacebuilding.

【到達目標】

- (1) What is "peace"? Organize what kind of state is called 'peace'.
- (2) Understand the concept of "security" and learn examples of what threatens 'peace'.
- (3) Learn the problems that must be overcome in creating peace through policy simulation.

【授業の概要と目的（何を学ぶか）】

This course will cover "Energy," "Infrastructure, Industrialization," in the "Sustainable Development Goals (SDGs)" listed in the "2030 Agenda for Sustainable Development" adopted at the United Nations Summit in 2015. This course also deals with economic challenges such as "innovation" and "sustainable cities".

The feature of this lecture is the way to utilize active learning methods. Students will play the roles of political leaders or policy makers to promote sustainable development based on the "fictitious crisis scenarios" related to economic problems such as food and energy crises. This is a kind of Role-playing game and students will have to think about the best solution to maximize each country's own national interests and establish multilateral or international cooperation.

This course also provides off-campus learning to interview practitioners who are active in Japanese industry working on SDGs. Through this learning, students will be able to deepen their understanding of actual policies and corporate initiatives to achieve sustainable economic growth.

【到達目標】

Through this lecture, students will understand what are "SDGs"? and organize specific examples of sustainable development. In addition, students will learn the necessity of international cooperation to realize the SDGs through the policy simulation.

【授業の概要と目的（何を学ぶか）】

The course explores topics in the history of Japan-U.S. relations from a global perspective. In recent years, global history has revealed complex interactions between goods, ideas, services, finance, and people across nation states and regions. By incorporating the framework of global history, the course will aim to reexamine the relationship between Japan and the U.S. by paying special attention to the interactions of individuals with different objectives and backgrounds in the Asia-Pacific region.

【到達目標】

By the end of this course, students will be able to:
 ① Understand the historical development of Japan - U.S. relations from a global perspective.
 ② Critically read and analyze both secondary scholarship and primary historical documents on Japan-U.S. relations by incorporating the framework of global history.

【授業の概要と目的（何を学ぶか）】

In this course, we start by discussing how arts facilitate learning, especially of current social issues related to equity, diversity, and social justice in the globalized world today. You are invited to become part of this learning community sharing your cultural and social knowledge and experience while learning from others of all majors enrolled in this course. You will experience various forms of art incorporated into social activism calling for social and ecological justice. Through this experience, you will understand social, political, and historical backgrounds associated with the given activism. Your learning will be facilitated through the modeling by the instructor as well as through peer teaching. We will also collaboratively research, discuss, and learn about non-violent peace activists from various cultures and ethnic groups in the world. This will provide you with an opportunity to consider a method and option of acting and relating to others with respect, empathy, and compassion within and across cultural borders.

【到達目標】

In this course, you will: 1) understand and appreciate artistic expressions of equity and diversity, 2) understand social activism behind artistic expressions, and 3) participate in an arts-based approach to social justice issues. You will also reflect on your own reactions to issues of equity and diversity and consider how this learning may influence your values, identities, and worldview in relation to your major field of study and career choice.

【授業の進め方と方法】

Before class you are required to work on some reading assignments. In class we study new material, complete relevant tasks in pairs or small groups, and share your discussion with the class. You are encouraged to actively participate in group work and problem-based learning (PBL). Feedback will be given orally in interaction throughout the course. Written feedback will also be provided for your writing and oral presentations within a week of your assignment submission.

【授業時間外の学習（準備学習・復習・宿題等）】

You should complete assigned reading and/or homework ahead of time and come to class ready for discussion. Review your lesson after class and complete reflective writing when assigned.

For your presentations, develop a peer teaching session on artistic expressions of diversity or equity issues (Micro Teaching) and creative multi-media talk on a social activist of your choice (Mini-Research presentation). Prepare a presentation and discussion appealing and engaging for your peers and rehearse it to be effective.

University guidelines suggest the preparation and review time of around two hours a week for a two-credit course like this one.

- 1) Attendance and participation (20%)
- 2) Micro teaching and mini research presentations (50%)
- 4) Online reactive writing (16%)
- 5) Final reflection (14%)

Regular attendance is essential in order to benefit from the interactive nature of this course. You will not be able to pass this course if you miss more than three class periods a semester except in extreme circumstances.

【学生の意見等からの気づき】

Message to the course participants:

This is a course that requires you to share your ideas, knowledge, and experiences. You will meet interesting peers from various cultures and learn from working with them as well as the instructor. Be ready to interact with different peers each time.

This course is conducted in English. Students must be competent speakers of English (native or proficient with TOEFL® iBT 81+ or equivalent). If your scores are TOEFL® iBT 81 - 100, you can take this course but be ready to make a little more thorough preparation each week.

I expect international and Japanese students of all majors to work collaboratively despite their different cultural and linguistic backgrounds. Come with an open mind and learn from each other!

The course consists of lectures, class discussions, group activities, and student presentations (depending on the number of enrolled students).			
All work is carried out in English in class and that includes interaction between students and from students to teacher. Students will deal with reading various historical and academic texts, looking at visual documents such as pictures and diagrams, watching videos, then they will discuss these, try to answer questions, and apply strategies to solve problems. The format of the course will be as interactive and participatory as possible, with the help of screened slides in order to explain important facts and/or concepts.			
The key to success in this course is weekly preparation and review of the class content, and active participation during class discussion and group works, in order to build a common knowledge about the history of France in a global perspective.

【授業の概要と目的（何を学ぶか）】

The UN 2030 Agenda for Sustainable Development (Sustainable Development Goals: SDGs) has come to be recognized as a common challenge for the human society, which is a manifestation of the severity of various problems we as a species are faced with. In light of this current situation, this course focuses on the concept of "sustainability" so as to provide students with an opportunity to learn about basic scientific aspects of environmental problems and also to learn about relevant social issues in an attempt to provide a holistic view of human impact on the global environment.

【到達目標】

This course is designed to teach about ecological and social issues. Therefore, the course objectives are: 1) to understand basic scientific concepts required to comprehend various environmental problems; 2) to understand social problems related to the environmental problems addressed in this course; and 3) to form personal perspective and opinion about the current state of human society by understanding the interrelated nature of the environmental and socioeconomic problems.

Week 3	Water cycle and the use of water resource	As an essential matter for sustaining life and ecosystem, the water cycle and use of water resource will be discussed.

Week 4	Energy supply	Energy supply in ecosystem and energy issue in the human society will be discussed.
Week 5	What is "soil"?	The importance of soil in an ecosystem will be discussed in relation to ongoing environmental problems.
Week 6	What is biodiversity and why is it important?	Basic features and current state of biodiversity will be discussed in relation to its importance for the human society.
Week 7	Applied ecology for sustainable resource management	Group activity is used to integrate the concepts learned in the previous lectures and apply them to ecological problem solving.
Week 8	Ecological issues of modern agriculture	Positive and negative impacts of agricultural modernization will be discussed.
Week 9	Food production and environmental conservation	Approaches to achieving food security without degrading environment will be discussed with concrete examples.
Week 10	Is development sustainable?	Focusing on mineral resources, issues related to demand and supply of natural resources will be discussed.
Week 11	Consequences of "unwanted" development	Environmental and social problems caused by "development" in the developing world will be discussed.
Week 12	Understanding multi-stakeholder problem solving	Group work will be used to integrate the concepts learned in the previous lectures and apply them to socio-ecological problem solving.
Week 13	Toward a sustainable society	Alternative models that may help build a sustainable society will be discussed.

回	テーマ	内容
Class day 1	Introduction and Multimedia processing (Jinjia Zhou)	Overview of the topics in the field of computer science and information technology which will be taught in the class.
Class day 2	Information Networks (Keping Yu)	Key concepts and techniques in the next-generation Internet such as Content-Centric Networking / Named Data Networking.
Class day 3	Software Engineering 1 (Taro Kurita)	The basic concepts of agile software development, including manifesto for agile software development, principles behind the agile manifesto, and scrum, which is an agile framework.
Class day 4	Software Engineering 2 (Taro Kurita)	The basic concepts of user interface (UI) and user experience (UX), including human machine interface (HMI), user experience design (UXD), and human centered design (HCD).
Class day 5	Image and Intelligent information processing 1 (Hitoshi Iyatomi)	Fundamentals of image processing, image recognition and analysis.
Class day 6	Image and Intelligent information processing 2 (Hitoshi Iyatomi)	Computer vision, machine learning, deep learning, text mining and their medical engineering applications.
Class day 7	Biomimetic and AI electronic circuits 1 (Hiroyuki Torikai)	Fundamentals of biomimetic electronic circuit
Class day 8	Biomimetic and AI electronic circuits 2 (Hiroyuki Torikai)	Fundamentals of AI electronic circuit
Class day 9	Pattern recognition 1 (Kaoru Uchida)	Fundamentals of pattern recognition and real world application.

Class day 10	Pattern recognition 2 (Kaoru Uchida)	Biometrics and business innovation through computer and information sciences.
Class day 11	Ubiquitous systems software and artificial intelligence 1 (Runhe Huang)	Knowledge representation and configuration, knowledge discovery and fusion, human cognitive process modeling.
Class day 12	Ubiquitous systems software and artificial intelligence 2 (Runhe Huang)	Brain modeling for Internet machine/robot/system/organism/biomass, self-observation, self-learning, self-organization based self-evolutionary brain model.
Class day 13	Computer system design and innovation 1 (Akihiro Fujii)	Fundamentals of computer system design, distributed system design, semantic web.
Class day 14	Computer system design and innovation 2 (Akihiro Fujii)	Computer system design and innovation 2 Web-service, collective intelligence and innovative business applications

【授業の概要と目的（何を学ぶか）】

This course gives a multidisciplinary overview of Bioscience and Applied Chemistry, and how they contribute to a progressive yet sustainable society. Faculty members of three departments: Frontier Bioscience, Chemical Science and Technology, and Clinical Plant Science, will present in an easy-to-understand manner how their respective fields are contributing to the improvement of both humankind and nature.

【到達目標】

The foremost goal of this course is to get the enrolled student acquainted with an introductory course delivered in English that demands active participation. In addition, through this course, the student will acquire a basic knowledge of Bioscience and Applied Chemistry, emphasizing the importance of coexistence between human beings and the environment, the crucial role of improving, expanding and renewing resources, in order to create a sustainable society for future generations.

【授業の進め方と方法】

Lectures will be delivered once every week by different faculty members who will address his/her specialty topic. Depending on the instructor, main activities in each class might involve reading, writing, listening, presentations and discussions.

As this course will be delivered in the online format, students from campuses other than Koganei (and even from overseas) are welcome to participate. Timetable will be adjusted appropriately at the first session.

回	テーマ	内容
1	Introductory notes. (AT)	The purpose of this course. Key notes on the scope of this course. Interests and background.
2	Brief description of the birth and evolution of universe and the Earth. (AT)	Origin of the elements. "We are stardust". Proto-atmosphere. Are "rare metals" really rare?
3	Evolution of oxygen and water on Earth (AT)	Was oxygen ever present in the Earth atmosphere? Where did water come from? How do we know?

4	Emergence of vestigial forms of life and the Big Mass Extinctions (AT)	The origin of life. The persistence of life. Periodic fluctuations in forms of life on Earth. The many times life on Earth almost was annihilated.
5	The concept of Gaia (AT)	James Lovelock and the Gaia Theory. A simulation for the interrelationship between Biosphere and Lithosphere.
6	The Three Pillars (3BL) of Sustainability (AT)	John Elkington's Triple Bottom Line for sustainable development. The need for an integrated approach.
7	The importance of going from Linear to Circular (AT)	Evolution of human society. The need for a sustainable development. Good intentions are not good enough.
8	The many footprints of human development (AT)	What are they, and why it is so important to know what your values are. Is global warming real?
9	Exploitation of natural resources (AT)	Unsustainable exploitation of Nature. Production and consumption. The Energy Problem. Pollution. Waste management. Recycling.
10	Genetically-modified organisms (GMO) (TA)	What are they? Concerns and safety. The Importance of being discriminating. Are GMOs that bad?
11	Organic Chemistry and Organosilicon Chemistry (AK)	Carbon and silicon belong to the same Group 14. What are the similarities and differences between carbon and silicon?
12	Environmental chemistry and technology (YW)	What is environmental chemistry? The chemistry of continental waters. Synthesis, characterization, and properties of environmentally friendly inorganic materials.
13	Clinical Plant Science (HH)	Biological characteristics of plant pathogenic bacteria.
14	Skeletal muscle physiology and biology (EO)	Physiological and biological responses in skeletal muscle to exercise and physical activity.

【授業時間外の学習（準備学習・復習・宿題等）】

【本授業の準備・復習等の授業時間外学習は、4時間を標準とする】 Students are expected to review class materials and handouts that will be available through the Hoppii system. Further study on each topic is encouraged. Full active participation of students in discussions is encouraged and will be graded.

【テキスト（教科書）】

Due to the nature of emerging technologies and the multi-disciplinary nature of the course, no textbook in particular is necessary, but important reference materials are listed below. Hand-outs and references will be distributed for each class, or made available in advance through the system Hoppii.

【参考書】

(1) "Life in the Universe", by Sagan, C., Gould, S.J., Minsky, M. & Weinberg, S. Scientific American, 1984; (2) Gaia: A New Look at Life on Earth", by James Lovelock (Oxford Landmark Science, 2016); (3) "The Circular Economy", by Walter R. Stahel, Taylor and Francis Group, 2019.

"Human Scale Development" (1989) Manfred Max-Neef et al. Development Dialogue, Other references for further study will be introduced in each class, and can be downloaded from the supporting system Hoppii.

Other relevant references will be made available.

【成績評価の方法と基準】

Grading will be assessed on the student's performance in each class, based on reports, active participation, presentations, and discussion.

【学生の意見等からの気づき】

Topics that required more attention have been expanded. Compared with previous years, some topics have been renewed as new lecturers join the present course.

This is an Open-Global Course, and therefore, students from other campuses different from Koganei are also welcome to enroll. Considering the timetable difference from different campuses, appropriate adjustments will be arranged during the first session.

【学生が準備すべき機器他】

For online classes, computers with audiovisual capabilities and internet access are required. Some, if not most materials can be downloaded prior or during class via the Hoppii system.

【授業の進め方と方法】

This course will first give general introductions of ubiquitous computing, essential devices, important networks and representative services, and then check various ubiquitous intelligent devices including RFID, e-tag, sensors, handhelds, wearable devices, robots, IoT, etc. as well as their representative applications. The context as a special kind of information in ubiquitous intelligence will be described in details and related context-aware intelligent technologies, systems and application will be presented. Various key issues in ubiquitous computing smartness, intelligence, security, safety, trust and related social issues will be discussed. In each class, a student is requested to write a summary of main content learnt in the the class. Students are also requested to write four reports corresponding to the four parts of this course. Students are encouraged to ask questions in class and via email after class. The students' reports will be checked and feedbacked to students in next classes.

【授業の概要と目的（何を学ぶか）】

This course is an introduction to Japanese Culture Studies and aims to familiarize students with cultural ideologies that have helped shape contemporary Japanese culture. In the spring course, we will explore core aspects of the Japanese cultural landscape and identity by examining a variety of texts related to Japanese culture, including concepts such as religion, cultural values, and behavior patterns.

【到達目標】

Through this course, students will be able to:

1. gain knowledge related to the field of Japanese Culture Studies (Nihonbunkaron).
2. understand basic concepts and characteristics of Japanese culture.
3. explore and relativize their background knowledge of Japanese culture from different perspectives.

【授業の概要と目的（何を学ぶか）】

Japan's economy witnessed a fast growth after world war II. But ever since 1989, Japan's imploding stock bubble threw the country into a deep financial crisis, resulting in the famous "lost decades". And the stagnation continues especially after the world economic crisis hit in 2008. This will be one-year course. In the 1st semester, we will mainly take a macroeconomic perspective, and look at the reality and problems of Japanese economy from 1980s in a big picture, such as economic growth, financial and monetary policies, "the lost decade" and Abenomics.

【到達目標】

The purpose of this course is twofold: to arouse the students' interest towards the happenings that are related to Japanese economy, in a globalized context; and to equip students with the basic knowledge to reasonably question the phenomenon during the process of Japan's globalization, from the standpoint of economics.

【授業の概要と目的（何を学ぶか）】

The aim of this course is to help IGESS students to gain a deeper understanding of the global economy and business through the study of one specific industry, fashion. Over the course of the semester, students will analyze the environmental and social impacts of this industry and consider what is being done (or not being done) to make this industry a more sustainable one.

【到達目標】

By the end of the course, IGESS students will acquire a broader understanding of some of the major economic and social issues facing the global fashion industry and the environmental implications of its business model.

【授業の概要と目的（何を学ぶか）】

We will discuss the globalization of economics from mainly two important perspectives: international trade and foreign direct investment (FDI). In the first half, we will investigate why countries trade, types of trade, and study some of the benefits and costs of trade. In the second half, we will study why firms choose the form of FDI, the determinants of FDI, the spillover impact of FDI on the host countries. Various policies that different governments implement to promote globalization will also be studied.

【到達目標】

The purpose of this course is twofold: to arouse the students' interest towards the happenings that are related to international economics; and to equip students with the basic knowledge to reasonably question the phenomenon during the process of globalization, from the standpoint of economics.

【授業の概要と目的（何を学ぶか）】

After the second world war, Japan has followed a very distinct development path with unique economic policy choices and pragmatic state-led industrialization. This course intends to cover the Japanese economic model and the remarkable patterns of development in South East Asia. Specifically, the course highlights some of the most pertinent macroeconomic concepts to bind the empirical path of economic development in Japan and ASEAN. Each class consists of two parts: (1) lecture and (2) students' presentations of the assignment. At the end of the course, students are also required to submit a short report.

【到達目標】

1. Introduce the historical economic perspective about Japan and ASEAN
2. Impart macro-economic tools to understand and analyze economic development in the region

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The class is designed to be:

1. Interactive: With a strong emphasis on student participation.
 2. Up-to-date: With the real-time explanation of unfolding events.
 3. Critical and Analytical: Understanding the whys and hows of the global economy.
 4. Accessible: Breaking down the complex jargon in simple terms.
- Each class consists of two parts: (1) lecture and (2) discussion. Active participation is required.

Two-Way Interaction:

Students will be able to partly design this course by participating in regular surveys and writing weekly posts on Hoppii. After the submission of each assignment, the instructor will give feedback or remedial explanation via an online forum and/or in the weekly session.

【授業の概要と目的（何を学ぶか）】

After the second world war, Japan has followed a very distinct development path with unique economic policy choices and pragmatic state-led industrialization. This course intends to cover the influence of the Japanese economic model on remarkable patterns of development in South East Asia. Specifically, the course highlights some of the most pertinent macroeconomic concepts to bind the empirical path of economic development in Japan and ASEAN.

Each class consists of two parts: (1) lecture and (2) students' presentations of the assignment. At the end of the course, students are also required to submit a short report.

【到達目標】

1. Introduce the historical economic perspective about Japan and ASEAN
2. Impart macro-economic tools to understand and analyze economic development in the region

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The class is designed to be:

1. Interactive: With a strong emphasis on student participation.
2. Up-to-date: With the real-time explanation of unfolding events.
3. Critical and Analytical: Understanding the whys and hows of the global economy.
4. Accessible: Breaking down the complex jargon in simple terms.

Each class consists of two parts: (1) lecture and (2) discussion. Active participation is required.

Two-Way Interaction:

Students will be able to partly design this course by participating in regular surveys and writing weekly posts on Hoppii. After the submission of each assignment, the instructor will give feedback or remedial explanation via an online forum and/or in the weekly session.

【授業の概要と目的（何を学ぶか）】

The focus of this course is on providing a deep dive into the Japanese economy and business. The participants learn the implications of the policy decisions and their impact on the state of the economy. The course seeks to provide an understanding of the historical and institutional background of the contemporary Japanese economy.

We use a wide range of sources, covering academic literature, business case studies, and topical news items as well as op-ed pieces to understand the various aspects of Japanese business. Each class consists of two parts: (1) lecture and (2) students' exercises. In the second half of each lecture, students are expected to participate in various exercises. Exercises are followed by short class-discussion to develop the take-aways. Students are also required to take short quizzes.

【到達目標】

The course intends to cover:

1. The brief economic history of Japan
2. The institutional basis of the contemporary Japanese economy
3. The characteristics of Japanese business practices

【授業の概要と目的（何を学ぶか）】

経済学の様々な分野に応用されているミクロ経済学を、理論の単なる学習、吸収に留めず、現実の様々な経済活動への応用力を培うことも目標にして学んでいきます。2年次、3年次には、先行研究をサーベイした進級論文を、4年次にはそうしたサーベイによって発見した新たな論題に取り組んだ卒業論文を執筆します。

【到達目標】

プレゼン力、ディスカッション能力、経済学概念・理論の理解、現実へのその応用力、文献知識、論文作成力

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

各回、テーマに即して教科書や参考書から発表して行きます。レジュメの作成、プレゼンやディスカッションの練習、そして、進級論文や卒論にむけた論題探しに役立てて行きます。

進級論文の指導は、6月より開始し、取り扱う先行研究を春学期中に確定させます。秋学期には、先行研究のレジュメ、共通理解や相違点、今後の課題について整理していきます。

例年、学生研究報告大会に3名のゼミ生が発表しています。大会の出場については、独自の分析が必須になります。大会出場者には、そのためのアドバイスを行います。

ゼミにおけるパフォーマンスについては、論文指導時、また、学期途中で中間評価を示し、フィードバックします。

【Outline (in English)】

【Course Outline】

This course deals with intermediate microeconomics. It also enhances the development of students' skill in microeconomic applications and communication/presentation.

【Learning Objectives】

At the end of the course, students are expected to write and present a term paper. By the end of the course, students should be able to analyze and explain actual economic phenomena.

【Learning activities outside of classroom】

Students will be expected to have completed the required assignments after each class meeting. Furthermore, before each class meeting, students will be expected to have read the relevant chapter(s) from the text. Your required study time is at least four hours for each class meeting.

【Grading Criteria/Policy】

Your overall grade in the class will be decided based on the following:

Seminar II

奥山 利幸

開講時期：秋学期授業/Fall | 単位数：4単位
 曜日・時限：火4/Tue.4, 火5/Tue.5 | キャンパス：多摩 / Tama
 毎年・隔年： | 科目主催学部：Economics
 備考（履修条件等）：
 その他属性：

【授業の概要と目的（何を学ぶか）】

経済学の様々な分野に応用されているミクロ経済学を、理論の単なる学習、吸収に留めず、現実の様々な経済活動への応用力を培うことも目標にして学んでいきます。2年次、3年次には、先行研究をサーベイした進級論文を、4年次にはそうしたサーベイによって発見した新たな論題に取り組んだ卒業論文を執筆します。

【到達目標】

プレゼン力、ディスカッション能力、経済学概念・理論の理解、現実へのその応用力、文献知識、論文作成力

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

各回、テーマに即して教科書や参考書から発表して行きます。レジュメの作成、プレゼンやディスカッションの練習、そして、進級論文や卒論にむけた論題探しに役立てて行きます。

進級論文の指導は、6月より開始し、取り扱う先行研究を春学期中に確定させます。秋学期には、先行研究のレジュメ、共通理解や相違点、今後の課題について整理して行きます。

例年、学生研究報告大会に3名のゼミ生が発表しています。大会の出場については、独自の分析が必須になります。大会出場者には、そのためのアドバイスをを行います。

ゼミにおけるパフォーマンスについては、論文指導時、また、学期途中で中間評価を示し、フィードバックします。

【アクティブラーニング（グループディスカッション、ディベート等）の実施】あり / Yes

【フィールドワーク（学外での実習等）の実施】なし / No

【授業計画】 授業形態：対面/face to face

回	テーマ	内容
1	生産者(1)	生産関数、限界生産性、平均生産性、等量曲線
2	生産者(2)	費用関数、限界費用、平均費用
3	生産者(3)	短期 vs. 長期、損益分岐点、操業中止点、供給曲線
4	均衡(1)	マーシャル分析、ワルラス分析 (1) 純粋交換経済
5	均衡(2)	ワルラス分析(2) 生産経済
6	均衡(3)	エッジワース分析 (コア)
7	厚生(1)	厚生経済学の第1基本定理
8	厚生(2)	厚生経済学の第2基本定理
9	不確実性	くじ、期待効用、保険、条件付商品、総量リスク
10	メカニズム・デザイン入門	社会的選択関数、メッセージ、メカニズム、ナッシュ遂行
11	社会的選択	社会的厚生関数、アローの不可能性定理
12	遂行(1)	配戦略遂行、ナッシュ遂行、マスキンの単調性
13	遂行(2)	クラークメカニズム、ハーヴィッツ定理
14	進級論文発表	プレゼンテーション、ディスカッション

【授業時間外の学習（準備学習・復習・宿題等）】

プレゼンの用意、教科書の予習・復習、論文論題関係先行研究のサーベイ、論文作成本授業の準備学習・復習時間は、各2時間を標準とします。

【成績評価の方法と基準】

ゼミ上のパフォーマンス(60%)、進級論文(40%)

【学生の意見等からの気づき】

ゼミを益々活性化させるために、一緒に精力的に活動して行きましょう。

【Outline (in English)】

【Course Outline】

This course deals with intermediate microeconomics. It also enhances the development of students' skill in microeconomic applications and communication/presentation.

【Learning Objectives】

At the end of the course, students are expected to write and present a term paper. By the end of the course, students should be able to analyze and explain actual economic phenomena.

【Learning activities outside of classroom】

Students will be expected to have completed the required assignments after each class meeting. Furthermore, before each class meeting, students will be expected to have read the relevant chapter(s) from the text. Your required study time is at least four hours for each class meeting.

【Grading Criteria/Policy】

Your overall grade in the class will be decided based on the following:

Term paper:40%, in class contribution:60%

【授業の概要と目的（何を学ぶか）】

本演習の目的は、1) 経済学の全般的な知識の習得、2) エビデンスに基づいた議論を通じて各々の将来のキャリアにも役に立つ学術スキルを身につけることです。

【到達目標】

2・3年生は、レポート/論文の書き方、ディスカッション、プレゼンテーション、実証分析の手法の習得、英語文献の精読等を通じて、さまざまな学術スキルを身につけます。
 4年生は学術的に質の高い卒業論文を書くことを目指します。

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

少人数演習形式で学生による発表を中心に進めます（春学期：3年生主体、秋学期：2年生主体）。発表に関してはゼミ員からの積極的なフィードバックのもとで授業をすすめます。また講義時間の一部を使って学生主導のグループワーク（以下「サブゼミ」）も随時行います。

授業形態につきましては、通常は対面を基本としますが、事前に申出のあった場合にズームを用いたオンライン参加も可能とします。完全オンライン方式は一学期につき最大7回まで採用する可能性があります。各講義回の形態については講義中のアナウンスや一斉メールなどを通じて事前に通知します。

4年次は卒論執筆を希望する人のみの履修となります。その場合3年の秋学期の講義最終日までに研究計画書を教員に提出してください。卒論トピックは経済学関連であれば自由です。

4年生は卒論（日本語・英語いずれも可）を必ず仕上げることを前提に履修してください。毎週のゼミへの出席は求めません。

13	面談	主に3年生を対象に面談実施
14	面談	主に2年生を対象に面談実施

【授業時間外の学習（準備学習・復習・宿題等）】

本授業の準備学習・復習時間は、各2時間を標準とします。それ以外でも日々の経済ニュースを各種メディアを通じて吸収するよう心がけてください。

ゼミ時間外の親睦活動として新入生歓迎会（2～3月、2・3年生対象）、ゼミOB会（11月、全学年対象）、謝恩会（3月、3・4年生対象）があります。

外部スピーカーによる特別講演回においては先方の都合により講義時間が時間割から若干ずれる可能性があります。

【テキスト（教科書）】

春学期分は第1回目の講義前に教員が発表します。

秋学期分は5月中にゼミ員の投票によって決定します。

 ・カーネマン『ファスト&スロー（上）』、ハヤカワ文庫 NF、2014年

【成績評価の方法と基準】

2・3年生：課題内容（60%）、質疑応答等による貢献（40%）の合算により決定します。無断欠席は禁止です。評価Cで単位認定の場合は、翌年のゼミ履修は許可しません。

4年生：卒業論文内容（60%）および教員へのズームによる経過報告（40%）の合算により決定します。

【学生の意見等からの気づき】

・演習科目につき大学を通じた匿名アンケートは実施していませんが、希望があれば直接教員かゼミ代表（匿名保持）に申し出てください。

・合宿は参加者が主体的に計画し教員に具体的な提案があった場合に正式なゼミイベントとして実施します。

・学生相互のディスカッションを重視するため、教員の発言は総時間の10%以内に収まるよう努めます。

【学生が準備すべき機器他】

ノートパソコン、タブレット、スマホのいずれかを常時持参してください。

ズームによる講義を行う場合、カメラは基本的にオンのままとしていただきますので、自宅や外出先から受講される方は安定したインターネット接続環境をあらかじめ整えておいてください。

【その他の重要事項】

私のゼミでは好奇心が強く他の人からいろいろな刺激を受ける柔軟性を持ち合わせつつ、いずれは自分独自のキャリアを築いていきたいと思うタイプの人を歓迎します。卒業する頃には勉強は楽しいと思えるように一緒に活動していきましょう！

【授業時間外の学習（準備学習・復習・宿題等）】

本授業の準備学習・復習時間は、各2時間を標準とします。それ以外でも日々の経済ニュースを各種メディアを通じて吸収するよう心がけてください。

ゼミ時間外の親睦活動として新入生歓迎会（2～3月、2・3年生対象）、ゼミOB会（11月、全学年対象）、謝恩会（3月、3・4年生対象）があります。

外部スピーカーによる特別講演回においては先方の都合により講義時間が時間割から若干ずれる可能性があります。

【テキスト（教科書）】

春学期分は第1回目の講義前に教員が発表します。
 秋学期分は5月中にゼミ員の投票によって決定します。

【参考書】

【成績評価の方法と基準】

2・3年生：課題内容（60%）、質疑応答等による貢献（40%）の合算により決定します。無断欠席は禁止です。評価Cで単位認定の場合は、翌年のゼミ履修は許可しません。

4年生：卒業論文内容（60%）および教員へのズームによる経過報告（40%）の合算により決定します。

【学生の意見等からの気づき】

・演習科目につき大学を通じた匿名アンケートは実施していませんが、希望があれば直接教員かゼミ代表（匿名保持）に申し出てください。
 ・合宿は参加者が主体的に計画し教員に具体的な提案があった場合に正式なゼミイベントとして実施します。
 ・学生相互のディスカッションを重視するため、教員の発言は総時間の10%以内に収まるよう努めます。

【学生が準備すべき機器他】

ノートパソコン、タブレット、スマホのいずれかを常時持参してください。
 ズームによる講義を行う場合、カメラは基本的にオンのままとしていただきますので、自宅や外出先から受講される方は安定したインターネット接続環境をあらかじめ整えておいてください。

【その他の重要事項】

私のゼミでは好奇心が強く他の人からいろいろな刺激を受ける柔軟性を持ち合わせつつ、いずれは自分独自のキャリアを築いていきたいと思うタイプの人を歓迎します。卒業する頃には勉強は楽しいと思えるように一緒に活動していきましょう！

Seminar I

田中 優希

開講時期：春学期授業/Spring | 単位数：4単位
 曜日・時限：月4/Mon.4, 月5/Mon.5 | キャンパス：多摩 / Tama
 毎年・隔年： | 科目主催学部：Economics
 備考（履修条件等）：
 その他属性：

【授業の概要と目的（何を学ぶか）】

ゼミのテーマは企業行動分析です。新聞やテレビで目にする企業のことを、皆さんはどれだけ知っているでしょうか。就職活動をする時に、どの会社が「良い会社」なのかをどうやって調べますか。企業には戦略があります。ゼミではそうした戦略と企業のパフォーマンスとのつながりを、皆さんの力で明らかにしてください。分析手段のひとつとして財務情報を用いますが、戦略分析、資本市場分析、企業評価手法、マクロ経済分析、コーポレート・ガバナンス、企業の社会的責任など、企業行動の理解のためには財務会計以外の領域も扱います。

【到達目標】

新たな知識の獲得だけでなく、その知識を応用する力を実践しながら身につけていきましょう。共同作業やプレゼンテーションを通じて、社会で活躍するスキルの向上と、生涯を通じて信頼できる仲間を獲得することを目指します。

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

グループワークを中心にを行います。メンバーの知識水準に応じて、ゼミの前半では財務会計や基本的な戦略フレームワークの学習を行い、徐々に実際の企業の分析に移ります。自身の関心を積極的に知らせてください。ゼミ中の質問や提出された課題には、直接またはメール等でフィードバックを行います。4年生は卒業論文の執筆に向けて定期的に教員と面談することとし、提出後の論文に対して評価を行います。

【Outline (in English)】

The theme of this seminar is corporate behavior analysis. How much do you know about the companies you see in newspapers and television? How do you find out which company is a "good company" when you are looking for a job?

Companies have a strategy. In this seminar, please clarify for yourself the connection between strategy and corporate performance.

We use financial information as one of the means of analysis. In addition, we also deal with areas other than financial accounting for understanding corporate behavior, such as strategic analysis, capital market analysis, corporate valuation methods, macroeconomic analysis, corporate governance, and corporate social responsibility.

Learning Objectives:

Not only capturing the knowledge but applying it to practical situations through group work and joint presentation, students should improve their skills and be connected to reliable lifelong partners.

Learning activities outside of classroom:

Before/after each class meeting, students will be expected to spend four hours in total to understand the course content.

Grading Policies:

Your overall grade will be decided based on the quality of your presentations in the class (50%), and your class participation including inter-college activities (50%).

The goal of the course is to bring students to a level where they are able to write a social psychology paper in English. This will involve incorporating survey and statistical analysis, presenting the finding and discussing it in English, and independently planning and conducting an event. Students are expected to spend at least two hours studying before each class and carry out their own research for an additional two hours after class. Attendance at all seminar-related events, such as seminar camps, is mandatory. The grading criteria are based on 40% presentation, discussion, and group work in the classroom; 30% research paper; and 30% seminar-related events.

【授業の概要と目的（何を学ぶか）】

This applied seminar explains in simple terms how to invest and trade in the financial market with a consistent track record. Alongside we will cover basic theoretical and empirical frameworks about investment and research in general. Thanks to the competitive pressure of the investment game during the seminar, students learn the fundamentals of decision-making, as well as the analysis of the information. The course covers the history and anatomy of financial markets and unified treatment of the three prime financial asset classes, viz. stocks, bonds, derivatives. Topics are organized in a way that makes them easy to apply — covering both fundamental and technical analysis. Throughout the seminar, the actual trading of securities will be explained along with the use of indicators analyzing price action and pattern recognition.

【到達目標】

1. To analyze key macroeconomic variables in real-time and interpret their influence on financial markets
2. To assess various investment strategies using analytical tools
3. To gain an ability to construct an objective oriented investment portfolio

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The students are expected to participate in a stimulating real-time portfolio investment game that faithfully and realistically mimics the market and thereby exposes the participants to the choices/trade-offs faced by professional traders and investment companies.

The late-stage seminar would also offer frequent interactions with/exposure to the financial market participants such as regulators, financial economists, investment banks, VCs, Hedge Funds, Startups, and other companies raising capital.

【授業の概要と目的（何を学ぶか）】

本演習のテーマは、ファイナンス・証券投資という担当教員の専門分野を通じて、PC能力および文章表現能力の向上を目指し、大学卒業後にできるだけ実践可能な能力を身につけることにある。

【到達目標】

本演習の目的は、証券投資や資産運用に応用可能な基本的なフレームワークを身につけて、それを実践可能なレベルに到達することである。また、グループワークによる論文（レポート、ショートペーパー等）執筆活動やプレゼンを通じて、文章力・表現力を向上させることも主要な目的である。

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

演習は2年生は基本的な知識の習得をメインとし、アカウンティング、ファイナンスの基本を習得し、3年生時に学習する内容となるリスク管理、コーポレートファイナンスの基礎をつくる。演習履修者は通読するテキストを事前に精読し、教員の進行に従い、適時質問に答える必要がある。この他、2/3年生ともに月1回程度でグループワークでのプレゼンテーションが課される。

【アクティブラーニング（グループディスカッション、ディベート等）の実施】あり / Yes

【フィールドワーク（学外での実習等）の実施】なし / No

【授業計画】 授業形態：対面/face to face

回	テーマ	内容
1	春学期の授業実施方針の説明	春学期の演習の進め方についての説明、ファイナンスを学習する意義、担当の割り振りを行う
2	貨幣の時間価値	現在価値、将来価値
3	投資意思決定基準	正味現在価値、IRR
4	キャピタルバジエツティング	企業による投資意思決定
5	キャピタルバジエツティング応用	複雑なキャッシュフローを持つ投資案
6	グループワーク発表1	財務諸表分析
7	割引率の選択	割引率、成長率が企業価値に与える影響
8	企業価値評価	財務諸表から企業価値を計算する
9	グループワーク発表2	事例を用いて企業価値の計算
10	効率的市場仮説	3つのEMH、無裁定理論
11	債券、株式評価	企業のCF、配当から証券の価値を計算する
12	コーポレートファイナンスの基本	資本構成と企業価値
13	資本構成が企業価値に与える影響	税の影響、エージェンシー理論
14	配当政策	配当と自社株買い

【授業時間外の学習（準備学習・復習・宿題等）】

演習の目的は、学習した内容を実践できることが求められる。指定したテキストは事前精読、実践してくること（週2時間）。また、演習内で扱う範囲の理解だけでは十分とは言えず、指定テキストの章末問題を利用して自ら知識の拡充をはかることが求められる（週1時間）。また、より現実的な課題をグループワークを通してこなしてもらうことで、自分の知識の再確認を行ってもらう。それらの内容をまとめて提出するための時間も確保すること（平均して、週1時間）。

【成績評価の方法と基準】

グループワークによるプレゼン内容の評価50%、平常点50%で評価する。なお、無断欠席を1回でもした場合、平常点として減点対象とする。また、無断欠席を2回した場合は評価が自動的に「不可」となる。欠席は理由を明記して、ゼミ当日の14時半までに担当教員にメールなどの直接連絡が取れる手段で連絡すること。第三者から伝達および不明瞭な理由による欠席は、どのような理由があろうとも無断欠席と同じ扱いになる。理由を明記した上で欠席でも平常点（減点）として評価に反映される。2年次の学生に関しては報告時の欠席や無断欠席等で評価が「B」以下になった受講生は原則として3年次におけるゼミ活動が困難と判断し、進級を認めない。

【学生の意見等からの気づき】

グループワークによるプレゼンを行う回と教員主導によるテキストの内容を理解する回に分けるという試みが学生から好評のため、今年度も継続する。

【学生が準備すべき機器他】

各自がPCを持参して、演習中もEXCELを利用できる環境下にあることが求められる。

【Outline (in English)】

This seminar-styled course provides an introduction to the theories and the methods in investment analysis and corporate finance using data and simulation-based analyses. This course also provides opportunities to improve writing and PC skills to achieve the goal that students can write short academic reports or papers based on their acquired skills. Before each class meeting, students will be expected to spend two hours to prepare the course content. Students are also required to spend one hour for reviewing the content after each class and another one hour for solving some problems useful to deepen their understanding. Final grade will be calculated according to the following process: group work reports (50%) and in-class presentations and discussions (50%).

【授業の概要と目的 (何を学ぶか)】

本演習のテーマは、ファイナンス・証券投資という担当教員の専門分野を通じて、PC能力および文章表現能力の向上を目指し、大学卒業後にできるだけ実践可能な能力を身につけることにある。

【到達目標】

本演習の目的は、証券投資や資産運用に応用可能な基本的なフレームワークを身につけて、それを実践可能なレベルに到達することである。また、グループワークによる論文(レポート、ショートペーパー等)執筆活動やプレゼンを通じて、文章力・表現力を向上させることも主要な目的である。

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか(該当授業科目と学位授与方針に明示された学習成果との関連)】

【授業の進め方と方法】

2年生時に学習した内容を発展させることを目的とした学習を行う。具体的には、2年生はアカウンティング、ファイナンスの基本を習得し、リスク管理、コーポレートファイナンスに注目した、より実践的な演習を行う予定である。演習履修者は通読するテキストを事前に精読し、教員の進行に従い、適時質問に答える必要がある。3年生時に利用するテキストは2年生時に利用したテキストの上位互換となる。この他、2/3年生ともに月1回程度でグループワークでのプレゼンテーションが課される。

【アクティブラーニング(グループディスカッション、ディベート等)の実施】あり / Yes

【フィールドワーク(学外での実習等)の実施】なし / No

【授業計画】 授業形態: 対面/face to face

回	テーマ	内容
1	秋学期の授業実施方針の説明	秋学期の演習の進め方についての説明、目的、担当の割り振りを行う
2	リスク	3つのEMH、無裁定理論
3	リスク分散化	ポートフォリオ理論
4	グループワーク発表3	株価の過大/過小評価の議論
5	CAPM	投資信託のパフォーマンスを評価する
6	CAPMの応用	CAPMで企業価値評価における割引率を求める
7	CAPMで企業価値評価における割引率を求める	日本の投資信託のデータを利用してファンドのアルファを計算する
8	グループワーク発表5	企業の資金調達手段に関するケーススタディ
9	オプションの基本	オプションのペイオフ
10	オプションの価格付け1	オプションの価格付け(二項モデル)
11	オプションの価格付け2	ブラックショールズモデル
12	シミュレーションベースのオプション評価	モンテカルロ法を用いたオプション評価、ポートフォリオインシユアランスなど
13	グループワーク発表6	オプション投資の有効性の検証
14	グループワーク最終報告	4年生の卒論報告など

【授業時間外の学習(準備学習・復習・宿題等)】

演習の目的は、学習した内容を実践できることが求められる。指定したテキストは事前精読、実践してくる(週2時間)。また、演習内で扱う範囲の理解だけでは十分とは言えず、指定テキストの章末問題を利用して自ら知識の拡充をはかることが求められる(週1時間)。また、より現実的な課題をグループワークを通してこなしてもらうことで、自分の知識の再確認を行ってもらう。それらの内容をまとめて提出するための時間も確保すること(平均して、週1時間)。

【参考書】

手嶋宣之『ファイナンス入門』(ダイヤモンド社、2011年)

【成績評価の方法と基準】

グループワークによるプレゼン内容の評価50%、平常点50%で評価する。なお、無断欠席を1回でもした場合、平常点として減点対象とする。また、無断欠席を2回した場合は評価が自動的に「不可」となる。欠席は理由を明記して、ゼミ当日の14時半までに担当教員にメールなどの直接連絡が取れる手段で連絡すること。第三者から伝達および不明瞭な理由による欠席は、どのような理由があろうとも無断欠席と同じ扱いになる。理由を明記した上での欠席でも平常点(減点)として評価に反映される。

【学生の意見等からの気づき】

グループワークによるプレゼンを行う回と教員主導によるテキストの内容を理解する回に分けるという試みが学生から好評のため、今年度も継続する。

【学生が準備すべき機器他】

各自がPCを持参して、演習中もEXCELを利用できる環境下にあることが求められる。

【Outline (in English)】

This seminar-styled course provides an introduction to the theories and the methods in investment analysis and corporate finance using data and simulation-based analyses. This course also provides opportunities to improve writing and PC skills to achieve the goal that students can write short academic reports or papers based on their acquired skills. Before each class meeting, students will be expected to spend two hours to prepare the course content. Students are also required to spend one hour for reviewing the content after each class and another one hour for solving some problems useful to deepen their understanding. Final grade will be calculated according to the following process: group work reports (50%) and in-class presentations and discussions (50%).

【Outline (in English)】

(Course outline)

Students will acquire applied knowledge about writing honors thesis and further prepare for thesis writing.

(Learning Objectives)

Students will narrow down their own research themes through reading and reporting on applied literature. In addition, students will further deepen their understanding of analytical methods.

(Learning activities outside of classroom)

Students will make a resume of their problem awareness, analysis methods, and results (findings and implications) on standard texts and basic literature. Students will also prepare a research note on their own problem consciousness and analysis methods for their thesis.

(Grading Criteria /Policy)

The overall evaluation of the presentation and its preparation will be based on the following criteria: aptitude for literature survey, understanding of previous research, ability to apply analytical methods in the relevant field, and appropriateness of the student's own problem awareness and analytical methods.

【授業の概要と目的（何を学ぶか）】

ゼミのテーマは企業行動分析です。新聞やテレビで目にする企業のことを、皆さんはどれだけ知っているでしょうか。就職活動をする時に、どの会社が「良い会社」なのかをどうやって調べますか。企業には戦略があります。ゼミではそうした戦略と企業のパフォーマンスとのつながりを、皆さんの力で明らかにしてください。分析手段のひとつとして財務情報を用いますが、戦略分析、資本市場分析、企業評価手法、マクロ経済分析、コーポレート・ガバナンス、企業の社会的責任など、企業行動の理解のためには財務会計以外の領域も扱います。

【到達目標】

新たな知識の獲得だけでなく、その知識を応用する力を実践しながら身につけていきましょう。共同作業やプレゼンテーションを通じて、社会で活躍するスキルの向上と、生涯を通じて信頼できる仲間を獲得することを目指します。

【Outline (in English)】

The theme of this seminar is corporate behavior analysis. How much do you know about the companies you see in newspapers and television? How do you find out which company is a "good company" when you are looking for a job?

Companies have a strategy. In this seminar, please clarify for yourself the connection between strategy and corporate performance.

We use financial information as one of the means of analysis. In addition, we also deal with areas other than financial accounting for understanding corporate behavior, such as strategic analysis, capital market analysis, corporate valuation methods, macroeconomic analysis, corporate governance, and corporate social responsibility.

Learning Objectives:

Not only capturing the knowledge but applying it to practical situations through group work and joint presentation, students should improve their skills and be connected to reliable lifelong partners.

Learning activities outside of classroom:

Before/after each class meeting, students will be expected to spend four hours in total to understand the course content.

Grading Policies:

Your overall grade will be decided based on the quality of your presentations in the class (50%), and your class participation including inter-college activities (50%).

【成績評価の方法と基準】

毎回の授業への参加、発言、輪読報告、グループプレゼン、また、合宿への参加で総合的に評価します。三年生のみには卒論を書くためのレポートを作成してもらいます。具体的に：

- (1)授業での発言、積極さ 30%
- (2)プレゼン 40%
- (3)レポート 30%

また、四年生に関して、履修するには卒論の提出が義務付けられています。卒論の執筆は個別指導を行います。最終成績は提出論文の質に基づいて評価します。

【学生の意見等からの気づき】

英文輪読では報告者と教員との一方通行の授業にならないように、ゼミ生全員の参加を促す工夫します。

English Drama I

GEORGE HANN

開講時期：春学期授業/Spring | 単位数：2単位
 曜日・時限：水2/Wed.2 | キャンパス：多摩
 毎年・隔年： | 科目主催学部：社会 Social Sciences
 備考（履修条件等）：
 その他属性：

【授業の概要と目的（何を学ぶか）】

This class aims to improve students' English listening and speaking abilities, as well as their ability to recognize and use non-verbal communication (NVC) strategies, through the use of short dramatic scenes and plays. Students will also learn acting techniques drawn from the Western drama tradition, including the Stanislavski, Meisner and Adler approaches.

【到達目標】

From the plays, students will gain a deeper understanding of the culture of English-speaking societies, and a greater ability to apply interaction rules with people from those societies. Students will also be able to make their English communication sound more “natural”.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The lesson cycle follows this flow:

1. Read the scene/play aloud (for pronunciation/intonation patterns etc.)
2. Script analysis (for character motivations, subtexts, etc.)
3. Assigning roles
4. Scene rehearsal
5. Performance.

After the performance, students in groups write original scenes based on themes and vocabulary from the given scene. They then perform their new scene the following week. Feedback will be in the form of annotated evaluations from the instructor, with points awarded for clarity, vocal and body dynamics, etc. There will also be short scene quizzes.

 備考（履修条件等）：
 その他属性：〈グ〉

【授業の概要と目的（何を学ぶか）】

In this course, students will learn the basic skills needed to ensure smooth intercultural communication. Students will learn how to interpret cultural aspects on multiple levels while making use of AI, online translators, and other tools. Educational materials will include real-life examples related to intergovernmental diplomatic messages, Track II multinational conferences, novels, films, and more.

【到達目標】

Acquire the practical skills needed for translation, interpretation, and intercultural communication.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

Students will be required to translate excerpts from texts, paying special attention to the cultural aspects mentioned both explicitly and implicitly. The translations are to be done out of class as assignments. During class, lectures will be given, and discussions will be held with regards to the translations the students prepared. Feedback for assignments and presentations will be given in class.

The first semester will focus on primarily on soft culture, while second semester will delve into international relations and other fields.

【授業時間外の学習（準備学習・復習・宿題等）】

Students must read the lecture note for each class and write down some comments on the topic at its test of the learning-support system, Hoppii before each class. Students also must write down their comments on the discussion in the class at its test of Hoppii after it.

Students are also expected to research similar movements of adult education in their own country for their short presentation on some of them at the eighth class.

The standard preparation and review time for each class is 2 hours.

【テキスト（教科書）】

There is no fixed textbook. Some documents are given at each class.

【参考書】

Social Education/Adult Education in Japan Policies, Practices and Movements during the last 12 years: Analysis and Recommendations – A Report from Civil Society Organizations to the Sixth International Conference for Adult Education (CONFINTEA VI) – (CSOs report)

【授業の概要と目的（何を学ぶか）】

広くジャーナリズム、マス・メディアに関する本格的な英語の文献・学術論文をできるだけ多量に精読し、全体像を理解し、かつその内容についてゼミ形式で大学院に匹敵するハイレベルなディスカッション（建設的な討論）をする。本講でいう「ディスカッション」とは、共通の題材に関して受講者がお互いの所感・疑問などを交換しあい、個人的に、また全体としてより深い理解を旨とする共同作業を意味する。

【到達目標】

As explained above, the purpose of this course is to experience the high-level, or graduate-level practice of academic, constructive discussion based on reading of as much quality English-language literature on journalism and mass media studies as possible.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

As explained above, the purpose of this course is to experience the high-level, or graduate-level, practice of academic, constructive discussion based on reading of as much quality English-language literature on journalism and mass media studies as possible.

To achieve the goal, participants must read all assigned materials in advance, a few chosen presenters summarize and extend the reading assignments, and then conduct class discussion.

Since the course design and schedule may vary depending on the number of participants, make sure to attend the first session in which the instructor will explain details. Those who missed the first session cannot get registered. The number of participants may be limited if too many appear.

The instructor will provide feedbacks and answers to questions during each session.

【授業時間外の学習（準備学習・復習・宿題等）】

All participants must conduct sufficient preparatory as well as follow-up study in order to successfully earn credits for this course. Roughly speaking, approximately two hours of study will be needed both before and after each session, but the amount may increase for some participants as this course requires a relatively high level of English skills.

【テキスト（教科書）】

The instructor will provide reading assignments for each session.

【参考書】

Besides reading assignments provided by the instructor, participants must collect and read additional reference materials for discussion.

【成績評価の方法と基準】

The final grade will be determined by the following factors: class activities including discussion (90%) and others (10%).

Participants will be graded not by exams, but by class activities including discussion. Participants must understand that mere attendance is far from enough to earn credits. Highly motivated class participation is imperative.

【学生の意見等からの気づき】

The instructor will take full consideration of any constructive comments and opinions of participants.

【Outline (in English)】

The purpose of this course is to experience the high-level, almost graduate-level practice of academic, constructive discussion based on reading of as much quality English-language literature on journalism and mass media studies as possible.

【授業時間外の学習 (準備学習・復習・宿題等)】

Please prepare a short self-introduction for the first class. In addition, each student will be asked to deliver an oral presentation on a designated topic and to submit a short written summary of the presentation and essay at the end of the semester. Students are also expected to actively engage in class discussions and to revise all of the readings done in class, as they will form the basis for the discussions and questions on the final exam. Preparatory study and review time for this class are 2 hours each. (University regulations suggest preparation and review are around 4 hours a week for a two-credit course.)

【テキスト (教科書)】

No textbooks will be used. Handouts and reading materials on each lesson's topic together with the specified sources will be distributed by the lecturer through HOPPII.

【授業の概要と目的（何を学ぶか）】

This course will seek to introduce the culture & society of contemporary Britain to students through a series of stimulating audio-visual units, together with selected thematically linked readings.

In addition to offering a greater understanding of contemporary UK culture, the course encourages students through the presentation & report to critically compare & contrast UK culture & society with their own.

【到達目標】

During this course, through regular exposure to a variety of audio-visual material, students will have the opportunity to sharpen their listening skills. Follow-up pair-work comprehension questions, discussion & structured conversation practice will also give them the opportunity to improve their oral skills. Finally students will be encouraged to reflect on their own culture & society as they learn about UK.

【この授業を履修することで学部等のディプロマポリシーに示されたどの能力を習得することができるか（該当授業科目と学位授与方針に明示された学習成果との関連）】

【授業の進め方と方法】

The previous lesson's reading assignment will be reviewed & discussed before a pair-work preview will introduce the theme for that lesson. Any required vocabulary will be previewed before students view/listen to the material.

Pair-work comprehension questions will allow students to check their own understanding, while a post-viewing discussion will offer more chances to analyze the material. Time permitting, there will be structured conversation practice before outlining the following week's homework.

【授業の概要と目的（何を学ぶか）】

Despite the rise of powers in Asia such as China & India, the US remains the pre-eminent global power and a key to understanding its prominence lies in an understanding of its rise as a superpower during the 20th century. Therefore, this course will focus on key political, economic & cultural developments during the latter half of that period, how they contributed to the rise of American power and continue to influence nations around the world, especially in Asia. Regular reading assignments will be set, analyzed & discussed during the lessons, allowing students to reflect on how the US continues to influence their nations as we enter a new century.

【到達目標】

Through a variety of media, this course seeks to firstly, give students a thorough understanding of key events in the US from the end of World War I to the close of the century. In addition, students will be able to comprehend how those events impacted not only on the course of modern US history, but their wider effect throughout the world, especially in the Asia-Pacific region.

【授業の概要と目的（何を学ぶか）】

Legal theory is a discipline that uses tools, concepts and methods from philosophy, sociology, political science, economics and critical studies, in order to study the concepts that are central or deemed the most important to talk about Law in a general way : authority, rule, norm, obligation, and the concept of law itself.

But as a specific discipline, Legal theory's vocabulary is distinct from the Legal vocabulary. It is therefore important to be able to understand the texts of the authors that build the framework and laid the background that is used today : HOBBS, ROUSSEAU, HUME, BENTHAM, AUSTIN, WEBER, KELSEN...

Their debates shaped new ideas and arguments, and in order to keep the discussion ongoing, this class will accompany the student into one of its most fundamental branches :

How to distinguish what is law and what it should be ? How do judges, legal practitioners and law professors deal with their functions and their personal preferences ? And overall, how does analytical philosophy of law, one of the most influential positivist approaches of legal phenomenon, historically deal with national and international tensions while ensuring respect of the individual ?

【到達目標】

By the end of the course, students are expected to have acquired:

1. An understanding of the purpose of legal theory and an overview of some of the main figures of the discipline.
2. A firm grasp on important notions in the fields of Law, Politics and Philosophy.
3. Analytical tools to understand legal theory texts, old english texts and classic and contemporary debates.
4. How to write a synthesis and argumentative essay.

【授業の概要と目的（何を学ぶか）】

The purpose of this class is to allow students to read the Japanese Constitution, and any Constitution, and understand how legal scholars (judges, lawyers, professors) interpret it. There is a tension between the traditional understanding of these sometimes old texts, and contemporary claims from new generations. This class will allow student to make "the source of fundamental rights" their own, especially after analysing the balance between the concepts of liberty and equality. Module 1 is devoted to the elements that made it possible to politicise the Constitution: the organisation of the State around the use of the principle of sovereignty, the separation of powers, and the Rule of law. Module 2 shows how the introduction of these principles in Japan enabled a rapid transition from the monarchy established by the Meiji Charter to representative democracy in 1946, and will point out the limits of the pre-eminence accorded to Parliament, and see that from an European point of view, it's not enough. This is the reason for the birth of Constitutionalism in its modern sense. Module 3 sketches out the relationship between this state and individuals, through the import of the individualism characteristic of Western thought, and more precisely one of its versions, the liberalism of Locke and Constant, and the consequences of this choice for the concept of freedom: Japan defends the idea of negative freedom. Module 4 will introduce the place of the Bill of Rights inside the Japanese constitution and its internal dynamic. Module 5 succinctly presents the fundamental clauses of the Japanese constitution, article 12 and 13. Module 6 will summarise the role of article 14 of the Japanese constitution in protecting against discrimination

【到達目標】

By attending this course, students will be able to:

1. Find, read and summarise legal texts (Constitution, law, court decision...)
2. Understand the actual challenges that the judge holding the power of judicial review have to face, and those that normal people have to access the tribunal, and be able to see the strong and weak point in their legal argumentations.
3. Being presented and familiarized with some of the most important theoretical notions (liberty, equality, right...) and the differences and links between law and politics, and on this base,
4. To be able to form a personal opinion, and share it with others in a safe environment

Legal theory is a discipline that uses tools, concepts and methods from philosophy, sociology, political science, economics and critical studies, in order to study the concepts that are central or deemed the most important to talk about Law in a general way : authority, rule, norm, obligation, and the concept of law itself.

But as a specific discipline, Legal theory's vocabulary is distinct from the Legal vocabulary, so it is therefore important to be able to understand the texts of the founders of the discipline among whom we will find Hart, Kelsen, Dworkin, Finnis, Fuller ... and be able to keep the discussion ongoing.

This class will accompany the student into one of the most fundamental branches of this discussion : how does analytical philosophy of law, and especially the tools provided by Herbert L. A. Hart's theory (1), one of the most influential positivist approaches of legal phenomenon, deal with contemporary problems such as :

- (2) the persistence of law in an era of seemingly never ending crises
- (3) the new forms of law usages by NGO and governments
- (4) the reluctance of justices to strike down arguably unconstitutional rules
- (5) the concurrence between the three branches of government
- (6) the complexities of interconnected legal systems, and the challenges posed to States, by private corporations
- (7) the way to scientifically account for injustices, especially ones rising from global warming
- (8) the role of law as a mean to avoid violence, and the stimulating challenges posed to legal positivism by jusnaturalism

【到達目標】

By the end of the course, students are expected to have acquired:

1. The skill of being able to find in library and online databases research articles
2. A firm grasp of some of the core notions of legal positivism and jusnaturalism
3. Comprehension of some of the great doctrinal debates of the discipline
4. A way to use these analytical tools to face contemporary problems

Students will be required to apply analytical frameworks they learned during class by conducting a research on a subject of their choice that will result in a little essay that will be submitted at the end of the semester.

Use of AI tools is forbidden, but feedback by the professor will be given at the beginning and the end of the class (are sources reliable, is the problematic sound, how to organize your study schedule...) in order to accompany the students in their research and homework. Mail can be written to the professor anytime if the student doesn't want to ask in front of the other students.

Course contents will vary depending on number of students presentations to be performed in class.

A final test will check if the notions are understood.

【授業の概要と目的（何を学ぶか）】

The purpose of this class is to allow student to read and understand a court decision in the field of fundamentals rights.

Constitutional law is now a trans-disciplinary field that connect to every branches of law, whether it is family law, commercial law, penal law... At the core of it is the protection of fundamental rights.

But, even if one of the wonders of the Japanese legal system is to provide the texts of the great legal decisions in English, the vocabulary that the judge uses to make or justify his decision can look frightening for the non-specialist. The class will accompany the student in acquiring the tools to read and understand in English, some of the most important constitutional cases in Japan.

We will see the influence of French, German and US doctrines, and the very specific Japanese ones on Japanese constitutional law, compare with solutions in other countries, and see that, contrary to the idea that Japan is always a country of consensus, that there have been strong debates between Justice especially because some defend a very national concept of Law when the other want to promote human rights protection with the same standards as others countries do.

【到達目標】

By the end of the course, it is expected that students have acquired :

1. Specific vocabulary to be able to read legal decisions.
2. Overview of some of the most important cases in Japan.
3. A robust knowledge of the structural doctrines that ensure or limit fundamental rights protection.
4. How to write a synthesis and argumentative essay.

【授業の概要と目的（何を学ぶか）】

One of the most pressing issues the Earth is facing is environmental problems. Such environmental problems are universal issues, so all the people on the earth should cooperate to solve these problems. At the beginning of this course, each environmental problem will be focused from the chemical viewpoint. Then, the students with different backgrounds will delve into the matters. The ultimate goal of this course is that we think about these problems deeply by sharing possible solutions with each other.

【到達目標】

The goal of this course is for students to lean environmental problems through chemistry. The objective 1) entirely environmental problems in the world; 2) to learn them you understand basic chemistry; 3) they think about solving the imminent problems by themselves.

【授業の概要と目的（何を学ぶか）】

The purpose of this course is to deepen students' understanding of the significance and role of physical activity and to foster the acquisition of essential knowledge and attitudes that contribute to the maintenance and promotion of physical, mental, and social health and self-management throughout life through lectures and practical training.

【到達目標】

By the end of the course, students should be able to do the followings:

1. Deepen understanding of the significance and role of physical activity from various perspectives.
2. Acquire the ability to use sports activities to establish a prosperous and healthy student and social life.
3. Acquire basic knowledge and develop attitudes that contribute to self-management.
4. To acquire the ability to demonstrate leadership and solve problems through communication with others, which is considered to be extremely important for playing an active role in the real world after graduation.
5. Aim to acquire various skills that lead to the development of employment ability (ability to build relationships of trust, ability to act jointly, etc.).

【授業の進め方と方法】

If the Method(s) is changed, we will announce the details of any changes.

Students are expected to be in good physical condition before attending the class so that they will not have any physical or mental problems during the physical activities in the class. In addition, students are expected to follow the lecture's instructions in charge of the class regarding assignments to be done after class and preparations for the next class.

This class has comprised both lectures and practical lessons, and students are expected to learn and understand elementary health and physical education. Also, the class schedule may be changed due to COVID-19 and the university guidelines.

Due to the coronavirus pandemic, if too many students are registered for this class, we may have to choose students via random selection to avoid a large group gathering. Further details of this will be announced through Hoppii before the first lesson starts.

【授業時間外の学習（準備学習・復習・宿題等）】

This class's standard preparatory study and review time is 2 hours each. The purpose of this class is to understand that sports activities contribute to the promotion of physical and mental health and interpersonal relationships through lectures and practical training. Therefore, record the time spent on daily physical activity, meals, sleep time, etc., look back on the contents, and record the effects and future tasks. Also, get in the habit of looking at various sports-related information sent from TV, newspapers, the Web, etc. This work will deepen your understanding of the contents of this class.

【テキスト（教科書）】

No textbook will be used.

【参考書】

Reference books may be introduced as and if necessary.

【成績評価の方法と基準】

Your overall grade in the class will be decided based on the following.

1. Participation status for activities during class / Presentation/ Reaction paper 60%.
2. Assignments / Reports 40%.

In principle, this grade evaluation method is used, and students who have difficulty in normal activities will be treated and evaluated individually.

【学生の意見等からの気づき】

1. Students are expected to communicate and interact with other students from all over the world, so this class tried to create the opportunity to enhance communication skills through sports and physical activities, including individual and team sports.
2. Students are expected to learn and implement the proper physical training (strength and conditioning). This class provided the appropriate information regarding physical training and aimed to improve the knowledge and skills of physical training based on the evidence.

【学生が準備すべき機器他】

1. Students must bring their proper sportswear and shoes for practical lessons.
2. Students must bring their own personal computer or mobile device to create and submit assignments.

【その他の重要事項】

1. The order and content of each class can be changed/modified due to the number of participants and available facilities, as well as the situation of COVID-19 and university guidelines.
2. This class is planned to be held offline (face to face); therefore, please follow the university guidelines carefully when participating in classes (e.g., sanitizing your hands before participation).
3. If students have any issues, including health, before, during, and after the class, students must inform their condition to the teacher.
